Volume 34, Number 1

JANUARY, 1980

Our 391st Issue

February 6. This is the last issue you will receive unless your 1980 A.V.A. dues have been paid by March 1. It's still only \$7.50. Send it to our Treasurer, R.K. Frisbee - 211 King Street - Denver, Colorado 80219. It is going to be a big year in the hobby. More new issues are coming out than for many years in the past and 1980 promises to be exciting for us. Once I complete a history-writing project for the college where I teach, I intend to begin work on a number of books, including new editions of the car wash token catalogue, the real estate token catalogue, and most especially a 4th edition of the Atwood Catalogue in two huge volumes plus a 3rd volume consisting of only variety listings with photographs of nearly all of them.

Together with this issue we are sending you the Index to Volume 33 of The Fare Box. This is not part of this issue; it should be put at the end of your December, 1979, issue.

I must confess that this was a slender month for good articles in The Fare Box. I had almost nothing to publish but lists, as you will see when you proceed into this issue. I am confident, however, that many of you will be sending me good publishable articles about tokens soon.

A while back I offered three tokens (Cal. Fantasy #1; Timetable AD; Cal 997 I) in return for a dollar contribution to the AVA Postage Fund. I was swamped, and these tokens are gone.

I receive from time to time inquiries about the duplicates in Ralph Freiberg's collection, which is in my possession. I regret that I won't have time to do a thing with Ralph's collection until the book I am writing on the history of my college has been completed. When I can return to working on Ralph's tokens I'll mention it in The Fare Box.

Every once in a while I browse through the old bound volumes of past issues of The Fare Box. Tonight I was looking at Volume 4, Number 1, January 1950. Like the present issue, that one was also 14 pages. There are fascinating things in these old issues, and when one has nothing else to do he can enjoy hours of good reading by going back over old issues.

Beginning with this issue you will notice the name & address of our new New Issues Editor, Harold Ford, in the upper left corner of the masthead. So for the first time in many a year, an issue of The Fare Box goes out without Ralph's name up there. Remember to send reports of unlisted tokens to Harold.

Parking Tokens Supplement Listings
By James Hall

As of this issue, of The Fare Box, I become the coordinator for parking tokens. Over the last few months, I have managed to go through most of the backlog and am putting in into order for publication on a regular basis.

There is a large backlog of unlisted tokens and an even larger backlog of new varieties. Currently, my main interest will be to publish as many new listings as possible; and then begin to dig into the new varieties backlog.

I do not mean to say that I consider new varieties are to take a back seat to new issues. Whenever I am in touch with parking token collectors, the first question I seem to get is: How many unlisted new issues do we have waiting for publication?

Currently, I have in the area of fifty pieces, in addition to what appears in the current column. Very few questions have arisen as to how many new varieties are yet to be listed. I intend to concentrate on new issues until they are few and far between. Once I get the majority of new issues out of the way, I intend to catch up on new variety listings. There are close to two hundred of these to be sorted out and listed.

My first supplement covers the new issues from California into Ohio. The second supplement finishes Ohio and heads toward manufacturer's samples, unattributed and foreign listings. As appropriate, I will attempt to intersperse varieties into the listings.

I am going to attempt something a little different in the field of new listings. Whenever possible, send the token to me. This makes my job simpler in determining size, unusual design, metal and numerous other problems in determining whether the token can be listed. There are quite a number of tokens that I cannot list because of improper descriptions and lack of pertinent data. I intend to send out letters on many of the token rubbings that I am currently holding because of incomplete descriptions.

Currently, I am considering answering letters of request for information only if they are accompanied by an SASE. With the large volume of mail coming in I consider this to be a valid request. I have access to a WATTS line. An enclosed telephone number may speed up the process of getting information to an individual.

The forthcoming year promises to be an interesting one for vecturists. I hope to be able to contribute my share to the hobby and am looking forward to cooperation from my fellow associates. Feel free to contribute your comments and suggestions in order to make this a good year for all of us.

As of this time, I am in contact with Duane Feisel concerning the matter of taking over the Parking Token New Issues Service. I should have information on this area within the next couple of months and will be passing the information on in a future issue of The Fare Box.

Jim.

JANUARY SUPPLEMENT TO THE CATALOGUE OF WORLD TRANSPORTATION TOKENS

by Kenneth E. Smith

S W E D E N (reported by H. Lundberg)

Arendal 105 (a suburb of Göteborg on Hisingen island)

ARENDALS ÅNGBÅTS AKTIEBOLAG ÖRE (29mm by 20mm)

FA	o	K	Ov	Sd	(RV 707)	(15 incuse on obverse)	10.00
FB	o	K	Ov	Sd	(RV707)	(20 incuse on obverse)	10.00
FC	o	B	Ov	Sd	(RV707)	(25 incuse on obverse)	10.00

(This company operated one ferry boat to Göteborg from about 1900 to liquidation in 1909)

TRAFIK AKTIEBOLAGET ARENDAL

FG	o	B	Ov	Sd	(RV707)	(25 incuse on obverse)(29mm by 20mm)	8.00
PH	o	Z	Ov	Sd	(RV707)	(25 incuse on obverse)(29mm by 20mm) (ex Norway 60C) (Wm plated)	8.00
FJ	o	Z	Obl	Sd	(RV707)	(50 incuse on obverse)(clipped corners) (25mm by 20mm)	10.00
FK	o	Z	SQn	Sd	(RV 707)	(75 incuse on obverse)(27mm) (cut out corners)	10.00

(This company operated one ferry boat to Göteborg from 1909 to 1920. They also used tokens with values 35, 20, and 100 which are unknown to collectors today)

Kongelf 420 (now spelled Kungälv)

INLAND ÅNGBÅTS AKTIEBOLAG ÖRE (all incuse)

FJ	o	B	Ov	Sd	(blank)	(25 incuse on obverse)(30mm by 21mm)	2.50
FK	o	B	Obl	Sd	(blank)	(35 incuse on obverse) (30mm by 21mm) (clipped corners)	3.00
FL	o	B	3l	Sd	(blank)	(40 incuse on obverse) (clipped top and bottom to 31mm by 23mm)	3.00
FM	o	B	30	Sd	(blank)	(50 incuse on obverse)	3.00
FN	o	B	Obl	Sd	(blank)	(60 incuse on obverse)(32mm by 28mm) (clipped corners)	3.00

(This company existed from 1890 to 1917 and operated a ferry line from Kornhall to Kongelf to Göteborg on the same route as the Kongelfs NYA Ångbåts with the same fare rates but on a different time schedule. Kornhall is only a residential area landing where there was a small ferry operating across the river which did not use tokens.)

Marstrand 510

MARSTRANDS FÄRJAN 20

0	o	B	19	Ch	(Rv705)	(Sc)	1.00
---	---	---	----	----	---------	------	------

(In 1913 the 510A token was put in use followed at intervals by other tokens, in 1972 they discontinued token usage. Shortly thereafter a public servant threw the sack of remaining tokens off the ferry into the ocean. All Marstrand tokens are hard to find now. There also exists a few 510 B,C,D, and J tokens with a triangle cut out of the center to remove the value. These may or may not have been done by the company to raise the value of these tokens when fares were increased.)

Remember when you report new discoveries, in addition to giving the exact wording spelling, and punctuation, to send rubbings or photographs. This is essential to insure accurate listings. Please keep the listings coming.

UNIDENTIFIED (Reported by G.R. Clark)

S.E. YOUNG / BUS LINE / 1 / RIDE
193 B Oc Sd F.H. Cobb. / Hornellsville. / N.Y. [all letters incuse](26mm)

Bud Carmichael visited Cooper Landing, Alaska, last summer (see his article on page 101 of August 1979 FB) and brought back some examples of the new listing thinking he had the 190 B. George Haynes obtained one of his duplicates and noted the date 1977 and phoned to alert me about the new issue. The New Issues Service was able to obtain a supply for its regular members only. Nicolosi reports the lowest numbered token was 2778, the high 5116, so we are not sure of the quantity struck. The Freiberg file shows that 3,000 were struck of 190 A, and 2,600 of 190 B and numbered. The mintage of 3,200 mentioned in the Carmichael article may be the figure for 190 C. Carmichael covered the historical background in his 8/79 article.

Tom Robinson reports that Heber, Ark., the county seat for Cleburne County, was changed to Heber Springs about 1910, so the listed depotel token was probably issued prior to that date. Martins were certainly active in the depotel livery business in Arkansas as I note the listing from Benton, too.

NY 375 C, like 375 B listed 6/78, is a senior citizen issue. Tokens are sold in quantities to seniors who have special green ID cards. Tokens are good for full fare on some buses and reduced fare on others. Unfortunately New Issues lacks this card and the management of the Huntington Area Rapid Transit does not want to sell us a quantity. The regular adult fare is 50¢.

Cambria County Transit Authority succeeded Johnstown Traction Co. on 12/1/76 and now has three new issues. The blue plastic has been in use for a year and a half and was issued for school, government, and special service agencies. The green plastic is sold to employers who resell to their employees at a reduced rate. The red plastic is used for regular adult fare.

We know nothing about the unidentified token. The name on reverse is probably that of the manufacturer of the token. This issue and Unidentified #50, which has the same reverse, are definitely older issues, as indicated by the die work. Mr. Clark reports that Hornellsville became Hornell sometime before 1914, which helps to date these issues.

A token similar to Unidentified #32, but in brass, has been reported. The Frei-

berg files lack a rubbing or name of an owner for #32. Would the owner please send me a rubbing and verify size and metal, or we may delete the aluminum listing and substitute the brass issue, which I have examined and verified.

= JANUARY NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

The 1980's begin with some very promising new issues. There will be seven nice tokens going your way this month, and several more are pending. If this trend continues we are off to a great start for the year.

First this month we send you Fla 520 D and E, listed last month. I want to thank Doug Ferguson personally for making a long trip to get these for us. He donated his time and, most of all, precious gasoline, to do this for us. Doug winters in Florida from his home in Canada. Thanks very much, Doug!

Next NY 630 AZ, also listed last month. My sincere thanks again to George Cuhaj for his effort and time involved in getting these for us.

Then Pa 495 V,W,X, listed this month. We thank Bob Null for the lead, and Joel Reznick for a quick follow-up which made our obtaining these tokens possible.

Finally, ILL 795 A, also listed last month. Once again a big thanks to President Joel Reznick for his part in making it possible for us to get this one.

The three Pillar Point wooden nickels were mailed to all on my list and you should have them now. They are still available to anyone wanting them, as many as you wish at \$1.25 postpaid per set of 3.

Time now to stop as I have my work cut out for me preparing the above new issues. More for next month. Thanks again to all of the above members who made it possible for us to send these out. And thanks also for all those who sent nice Christmas cards!

= DELAWARE TURNPIKE TOKENS =
By George Goeller

This is in reference to Delaware Turnpike tokens making an appearance with center holes in them. When I stopped at the Delaware Turnpike Authority last spring I was informed by a very nice lady that they were having problems with the aluminum centers falling out of the tokens and fouling up the machines. She said that the DTA was eventually going to punch out all the centers and use them in this manner. But with the new DE 300 I, will this process continue?

Incidentally on another subject, I was recently at the Baltimore Streetcar Museum and inquired about the new museum token, and was told that since Hurricane Frederick they had more pressing things on their minds than tokens.

Frank Kelley of Harbor, Ore., reports an interesting and apparently unlisted token from Switzerland:

B 21 Sd TRAMWAY / LA CHAUX DE FONDS / (STREETCAR)
3on / Pour Une / Course

And Chuck Littlefield reports a round fibre depotel of uncertain origin:

Fo 38 Sd CITY BUS / AND TRANSFER / STAR LIVERY BARN / E.R. PERRY, PROPRIETOR /
PHONE NO. 10
(blank)

"I think I am close to tracking it down," he adds.

= NEW VARIETIES CATALOGUE =

For several years now, a number of collectors have been working together with the object of producing a really comprehensive catalogue of minor die varieties. The lynchpin of the operation has been Syd Joseph of Denver, whose magnificent photography is at the core of the project. Thousands of tokens have been photographed by Syd, and catalogued and arranged by several others working with him. Greg Prgomet, Ralph Hinde, and Ralph Freiberg, were all involved in the project. With their passing, it has been made much more difficult, and the problems were aggravated by Syd's recent surgery, from which he is recuperating nicely.

Gene Godsoe came forward to our rescue and has thrown himself into the project with vigor, and he is now actually producing the manuscript for a Varieties Catalogue. This will be a huge book, about the size of the current Atwood Catalogue, and it is hoped that it will contain a description of every known die variety, with photographs of nearly all of them--clear, enlarged photos which will make it simple to differentiate between them. With the help of this book, any collector will be able to tell which die varieties he has, and which he needs.

One of the chief problems at present for producing the book is money. We have less than \$10,000 in our Catalogue Fund, and first call on this money is for the 4th edition of the Atwood Catalogue, which will be produced (in 2 volumes) in 1981 by your Editor, working with Hal Ford. If I can sell enough Atwoods in advance to cover most of the printing cost, then we shall have sufficient left over to pay for the Varieties Catalogue. The Varieties Catalogue will, in reality, be the 3rd volume of the new Atwood, for every member will want a copy.

This book will be a monument to Syd Joseph and Gene Godsoe, who have devoted massive amounts of work and time to its completion, and of course it will also be a memorial to the other wonderful collectors who also devoted much work to it--Ralph Hinde, Ralph Freiberg, and Greg Prgomet.

More will be announced later about these three volumes. They will, as usual, be available to members at a greatly reduced price for advance orders. The important thing now is simply to remind you all that the AVA has a lot of great projects in the wind, and the 1980's promise to be an exciting time to be one of us.

Volume 34, Number 2

FEBRUARY, 1980

Our 392nd Issue

C. EDWARD PARKER

Ed Parker, AVA #1235, of Winnipeg, died last December 8. He came to us in January, 1971, when he was 46 years old. Ed was one of our most knowledgeable members. A serious and avid student of the tokens of Winnipeg and Manitoba, he will be sorely missed by the many collectors who sought his assistance with these tokens over the years. He will be even more missed by our members who will convene in his home city for the AVA Annual Convention next August. Many of us had been looking forward to meeting him for the first time on that occasion.

March 3. The AVA mimeograph machine collapsed on me last month in the middle of the January issue. With the assistance of prayer and a long-handled screwdriver I was able to keep it going to complete that issue. The A.B. Dick repair man arrived the following week and informed me that three "bushings" are excessively worn, and replacements must be ordered from Chicago. They have not arrived. So this issue, I hope, will also be produced as was the last one. But it's tricky. If I can't get the thing to work, I'll have to farm out the pages to an offset house. Hence I kept the issue down to 12 pages to save on (1) my nerves, or (2) the offset expense. With luck the machine will be running in time for the March issue next month.

In the New Finds Department, John Backora writes that he has picked up another Coshocton, Ohio, token. This one is like OH 210 A but, he says, the new one is bronze instead of brass. Otherwise the same die work as the one already listed, which John also owns. He found this one in Columbus, whereas he had found the other one in "the eastern part of the state in one of the river towns."

Steve Album writes that on a recent trip to Morocco he found one of the Temple University parking tokens in a junk box in the town of Muhammadiya. On the same trip last November Steve also visited Damascus, Syria, "but did not see a single token there, only lots and lots of coins." Same letter he comments on the delights of riding the new streetcars (light rail vehicles) in San Francisco. I hope San Francisco has better luck with the things than Boston!

One of the tokens I obtained when I purchased Ralph Freiberg's collection was Mo 665 A which, as I already owned the token, I assumed would be a duplicate. Upon comparing the two tokens, however, I noticed that the die work is distinctly different! I have affixed photos (enlarged 2x) of the obverses of the two tokens to the left. There are several differences, but the most obvious is the placing of the top star. The star is closer to "toll" on the left token than on the right.

Below the Mo 665 A's are photos of the obverse & reverse of Col 998 B which I obtained from Ralph's collection. The most interesting patterns are those which are of an entirely different design from anything that was adopted for use, and such is the case here. The central triangle design of the token is actually the logo of the Denver Tramway which, of course, is now defunct. Although the

patterns were never used, it is interesting that the token in Ralph's collection is quite worn. Someone must have carried it around in his pocket. This pattern comes solid and center-holed, and there are precious few of these things around.

George Cuhaj writes about the token NY 630 AP: "With a new campaign to get more players to the track and not use off track betting, the fare is now \$1." He also informs us that NYCTA now has the white metal strikings of the 75th anniversary tokens, but they haven't released them to the public pending arrival of "suitable holders."

As of March 1, the following members had not renewed their membership for 1980. I am certain that many of them will, especially overseas members who didn't get their dues notices until six weeks after they were sent out.

Aldighere, Atkinson, Bensen, Berry, Bingaman, Boden, Brooks, Burrowes, Canfield, Carberry, Carner, Clifton, Cole, Corey, Cowley, Delgado, Delpalacio, Dop, Dugan, Durgin, Ellis, Enzman, Eshleman, Feldpausch, Fiedler, Fleet, Flinn, Frank, Gilmartin, Hamilton, Hepner, Hill, Hutzler, E.S. Jacob, Jamison, Jester, Jobs, Rolf Johnsen, Marie Johnson, C.H. = DRUMMERS AND LIVERYMEN =

By Gerald E. Johnson

In the American folklore and way of life it is difficult to visualize the image of the patented city slicker being taken advantage of by the local yokel. However, at the turn of the century, Wisconsin was the setting for just such a farce.

Late industrial development and the water barrier posed by Lake Michigan made the small and scattered towns of Wisconsin a prime selling area for the varied small businesses of the Chicago area. So when the railroads pushed north in the 1890's this vast new market was opened to the traveling salesman.

The salesman of those days would generally arrive in town burdened with suitcases filled with samples, spend the night at the hotel, and leave the following day. These "drummers," as they were called, naturally took a dim view of trudging the half mile or more from the depot to the hotel.

It is an early Wisconsin axiom that "wherever two or three men gathered, there would be a livery stable," and it was the lot of these enterprising individuals to fill the public transportation gap in the small Wisconsin hamlets of the early 1900's. While everyone in those days had a horse, about the only unattached animals in town belonged to the local livery. It didn't take these midwesterners long to knock together a makeshift "bus" or to find a battered secondhand stage coach and lie in wait at the depots when their city cousins arrived.

The delighted drummers found that the price of this luxury never varied--two bits (a staggering price in those days)--but what choice did he have? And, in a weak moment, the liveryman condescended to haul his victim back to the depot in the deal. So the 25¢ fare at least insured a return trip and took some of the sting out of the exorbitant rate.

As competition developed between liverymen for this lucrative business, it became necessary to "assure" the salesman that he would not be charged for the return trip, and metal tokens were procured for this purpose. The tokens were generally quite large, ranging from the size of a quarter to some as large as a silver dollar. The metal was brass or aluminum, although a few reusable cardboard pieces exist also.

Depot hotels are the rarest tokens in numismatics. They were struck in small batches, perhaps only 100 at a time, and were used for only a few short years due to the evolution of the automobile.

Within the grouping called "depot hotels," or "depotels," the following types exist:

1. Transfer tokens. Good between depots of different railroads.
2. Hotel bus tokens. Business-stimulating tokens the drummer paid for along with his room rate (painless extraction of the fare).
3. Auto bus tokens. The latest type depot tokens used, possibly as late as 1930.
4. One ride tokens. Used within the city like our present taxis, as well as between the hotels and depots.

The individuality of the liverymen is evident in the obverses and reverses of these metal milestones. The term "bus" is often spelled "buss," and the use of periods, stars, diamonds, and other decorative trivia added the homey midwestern touch.

World War I finished these hack lines. A few of them motorized, but evidence is that they were never particularly successful.

The beleaguered drummer was one of the first to resort to his own automobile (perhaps in a spirit of revenge?), and many larger towns began their own city transit lines. Generally these were electric powered streetcars.

So passed another nostalgic phase in Wisconsin (and Midwest) history. The brief, but heroic, stand of the "small town boy" against the legendary "city slicker."

This is only one of the innumerable little histories, within our history, that is told in tokens.

= FEBRUARY NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

Just finishing up on the January new issues, and will now start to distribute the February new issues, which will consist of only one token: the beautiful Alaska 190 C which is like 190 B but with the date 1977 on it. This was listed last month.

I regret that only my regular members will receive this token, as I have only enough of them for 100 members. Here is a case where it pays to be a regular in the N.I.S. Which prompts me once again to remind some of you Regulars that your balance is on the debit side and it's time for another deposit.

When sending a deposit, please make it no less than \$5.00, and more more than \$20.00. This is important. If you send under \$5 or over \$20, it means a lot of additional bookwork for me. So please keep inside those limits. And make the check out to me personally and not to "New Issues Service" as I have no account under the N.I.S. and that just makes a lot more trouble.

If I get all caught up, there is a chance of two more tokens going your way, and these will go to both Regular and Associate members of N.I.S. These will be the Minneapolis Zoo tokens, listed this month. We are grateful to Quincy Laflin and Tex Barnett for the lead on these tokens, and to our faithful AVA president Joel Reznick for completing arrangements for us. These are fine looking tokens. If I can't get them into the mail this month they will go out in March.

To those of you who have requested my personal token 116 I, I'm very sorry but I don't have enough to send. Some of you were kind of uptight about this, but I really am sorry. I just don't have any more; if I did I'd gladly send you one.

B A T S

The Bay Area Token Society of California held its planned reorganizational meeting February 10 and confirmed that clubs such as this are a necessity in our hobby. President Duane Feisel led the group to the following decisions:

1. Meetings will be held monthly except in August and December.
2. Meetings will be at 12 Noon in the railroad car at the San Diego Federal Savings & Loan, which is situated in Los Altos, California.
3. A \$1.00 donation will be requested of each member attending, to cover the cost of postage, coffee, and donuts. This will eliminate the necessity of dues.

Attending the February 10 meeting were Eli Bail, Erle Hanson, Andy Johnson, Bud Nelson, Chuck Nichols, Clyde Spofford, John Trembley, Peter Weiglin, and Bud Carmichael. Next meeting: March 9. Out-of-towners are always welcome.

D V V A

The Delaware Valley Vecturist Association met January 13 in Pernicano's office in Fort Washington, Pa. Weather was beautiful for a winter's drive and fifteen members, plus wives, made an appearance. As you would expect, the normal trading, buying, selling, and token stories, made up the major portion of the gathering. There was a short break for an informal meeting to discuss some important business. We are still brying to set up the annual Token & Medal Show with Zaika and DeGregorio doing most of the footwork. Location, timing and cost, are the major factors involved. More on this later. Also discussed was a meeting to be held June 29, 1980, at Rockhill Furnace, Pa. Details will be announced later in THE FARE BOX. Present at the January 13 meeting were Zaika, Bergey, Biles, Streeter, Seger, Paul, Ciecka, Goeller, DeGregorio, Lonney, DiMichael, Peters, Donahue, Acqualino, Pernicano. Next meeting will be March 9, same place and time.

= THE 1980 A.V.A. CONVENTION AT WINNIPEG =

Our annual convention this year will be held at the Viscount Gort Motel in Winnipeg, Manitoba, Canada, on August 8,9,10. It seems even more fitting--although our plans were formulated long ago--that we should visit our Canadian neighbors now, after their magnificent gesture on our behalf.

The large beautiful rooms in the Viscount Gort are \$28.00 for a single, and \$32.00 for a double (Canadian funds; for U.S. funds figure approximately 15% less).

Our tour, across the street from our motel, is a 38-mile round trip ride on the Prairie Dog Central Railroad, a steam locomotive with three 100+ year-old cars. It should be a most enjoyable outing.

Winnipeg is a beautiful city, and whether or not you have been there, this is an ideal time to visit this attractive area. I have been assured by both U.S. and Canadian customs officials that our members will not be inconvenienced in crossing either way. (What we collect are hobby items, not coin of the realm). So please put any such worries out of your mind.

Early registrants send me \$18.50 per person. After May 1, \$20.00 per. Send registration fee, which includes the usuals, directly to

JOEL J. REZNICK - 120 S. LaSALLE ST., SUITE 910 - CHICAGO, IL 60603

= THE A.V.A. CONVENTION AUCTION =

This year the A.V.A. Annual Convention will be held at Winnipeg, Manitoba, on August 8,9,10. As in the past there will be a combination floor-and-mail auction held in connection with the Convention. All members who would care to submit tokens for this auction should send them to JIM HEMPHILL - P.O. BOX 1321 - LAKE OSWEGO, OREGON 97034.

Jim will be in charge of receiving the tokens and preparing the auction list for THE FARE BOX and the Convention. Auction rules are as follows:

1. All tokens must be in 2x2 coin holders (no envelopes please).
2. All tokens must be clearly and correctly identified as to Catalogue number.
3. All tokens must be obsolete, and catalogue for 25¢ each, or more.
4. Please only one tokens of a variety from each consignor.
5. Minimum bids by consignor will be accepted if notification is made at time of shipment.
6. Tokens should be received by Jim Hemphill by May 24, 1980. Please send tokens via insured priority mail.

= PERSONAL TOKENS =

The collecting of vecturist personal tokens is becoming a very big and a very serious hobby. When Yosef Sa'ar first suggested the idea, and when I followed through with the idea of actually cataloguing them, I never dreamt it would become what it is today. Throughout I have tried to maintain certain standards: no wooden or cardboard stuff; no artificial rarities (although some have slipped in); no auctions of these things unless the issuer has died. Essentially they are supposed to be giveaways, like calling cards.

Anyway, several errors manage to creep into my listings from time to time. Sometimes members instruct me what letters to assign their tokens. I try to accommodate these requests, although it is strange for an issuer to tell a cataloguer how to list his tokens. Can you imagine a bus company telling us how to list his new tokens? To insure that your tokens get the correct numbers hereafter, will you please insert each personal token you send me in a 2x2 envelope with the correct number it should have? This will help me avoid errors, and it will help you get your tokens listed in the order you wish. I assume members are more aware than anybody what numbers their tokens have.

MANUFACTURERS SAMPLES

Group 22A (Reported by Chuck Nichols)
 MEYER & WENTHE / SAMPLE
 A B 16 Sd Good For / One Fare / UT (UT is incuse)
 [Reverse die same as that used for NY 10 A thru D]

The Minnesota Zoological Garden in Apple Valley, near the Twin Cities, opened their monorail train in September, 1979, amidst local controversy as to whether the ridership and fares could support the bonded indebtedness. The monorail is over a mile long, and carries about 40 riders in five cars. The operator, or conductor, of the monorail train narrates the terrain and different animals as the train travels through the zoo. Opening fares were 50¢ for children and seniors (the Wm token), and \$1.00 for adults (the brass token). But fares were increased shortly after a newspaper editorial appeared, which expressed concern about the fares paying for the installation. The new fare is 75¢ and \$1.50 respectively. The Zoo ordered its tokens through Perey Turnstiles. This tells us how the tokens are collected, but not who struck them. The New Issues Service will handle these issues.

A non-member in the Spokane area sent Frank Kelley a rubbing of the token we list as WA 840 V. Mr. Kelley reports that Fort George Wright has been deactivated as an army base for many years, and part of its facilities were then used for an Indian school. The date of issue of this token, or where the bus line operated, is not known. The die work indicates a token probably struck prior to World War II. This token needs more research and that is why we have given it a conservative value.

We found a rubbing of Unidentified 194 in Ralph Freiberg's files, under Red Deer, Alberta, with a questionmark. Since we believe that the tokens now listed from Red Deer are really from Binghamton, NY (die work being identical to that of NY 80 M), this new token just might be really from Red Deer. Its die work is different and it has LINES instead of LINE.

Gene Godsoe, currently stationed in Japan, sent rubbings of two tokens from Thetford Mines, Quebec. (1) B 26 Sd R. GILBERT / SERVICE / D'AUTOBUS; (2) A 31 Sd YVON RANCOURT / SERVICE D/AUTOBUS / THETFORD-MINES. Before listing tokens we like to have some proof that they are in use, or have been used. Since receiving Gene's letter we received a letter from J. Douglas Ferguson confirming that they are in use, and we are hopeful of obtaining a supply for the New Issues Service.

We are already working on some more new issues for next month. Meantime, if you know of an unlisted token please send a full description with rubbing to me at 43 Arroyo Drive - Moraga, California 94556.

S W E D E NGöteborg 240

The following tokens were used over the years by workers at the AB Götaverken shipyards for the ferries.

		HISINGEN ÖRE 3 ÖRE	
HAo Z	22 Sd	(RV705)	\$1.00
HBo B	22 Sd	(Var.)(ex 320 RG)	1.00
		a. (RV705) b. (RV708)	

The anslupsaktiebolag Hisingen operated from 1907 to 1917 and was owned by the Götaverken shipyard.

		GÖTEBORG MEK. WERKSTAD 5 (all incuse)	
HCo B	29 Sd	(blank)	1.00
		GÄLLER ENDAST FÖR FARD A LINJERNA 3,4,5.	
HDo P	21 Sd	Gäller endast för Anställda Vid AB Götaverken Får ej Överlåtas (yellow)(ex 240 GC)	.25

The City of Göteborg at various times had 3 ferry services operating five ferry lines across the GÖTA ÄLV River to the part of Göteborg on the island of Hisingen. The first ferry service was the GÖTEBORGS STADS FAJOR OCH ANGSLUPAR which issued tokens 240 CN thru CX. The second ferry service was the GHS (Göteborgs Hamm Styrelse) which issued tokens 240 DA thru DN. The third ferry service was the Göteborgs Farjetrafik which issued tokens 240 FA thru GB. These ferry lines were put out of service as they gradually built the great bridges across the GÖTA ÄLV River. Mr. Lundberg also reported the following unlisted tokens:

240 CW	- like CP but in Zinc	1.00
240 CX	- like CN but in Zinc	1.00
240 DA	- variety c with RV 705 reverse	.20
240 DC	- variety c " " "	.20

		GÖTEBORGS SLUSS KR. 1	
SBo B	Trr Sd	(RV 705)(31x29mm)	5.00

These tokens were issued to employees of the lumber mills and other canal shippers to pay passage fees for lumber rafts, log rafts, and canal boats through the Göteborg Sluss Canal locks. SA was for regular weekday 7 AM to 5 PM canal fee for a raft or canal boat; SB was a supplemental token to pay overweight or over volume charges or off-hours additional fees.

= SUPPLEMENT H-2 TO FEISEL'S CATALOGUE OF PARKING TOKENS =

By James H. Hall

This supplement represents a continuation of the unlisted tokens, picking up with the state of Ohio and running through Manufacturer's Samples. Future supplements will deal with new issues and varieties. Please report any unlisted token and varieties of existing tokens to: James H. Hall - 4301 Columbia Pike #710 - Arlington, Va., 22204. If at all possible, please send the token itself, and include all information known about the piece. Also enclose a SASE for return of the token.

MARCH, 1980

Our 393rd Issue

LEONARD H. PAUL and WILLIAM L. CARR

It is difficult to think of the A.V.A. without Len Paul. He was the kind of person one felt comfortable with. He always had a kind word and a friendly smile, and a great sense of humor. He was always calling me on the phone from his home in Folsom, PA, or writing friendly notes just to say Hello. He joined us back in 1958 and held #284. A chemist by profession and a joiner of endless collectors' organizations, Len just naturally enjoyed people, and increased the general tone and enjoyment of any gathering he was a part of.

Bill Carr held AVA #114, having joined us way back in 1951. He was a regular at our early conventions, and was one of those who helped write our present constitution. Toward the end he slowed down, but not so much that he didn't maintain our venerable correspondence. The A.V.A. has changed a lot from those good early years, but a lot of things about the A.V.A. haven't changed, and one of these is the affection we all have for each other in our common hobby and interest. Len and Bill were part of what makes our Association something special. A last farewell to them both, with our thanks for a hundred happy meetings and memories.

April 7. At this writing the AVA mimeograph machine is in the shop being repaired. It has been promised to be returned this week, and if it is, this issue will be mailed on Sunday, April 13.

The New York subway system is now on strike. When the system gets going again it seems almost certain there will be a fare increase, probably to 75¢. According to the *New York Times*, people have been hoarding the NY 630 AS in anticipation. So the Transit Authority now says it will haul out the NY 630 AT instead. A few of AT are already in the hands of collectors, but as 35,000,000 of them were struck, I hope no one paid more than 75¢ for it. There will be plenty of them around soon.

A.V.A. President Joel Reznick will shortly be moving to a new business address in Chicago, just down the street. Beginning April 21, his address will be Suite 1510, 208 South LaSalle Street - Chicago, IL 60604. He also will no longer have

his WATS telephone number. His new phone number will be 312-726-1300. But he says members may call him collect at that number. Remember that all of this takes effect on April 21. Last month in the announcement of the 1980 A.V.A. Convention at Winnipeg, we mentioned that registration for the Convention would be \$18.50 per person if sent in before May 1. After May 1, it will be \$20. Be sure to remember to use Joel's new address when you send it in, if after April 21. But do be sure to send in your registration if you plan to attend. It is enormously easier on all of us to have early registrations. The Convention, our first held outside the U.S.A., will be August 8-10 at the Viscount Gort Hotel, and the program looks great.

Also last month on page 16 we ran a list of members who were late in sending in their 1980 dues. As I suspected, many of those on the list did send in their dues before the deadline, and many more have done so since then. Every year we worry that a large number of members will drop out, but then there's nearly always a flood right at the end. Seems some of our most venerable members are congenital procrastinators, but we love them just the same. In any event, the latest list of members who did not renew membership for 1980, as of March 22, is as follows. Those on the list on Page 16 who are not on the list below may be presumed to have stayed with us.

Not Paid as of March 22: Berry, Clifton, Cole, Dop, Dugan, Durgin, Ellis, Feldpausch, Gilmartin, Hepner, Jamison, Jobes, Kelsey, Klugman, Knight, Chet Krause, Lanning, Lehmann, Long, Longo, McDow, McDowell, Navrkal, Neikirk, H.D. Nelson, Noe, Poland, Raby, Rauch, Rila, Bill Riley, Rock, Ryder, Sa'ar, Sallee, Schieber, Shupe, W.G. Smith, R.J. Snyder, Sowards, Spangenberg, Spangler, D.J. Taylor, Timmins Coin Club, Vanier.

The weekend of March 29 and 30 a large exnumia show was held in Chicago, and an auction was conducted by AVA member Paul Cunningham. Included in the auction were a few rare transportation tokens. I do not have the full list of prices realized yet, but I do know what two of the tokens brought. NY 629 A was sold for \$179.00. The price for NY 629 B was close to a record. It brought \$715.00. Now this does not mean that all underlined census tokens are now in that exclusive company. What it does mean is that certain collectors who specialize in one state are willing to pay very generous prices for the few rare tokens they still need in the state of their specialty. Nevertheless we have to face the facts of life, that rare transportation tokens are getting up there in value. This may make some of us unhappy. The price of oil also makes some of us unhappy. There isn't much we can do about either situation. The silver lining on the vecturist cloud, however, is that thousands of transportation tokens are still available for a very modest price and that a large and representative collection is still quite inexpensive.

Speaking of prices realized, Ed Dence just sent a list from his February Fare Box auction: PA 150 A, \$8.50; 750 AC \$55.55; AE \$50; Z \$6.25; Philippines 700 B \$18.75; China 720 B, \$3.85.

I usually mention about ads at the bottom of the last page, but ran out of space this month. Ads in THE FARE BOX are free to AVA members, and you may have up to 6 lines in every issue. This includes your name & address, which should be written on the same sheet with your ad so I won't have to search all over for it; I still don't know everyone's address by heart. The ad also should be on a separate sheet all by itself. Don't put it in as part of a letter, as it is just liable to be put in the wrong tray and never get printed. About the best way to submit an ad is via a postcard. That also saves you a nickel. If your ad includes an auction, it must not auction tokens listed at under 25¢ in any catalogue. I can't check every catalogue number so am counting on members to cooperate in this. Tokens now in use, regardless of value, also should not be auctioned, and personal tokens, except those of deceased members, should not be auctioned. Finally, there is no deadline. Send in your ad and I'll run it in the next issue. But remember the mails are slow, and sometimes your ad gets here just one day late, which means it won't

be published for another month. The best time to send in your ad is as soon as you get your Fare Box; then it will make the next issue for sure. If the ad consists almost entirely of catalogue numbers, please limit it to 3 lines instead of 6. The ad must be different each time (don't ask us to run the same ad more than once), and has to be sent in each month. Don't send more than one at a time as we have no way of keeping holdovers. All of this may seem complicated, but the purpose is to make it easy and sensible for all of us. The ads are the most popular part of The Fare Box. So please send them in.

The Massachusetts Bay Transportation Authority, which operates all public transportation in the Greater Boston area, has just completed extension of a rapid transit line to Braintree. The fare to Braintree from Boston is 75¢. If you get on in Boston you pay 25¢ in the subway turnstile, and 50¢ when you get off in Braintree. But if you get on in Braintree, you pay 75¢. This is collected by means of a token which must be purchased for 75¢ at a toll booth. When AVA member Foster Palmer rode the new Braintree line on opening day, he was excited when he saw a sign about tokens. Unfortunately, as it turned out, the MBTA has hauled out the old Mass 115 L and put it back into use. So make that one current again, with a face value of 75¢. But it's only used in Braintree.

Gary Patterson sends a rubbing of a token about which we know nothing. It is described thus:

MILL CREEK / CHILD / VALLEY PARK
B 32 Sd (same as obverse)

Now this could be an amusement ride token. But it could also be for admission to something that has nothing to do with transportation. I also suspect that there is a companion ADULT token. But first of all, where is Valley Park?

In the same department, Tom Brown sends a rubbing of a token which is in the same category as MD 550 A B C:

SUPER / SLIDE / TOKEN [incuse letters]
S 23 Sd (blank) [copper-plated]

The "Super Slide" operated at 2600 34th Street North in St. Petersburg, Florida, from 1970 to 1973. I suppose the first question is, Should we really be listing as transportation tokens, tokens which permit you to slide down something?

THE FARE BOX swaps subscriptions with the JOURNAL of the Transport Ticket Society of England. Their Journal is much larger than THE FARE BOX, and we are like dilettantes compared with the way they go into the intricacies of ticket collecting. But occasionally I learn something about tokens. For instance on page 65 of their February 1980 issue (which contains fifty legal-size pages!) in an article entitled "Airport Coach Tickets To & From London Airport" by J.K.H. Cunningham, O.B.E., we learn that round cardboard tokens were used at West London Terminal once upon a time. These tokens were available from machines, and were valid for 3 shillings 6 pence child fare, or 7 shillings adult fare. The tokens are 1-3/4" in diameter, inscribed 3/6 [or 7/-] BEA AIRPORT COACH SERVICE. On the reverse they "had the standard short conditions...and a number." The 3/6 tokens were light green in colour, but the author did not know the colour of the 7/- tokens. I had never heard of these items before.

Just today--April 7--the Editor had a pleasant visit with AVA member Harry K. Nicholls of Dallas. Harry was in town to purchase, and arrange for the shipping back to Dallas, of an MBTA trolley car which will be put on display in a trolley museum down there.

= LEONARD H. PAUL = AN APPRECIATION =

By Bill Lonney

This is not an easy time for any of us in the Delaware Valley Vecturist Association as our sincere feelings of sympathy go out to Ethel Paul following the death of her husband, and our friend, Len Paul on March 18. What can we say about him that would adequately express our feelings or describe the loss of that personable gentleman and fellow token collector? We of the DVVA who knew him through so many meetings, shows, and conventions and who lived with his sincere and jovial manner will truly miss his presence. Some of us knew Len better and longer than others did, but he never showed a preference of friendship for anyone in our group. In retrospect we sincerely hope that we never took for granted his work in writing up our local news for THE FARE BOX, his assistance at our spring token & medal shows, or his dependable postcard reminders of our meetings.

As we continue our fierce competition and frantic search for those rare finds and heretofore unlisted specimens, Len's passing makes us acutely aware of a very important facet of our hobby. Along the way we have been collecting intangibles of greater value and durability than these pieces of plastic and metal, and these things are the friendships of other collectors such as Len Paul.

= TWO TOUR TOKENS FROM BISBEE, ARIZONA =

Recently Charles Max of Denver reported two interesting tokens in use for a pair of tours in Bisbee. He learned of them by means of a newspaper ad by the San Jose Lodge of Bisbee, which offered the following: "Special Offer Free Tour of Queen Mine! Spend a night (\$10 per person, double occupancy), receive "Golden Coins" good for 2 free admissions to the Queen Underground Copper Mine Tour (value \$7)" etc.

He wrote and learned that the Lodge no longer sponsors the tour, but that the City of Bisbee now operates the tours. The Editor has just received a letter from Jeffrey L. Freudenberg, City Clerk & Treasurer of Bisbee, which goes thus:

"Dear Mr. Coffee: Enclosed please find the two tokens that you requested. These tokens were originally used by the Traildust Town Zoo. It was a privately owned Zoo in the general locale of Bisbee. The Zoo closed about the time the Mine Tour was to open so the City purchased them and had them counter stamped. The tokens are used to pay for the Mine Tour. The large one is used for the underground tour while the smaller one is used for the bus tour of the Phelps Dodge Mining site. The tokens are still in use and they initially were placed in use February 1, 1978."

The tokens are described as follows:

- TRAIL DUST / 50 / (AZTEC TYPE EAGLE) / GOLD
(COUNTERSTAMPED "QUEEN MINE")
- B 31 Sd Chief / (Indian head and cactus) / Wampum
- TRAIL DUST / 1 / (AZTEC TYPE EAGLE) / GOLD
(COUNTERSTAMPED "QUEEN MINE")
- B 39 Sd Chief / (Indian head and cactus) / Wampum

It would appear that the smaller of the tokens, used for a bus tour, is definitely a transportation token. The larger one may be for a walking tour, and not to ride on anything, so whether or not it would be a listable transportation token is uncertain.

The tokens sell for \$5.00 for the pair (\$3.50 for the 39mm; \$1.50 for the 31mm). They may be ordered from Mr. Freudenberg at his office: 118 Arizona Street - Bisbee, AZ 85603. I don't know how many he has or how long he will honor requests, but I am sure of one thing: these won't be handled by Nicolosi's New Issues Service.

Mr. Miller was one of the earliest bus operators in Canton, Ohio. In 1915 Mr. Miller started a jitney bus line. His route was from the square of Canton North on Market Avenue to 12th Street north; east on 12th to Maple Avenue; north on Maple to the end of the street, somewhere near the present 24th or 25th streets; then a return trip to the square after a turn around. This particular area of Canton had no streetcar service. Mr. Miller's operation proved successful because shortly Mr. Miller purchased a Studebaker truck chassis with a streetcar style body to run his route.

City directories show Mr. Miller as a jitney driver, chauffeur, taxi driver, from 1916 to 1921. After 1921 Mr. Miller is listed as the proprietor of Miller's Garage. In 1923 to 1926 the directories indicate Miller as proprietor of Miller's Garage and A.J. Miller Transit Company at 1730 Olive Place, N.E. Both businesses are at the same address, which would be about two-thirds along the route distance, about a block west of actual operation. In 1924 we see Miller incorporated as Buckeye Coach Company with a capital of \$50,000. He is listed as president and general manager. Between 1924 and 1928 Miller apparently operated some lines under Buckeye Coach Company, which was an intercity line from Canton to Ravenna, Ohio.

In 1928 Mr. Miller, as Buckeye Coach, operated three lines in Canton; the original 12th Street and Maple Avenue line; 9th Street and Dueber Avenue; 15th Street and Harrison Avenue, S.W. The Dueber Avenue line used Ohio 125 B, and operated from the square of Canton, west on Tuscarawas Street, south on Dueber Avenue to the end of the street. Return was north on Dueber Avenue to 9th Street, S.W., east to Market Avenue, north to the square. This line would have passed Dueber-Hampden Watch Company, Timken Roller Bearing Company, and the Canton Axle Works and Canton Stoker Company. These would have been the largest industries in town. The Northern Ohio Traction & Light Co. did not directly service this area either; and on the square connections could have been made with N.O.T. & L. or other bus lines. The 15th Street and Harrison Avenue line operated: south on Market to 15th, west to Harrison Avenue, south to the end of the street. This would have served the steel mill of Timken Roller Bearing; U.S. Steel Roll and Machine Works, and United Alloy Steel.

In my research I found Mr. Miller's garage operation was not unusual to early bus operation. Many early operators ran garages, auto liverys, and were car or truck dealers. These lines of work would be natural combinations. A truck sales operation had free advertising for the truck chassis. My feeling is that the garage was a fill-in for operating buses only when service was needed--starting time at the offices, shift changes, office closing time and early shoppers.

It is interesting that Miller's Buckeye Coach Company was right across the street from my house at 1025 10th Street, N.W. The building is two storeys high on my side--11th Street, N.W., and one storey on the 10th Street side. On the 11th Street side Mr. Miller and Mr. Carl Porter operated McKinley Monument Bus Line. Several other local bus operations were liveried here also.

In 1930 Mr. Miller and all other independent operators formed Canton Motor Coach Company. Prior to that date all bus operations required only a license from the City. In 1930 the bus operations were by City Council ordinance and with an expiration date.

Fare rates are uncertain. Many say 7¢ cash or 4 tokens for 25¢. Others say 6 tokens for 35¢ or 6¢ cash. The 35¢ fare would be most likely correct as the value of 125 A was at this level. Some say token use only, but this is doubtful. The 125 C was ordered by Mr. Miller but never used because of his participation in forming Canton Motor Coach Company.

= DELAWARE VALLEY GROUP TO MEET AT TROLLEY MUSEUM =

The members and families of the Delaware Valley Vecturist Association have made plans to hold their June 29, 1980, meeting at the trolley museum of Railways to Yesterday, Inc., at Rockhill Furnace, PA, which is also home of the narrow gauge East Broad Top Railroad. A special invitation is being extended to all members of the A.V.A. to attend this special outing.

Activities will begin at 10 a.m. when the steam locomotive leaves the roundhouse and begins to make up the train for the day's operation. A chance to photograph live steam in action! The special ALL DAY TROLLEY TICKET will provide unlimited trolley riding over the Shade Gap Electric Railway trolley line. Several different types of cars will be operated for our special group. Tours of the old railroad car shop, not open to the public, are included along with an inspection tour of the roundhouse, home to six narrow gauge Mikados (2-8-2). The trolley museum building will be open and a special tour of the carbarn is planned.

The meeting and token swapping session will be held on board Chicago, Aurora & Elgin interurban trolley #315, a product of the Kuhlman Car Co., built in 1909. This car will be operated several times during the day. Another highlight of the day will be the operation of the open summer car #1875, a double-truck 13-bench trolley.

Once everyone has arrived we shall board the East Broad Top steam train for a ten-mile round trip to Colgate Grove.

Tokens of the Shade Gap Electric Railway (PA 815 A) will be available for purchase.

The price for this one-day of trolleys and steam train railroading is \$7.75 per person. Send your reservation and check (made payable to Delaware Valley Vecturist Assn.) to David W. Biles - 2054 South Delaware St. - Allentown, PA 18103, and please enclose a stamped self-addressed envelope for your tickets and information brochure.

The East Broad Top Railroad and the trolley museum are only 25 minutes north of the Pennsylvania Turnpike exits 13 and 14. There is no public transportation available to this area. Rockhill Furnace is located about 60 miles west of Harrisburg.

There will also be a chance for a few AVA members to try their hand at operating a streetcar!

AVA-DVVA members Doug Peters and Dave Biles will be the guides for the day. Plan now to attend and get your reservations in now.

Light lunch facilities are available at the EBT station and a local restaurant offers good dinners.

= NOTES FROM THE DELAWARE VALLEY =
By Bill Lonney

The sunny skies and warm temperatures of March 9 brought out a good crowd for the Delaware Valley Vecturist Association meeting at Fort Washington, Pa. Those in attendance were DiMichael, Pernicano, Ciecka, Zaika, DeGregorio, Streeter, Bergey, Boscia, Donahue, Peters, Goeller, and Lonney. After an hour and a half of hectic trading and boisterous socializing, Joe Pernicano called a temporary halt to the activities in order to establish dates for future events.

The future events are as follows: May 4 will be our next regular meeting of DVVA; June 6,7,8 are now set aside for our 4th Annual Token & Medal Show to be held in the Philadelphia Sheraton; and June 29 will be a special trip/meeting to the trolley museum as described at the top of this page.

As usual, all vecturists, collectors of exonomia, and friends, are encouraged to join us in our meetings and activities.

= THE HERMAN TOTT BUS LINE OF ORANGE CITY, IOWA =

A while back Lester Burzinski of Madison, Wisconsin, discovered an unlisted depot token from Orange City, IA. The token is somewhat corroded, apparently having been buried in the ground and then disinterred. The token is described thus,

HERMAN TOTT / BUS / LINE / ORANGE CITY / IOWA
 A 31 Sd Good For / One / Return Trip / Not Good On Freight / Trains

That part about not being good on freight trains must indicate a certain sense of humor on the part of Mr. Tott.

In any case, Les wrote to Bob Coney in Sioux City and asked him if he could assist in learning something about Herman Tott. Back came good results. Bob's letter follows,

"Bill Tott called me last night and gave me some very interesting data. He talked to his father who is 90 years old and was very excited about the token. Mr. Hubert, father of Bill and son of Herman, remembers very well the tokens and use. They were used from the depot to the postoffice from about 1890 to around 1905. It was a horse-drawn hack, and extra horses had to be used during bad and muddy weather. It carried mail and passengers and also at times went to Alton, Iowa, about 4 miles. After about 1900 Herman's son George took over the line. Tokens sold for 5¢ or 6 for 25¢. Some Totts still live in Orange City. Herman moved to Sioux City around 1915."

Bob Coney added that Orange City was founded by people from Holland, and is famous for its tulip festival.

= A NEW WELFARE BUS TOKEN FROM ROCHESTER, NEW YORK =

Doug Borden reports a new token exactly like NY 780 K, but with reversed coloring. The 780 K is a black token with yellow lettering. The new token, which will be listed as 780 N, is a yellow token with black lettering. Otherwise it's exactly like 780 K.

The new token was placed in use February 4, 1980, valid for a 60¢ fare, with use restricted to "special clients of the Social Services Department (welfare)." There were 2,600 struck, and the new 780 N is used concurrently with the older 780 K and M, which are still valid but "nobody ever sees any of them," says Doug. This new token, like K and M, will not be available from the New Issues Service, and neither bus company nor the welfare department in Rochester will even answer requests for them. These tokens are very difficult to come by.

Incidentally, Mr. Borden added that the school token, 780 L, is used by high school students until 4 pm for a 50¢ fare; 780 J is used after 4 pm as a 52¢ fare. "It doesn't make much sense to me," he adds. "But most fares don't."

-March 1980

= CROSSTOWN EXPRESS, INC. - UNIDENTIFIED 4 AND 5 =
By J.M. Coffee

In the old records of Meyer & Wenthe, there is an enigmatic reference to an order for two tokens to be delivered to the Atlanta Safety Bus Company, at 60 Houston Street in Atlanta, Georgia. The two tokens were 5,000 white metal, and 3,000 bronze, both 23mm, but the inscriptions and center devices are not mentioned in the order, which is dated in 1924.

Immediately I suspected that these two 23mm tokens were our Unidentified #4 and #5, which have for years been of unknown origin. I have now confirmed Atlanta as the origin of these tokens.

Just received in today's mail is Volume II of *Mule to MARTA*, by Jean Martin, a history of public transportation in Atlanta. In this book on page 156 we are informed that "Crosstown Express was a jitney enterprise which had operated in Sylvan Hills and Morningside until run out of business by the jitney ordinance passed the month before," i.e., passed in February, 1925. The order date for the tokens, 1924, and the "run out of business" date, 1925, help explain the relative scarcity of these tokens, especially the bronze one which probably is a census token.

But there is more. On page 151 of the book, beneath a photograph of an ancient bus, we find the following additional information about Crosstown Express:

[In 1925] street railway business in Atlanta was at its crest, but the automobile showed unmistakable signs of making inroads on streetcar patronage and earnings; and the Georgia Railway & Power Company... discontinued the policy of building street railway lines, except in the case of a few extensions, and adopted the policy of meeting future transportation needs by bus rather than by additional rail lines. In March, 1925, under terms of settlement of the jitney problem, Georgia Railway & Power Company had purchased ten motor buses from the Crosstown Express Company, which had been furnishing an unregulated bus service of a sort in the southeastern section of the city...

Incidentally the two-volume history of Atlanta public transportation is really excellent, full of photographs and references to firms which issued Atlanta tokens. Volume II is available for \$7.00 postpaid from the Atlanta Historical Society at P.O. Box 12423 - Atlanta, GA 30305. I would assume that Volume I is still also available at the same price, but cannot be certain. A third volume, to complete the work, will be ready by the end of the year.

= THE FEBRUARY ISSUE OF THE FARE BOX =

Last month we got our wires crossed, and the list of those who had not paid their AVA dues for 1980 was much larger, as I received it from our Secretary, than it actually was. This was because quite a few of our members paid their dues close to the deadline, with the result that I pulled their address plates, and they did not receive their copies of the February Fare Box. I also cut the press run for the February issue by 100 copies, thinking we had lost that many members.

It now turns out that about 50 members who did pay their dues have not yet received their February issues. I only have about 20 copies left, and this poses a problem. Fortunately, AVA President Joel Reznick has access to a plain paper copier, so after my 20 extra copies are exhausted, Joel will run off copies, on both sides of the page just like The Fare Box, and send these to you.

Now, if you did not receive the February issue, please drop me a note and let me know. Our records are, for the moment, in such a state that I don't know for sure who got that issue and who didn't. So drop me a note (to Boston) and I'll send you the February issue. First 20 requests will get the originals; the rest will get copies from Joel. But everybody will get the issue who wants it.

27th SUPPLEMENT TO THE CAR WASH TOKEN CATALOGUE

ILLINOIS: NORTHBROOK 630 (Reported by Canfield and Super)

- A Pw 39 Sd (blank)(gold lettering on obv.) .50
NIEMANN'S SHELL CAR WASH 1
- B Pr 39 Sd (blank)(gold lettering on obv.) .50

- 103 WM 28 Sd (blank)
DON URBAN FORD MERCURY ONE CAR WASH
- 104 B 25 Sd (same as obv.)

Add varieties to the following:

- CA 375 A (Obv.: distance C of CAR to 3)
 - a. 1mm 1M struck 11/28/66
 - b. 3/4mm 1M struck 12/1/72
- UNID. 55
 - a. toothed border, MOBIL 17mm
 - b. plain border, MOBIL 18mm

Notes regarding the above issues:

Re. IL 630 issues, specimens have been obtained by writing Niemann's Shell, Waukegan Rd. 60062

I have a duplicate of CA 375 Aa which I would trade for a specimen of CA 375 Ab.

English listings will be published later this year. Don Capper is working with me on how to classify the sixty plus known issues and varieties. Values will be higher than current US listings since cost of living and inflation factors are higher in the United Kingdom.

= NOTES BY HAROLD V. FORD =

The American Numismatic Association issued another metallic fare pass, this time for their midyear convention. The passes were distributed to all who registered for the closing night banquet. The headquarters hotel for the convention was the Albuquerque Convention Center. However, since that place did not have adequate banquet facilities the Albuquerque Hilton hosted the banquet, and this was about five miles from the Convention Center. Thus only those who signed up for the banquet were eligible to receive one of these passes. Anyone who is a member of the A.N.A. who would like to get one of these passes may obtain it in return for a \$5.00 building fund donation. Write ANA Building Fund - P.O. Box 2366 - Colorado Springs, CO 80901, and specifically request the Albuquerque Road Runner Pass.

Incidentally I note that when we listed MO 999 A we listed "Italy" on the reverse as being (incuse). It isn't. So delete (incused) for MO 999 A reverse.

Bob Kelley sent me the PA listing for verification. Copper it is! This is indeed an unusual issue as the listed regular issue, PA 850 C, was placed into circulation in 1947. Meyer & Wenthe records show 300,000 initially struck plus three additional orders to make a grand total of 450,000. I don't know of any other Meyer & Wenthe pattern issue struck in copper for the post World War II era.

Which reminds me: If you believe you have a new listing that is the same as an existing listing but of a different metal, you must submit the actual token for verification. I've received ten specimens for verification during the past year and nine turned out to be plated including the PI 500 D in zinc which Mr. Coffee mentioned in The Fare Box several months back.

The new Waco listing seems to be a companion issue to TX 950 B. At least two depots are known to have existed in Waco in the old days: the KATY and the H & TC. The owner of this new listing reports the color is a red orange; the specimen is very worn, indicating considerable usage.

I am interested in knowing who owns Alberta 800 A,B,C, and the source of the specimens if not via a trade with another collector, before we relist them from Binghamton, NY. I own all three specimens but they were obtained by purchase of collections so I cannot ascertain their original source. Alberta 800 A is possible underlined census as I only know of two of them, according to Freiberg's and my files.

Would the owner of Unidentified #158 please send me a rubbing, since the Freiberg files lack verification. I question this listing since it is similar to Unid. #70 but with H.G.R. CO. instead of M.H.G.R. CO. Size of issue is also questioned. Unid. #70 was initially listed as 21mm (I have one which measures 22.49mm) and Unid. #158 was listed as 31mm and not verified by a member of the Catalogue Committee.

As of this date I have not received verification that Unidentified #32 exists in aluminum, so it will be deleted in the 4th edition of Atwood's Catalogue and relisted as a brass issue.

Another listing is questionable. The person we thought owned NY 875 AB does not own it. If someone does own this token would he please send the token to me for verification. Otherwise it will be dropped from the next catalogue.

Several mistakes have been made in publication of my notes in the past several months. On page 151, November 1979, the issue in question should have been described:

COLONIAL R.R. / MARTINS / FERRY / OHIO
A 20 Sd Good For / 5¢ / in Trade

This token is similar to OH 515 B about which we do have some doubt as to whether it is a legitimate transportation token.

In the February 1980 issue on page 20 my remarks about the two Thetford Mines, PQ, issues were intended to be as follows: Since Gene Godsoe is at a disadvantage in researching these issues we would appreciate information regarding their availability, how and when used, etc., before listing them, from someone near the source. Could one of our Canadian members check these issues out and, we hope, obtain specimens for the New Issues Service and for others interested?

The editor phoned me just before typing the February issue and I mentioned that we had a Quebec new issue in the works that J. Douglas Ferguson confirmed would be available. It is from another city in Quebec (which will be listed when N.I.S. receives specimens) and, unfortunately our Editor interpreted my remarks on the phone as referring to the Thetford Mines issues and altered my copy. So we still would appreciate research on the Thetford Mines issues before listing them.

- MARCH NEW ISSUES SERVICE REPORT -
By John G. Nicolosi

This have begun to slow down again, for the moment, but as promised last month I shall be sending you the two Minnesota Zoological Gardens tokens, MN 65 A B. I had expected to have a couple others to send along, but as they haven't shown up yet I'll send these off to you now. I hope I'll have the others for the April sendings.

There are a number of other tokens in the works. We seem to have a run on tokens at times, either too many to send in one sending, or then again none at all. It is either feast or famine, but sooner or later we get them. We just bide our time, and with a little patience it all works out in the end.

Some of our newer AVA members have been writing me asking about how to become members of the New Issues Service. First just drop me a card asking to be put on the Waiting List. Then when it's your turn you will be notified as to what to do. As this takes time I suggest you take advantage of my ads in The Fare Box to keep up with the new issues, until you become a member of NIS.

Thanks again to Tex, Quincy, and Joel for the assistance in obtaining the Zoo tokens listed above.

- NY 630 AT TO BE PUT INTO USE -

The New York City Transit Authority, at the moment afflicted by a strike, has announced that 630 AS will be pulled out of use in the event of a fare increase, and replaced by 630 AT. The fare increase is almost inevitable, and riders were hoarding quantities of AS in anticipation. The 630 AT was struck in 1975 for the 50¢ fare but then not used after all. 35,000,000 of AT were struck in 1975. AT is approximately 22mm, solid instead of Y-sc, and thinner than AS.

= SUPPLEMENT H-4 FEISEL'S CATALOGUE OF PARKING TOKENS =
By James H. Hall

When you report new listings, give the exact wording, size and metal of the token. A clear rubbing or photograph is helpful. If at all possible, send the token; I will return the piece as soon as I get the necessary information from it. Currently, I am holding over 100 submissions for lack of adequate information necessary to list the token, and am in the process of attempting to contact the submitter, or the issuer, in order to be able to list the tokens.

Volume 34, Number 4

APRIL, 1980

Our 394th Issue

April 30. A smaller issue this month, only 3 weeks after the last one. The schedule for the rest of the Spring, until I leave for the West Coast, will be tight: May issue will be mailed May 25 (closing date May 17); June issue will be mailed on June 8 (closing date May 31); July issue will be mailed June 22 (closing date June 14).

The A.V.A. Secretary, Donald Mazeau, has moved out of Clinton, Connecticut. His new address is given on the last page of this issue. Please, if you have any application blanks with his Clinton address on them, cross out that address and type in the new Old Saybrook address. This is extremely important for new members sending in applications. New blanks will be printed up this week.

I now have the full Prices Realized list for the Cunningham auction held at the big Chicago collectible show March 29/30. Iowa 590 B, \$40. NY 629 A, \$225 (I was wrong last issue when I said it brought only \$179); NY 629 B, \$715 (as indicated last month); Pa 765 S, \$51; Va 580 C, \$75; Wis 410 C, \$40; Ontario 400 A \$23; Mainz, Germany gate token, \$37; Greece 80 A (the Greek horsecar token) \$50; Mexico 540 A, \$9; Scovill Mfg. Co. sample card with tokens, \$18.50; another Scovill card, a diff. one, \$6.50; the NEVA booklet Salesmen's Samples of Transportation Tokens, including 4 token samples as issued, \$5.85.

Jim Hemphill, who is running the A.V.A. Convention Auction this year at Winnipeg, would like some more tokens submitted for that auction. But only obsolete tokens, and they should be in paper 2x2 holders (not plastic flips). So far he has 169 tokens for the auction, but we'd like to have more good tokens. His address is P.O. Box 1321 Lake Oswego, Oregon 97034.

Foster Palmer suggests, in a postcard, that the inscription "Not Good on Freight Trains" on the Orange City, IA, token described last month might not be just humor on the part of Mr. Tott. "Might this mean," he asks, "that the bus would not make a depot trip to connect with a freight train, even though such trains on occasion did carry (male) passengers in the caboose?" I'm sure Foster has the correct version.

New member Rafael Cappiello of St. Louis writes about Valley Park, since a token with that on it was described last month. He says there is a Valley Park about 20 miles from downtown St. Louis. So maybe that's where that token was used.

Barry Uman has a 39mm brass solid token inscribed in incuse letters: CHEMIN DE FER / L'ASSOMPTION / 25¢ - on obverse, with blank reverse. "Chemin de fer" means railroad in French, but it's also the name of a card game. Does anyone have any idea about this item?

= MORE ON THE QUEEN MINE TOUR TOKENS OF BISBEE, ARIZONA =
By J.P. Lawton

The Open Pit Tour is conducted on what I believe is an old Blue Bird school bus. This tour includes a tour of the Open Pit Mine and associate crusher buildings.

The Underground Mine Tour is a very fascinating side trip while you are in Arizona. Prior to beginning the tour each person dresses in a yellow slicker type jacket and miner's helmet with head lamp. The tour begins by walking about 2,500 feet into the mountain using an original tunnel. Along the way, it is explained (by tour guides who spent the better part of their lives working underground) about the use of drills, explosives, and shoring methods (i.e., holding up the roof with lumber). The tour includes a side trip into a stope (a large ore body which, when mined, leaves a large cavity in the mountain). The tour ends with a ride back to the starting point on a mine train.

= JUNE TOKEN AND MEDAL SHOW IN PHILADELPHIA =

The fourth annual token and medal show, sponsored by the Delaware Valley Vecturist Association, will be held in the Sheraton Hotel, 1725 Kennedy Blvd., in Philadelphia, Pa., on June 7 and 8, 1980. Many prominent token and medal dealers will be in attendance, with an offering of a great variety of exnumia. Another outstanding auction will be conducted by A.V.A. member Joe Levine's Presidential Coin & Antique Co. on June 7 at 7 p.m.

The Bank Token Society will hold their annual meeting in conjunction with the Token & Medal Show, at 3 p.m. on June 7 in the bourse area.

Further details can be obtained from Al Zaika - P.O. Box 65 - Bellmawr, NJ 08031.

THE BATS GATHERING

At the April 13 meeting of the Bay Area Token Society an innovation highlighted the gathering. Members brought ten of their surplus tokens to the meeting and a drawing was held for the entire lot. The drawing was won this time by Bud Carmichael.

It was decided to cancel the May meeting because it coincided with Mothers Day, so the next meeting will be June 8.

Members present at the April meeting were President Duane Feisel, and Spofford, Nicholls, Nelson, Weiglin, Hanson, Bail, A. Johnson, and Carmichael.

= PERSONAL TOKENS =
By Bud Carmichael

The collecting of personal tokens has become a popular section of our collecting hobby. I personally have four albums filled with these connecting links to AVA members, and through some of the correspondence involved have added a number of pieces to my transportation token collection.

I would like to suggest, however, that members trading personals identify the tokens being traded by catalogue number (member number and A or B or C, etc.). Personals are being added so rapidly that the original catalogue is practically worthless and it is difficult to keep up with the new additions. I have several in my collection that I have not been able to identify as they have not yet appeared in The Fare Box.

Listing your personals is easy. Just send one to Fare Box Editor John Coffee and he will list it with the new personals.

= THE WHITE BUS LINE: NY 80 M =
By Gary Pipher

Edward J. Dorey first shows up in Binghamton, NY, city directories in 1917 as the owner of the Reliable Trucking Company at 64 Chenango Street. He is not listed in previous years' directories. He remained with the firm until 1919 when he moved to 65 Collier Street. From 1920 until 1922 he is listed as Auto Bus. I assume this is a driver. In 1923 he is listed as a bus line owner. In 1924 he worked for Lawrence A. Watters Bus Line at 5 Warren Street.

Finally in 1925 Mr. Dorey is listed as the president of the White Bus Line, which issued the token. C.E. Roberts of Montrose, PA, was vice president, and Dorey's wife Myrtle is listed as the secretary-treasurer. The bus line was located at 112 Court Street in Binghamton. Court Street and Chenango Street are the main streets in downtown Binghamton and lead everywhere. The bus line moved to 81 Chenango Street in 1927. It would remain at various locations on Chenango Street until 1947 and 1948.

The year 1928 was when C.E. Roberts took over as president, and Dorey no longer worked for the company. He is listed as a chauffeur in the 1928 Directory. In 1929 Dorey is again running a bus line, which is called the Dorey Bus Line. I've never seen tokens from this line. The line was located at 21 Hawley Street. From 1930 to 1934 Dorey is listed as auto bus again. In 1935 he became a driver for the Triple Cities Traction Company of Binghamton. He later became a salesman. His last years were spent as a steward (custodian) for American Legion Post 80. In 1953 we find the last listing for Dorey or his wife Myrtle.

The last listing of C.E. Roberts is in the 1947 Directory. He was president of the line until then.

I have not found any bus schedules for the lines owned by Dorey. However I do have checks from the White Bus Line signed by Myrtle with WHITE BUS LINE / EDWARD J. DOREY, PROP. and WHITE BUS LINE / BINGHAMTON TO MONTROSE / E.J. DOREY & C.E. ROBERTS PROPS. as the address. These form part of a puzzle of events on this bus line.

The city directories show that E.J. Dorey was the owner of the White Bus Line from 1925 to 1927. The checks, on the other hand, have Mr. Dorey owning the firm from 1923. I have to say that the tokens were used from 1923 to 1927.

There are tokens listed under Alberta, Canada, for the White Bus Line. I believe these are really from Binghamton, NY. I obtained the Alberta 800 A at our local coin club here. The 800 A is the same type as the 800 B and C.

= APRIL NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

Some more nice issues coming your way this month. First Mo 860 I, which is the 860 H with a gold plating for use by merchants, and 860 J, a sesquicentennial token which is a bit different from the usual run of tokens. You will also receive OH 860 S. We had no address on this one so asked Joel Reznick, who got busy on the phone and made arrangements for us to get a supply of all 3 of these tokens. Thanks again, Joel, I wish I knew of other ways to thank you also, for your continuing efforts on our behalf (AVA as well as NIS).

For those of you who collect Canada (and I haven't had any Canadian new issues for quite a spell) you will receive the Que 850 I. First my sincere thanks to Doug Ferguson, and then to his personal friend in Sherbrooke, Mr. Freeman Clowery, who made arrangements with Mr. Lucien Bolduc, manager of the municipal transport of Sherbrooke, who personally packaged the tokens and sent them to me here in Oakland. This formerly privately owned line has been taken over by the City, and this is why we have the new token. Thank you one and all, Gentlemen.

Next month looks very promising, so please keep your accounts in the black because if you don't have sufficient funds for the current month's new issues you won't get them. There are too many now with low or debit accounts. Remember these new tokens have higher face values, so it takes more frequent deposits with us for you to keep even.

AF B 22 Sd (Like 745 P)

The Bisbee, AZ, listing was mentioned on page 30 of last month's issue. The New Issues Service will not handle this one.

The Crosstown Express, Inc., listings were mentioned on page 34 of last month's issue. I know that GA 60 Z is not census, but 60 AA may be. Would owners of the bronze token send me a note and a rubbing of their token?

New Albany Street Railroad Co. operated between 1894 and 1903. Now we have a third listing from this era. IN 680 E was probably used before 680 A. The owner of this token lived in southern Indiana for many years dealing in coins, stamps, and antiques before retiring down South. A nice discovery reported by a new member!

The Orange City, IA, listing was also mentioned and pictured in last month's issue. See page 33 for historical background.

We noticed a classified ad in a recent COIN WORLD offering the sesquicentennial token from Springfield, Mo. Joel Reznick checked and learned that since the last token was issued in 1949, Springfield had plated 10,000 of 860 H. The plated issues were used for six months in 1979. They were distributed by downtown merchants to encourage people to ride the bus into the downtown area. 100,000 of the sesquicentennial tokens were struck and City Utilities sold them only in the latter part of 1979 on their buses and at their office.

The new token from Rochester, NY, is similar to NY 780 K and M but is a change of color in the plastic and printing. Like the other issues this one is distributed to special clients of the welfare department. The New Issues Service cannot obtain a supply of this issue, as was the story on the other issues. See page 33 of last month's issue for additional comments.

The Waterfront Electric Railway operates a one-mile trolley line. A passenger pays \$1 for a token, shows it when entering the trolley as proof of payment, and gets to keep it. This is also how the AVA issues and uses its convention tour tokens.

Albany, NY, is ordering new tokens and the listed pattern from Washington was one of the tokens submitted by Meyer & Wenthe as a sample of their product. It is the same as WA 40 K I J but bronze. I thank Ron Etchells for submitted the specimen for verification.

The Unidentified listing has the die work that Steiner E. & B. Co. of St. Louis used.

Alan Weighell submitted the two pattern listings from Ontario for verification since they are similar to listed tokens. These are the first sandwich type tokens (like U.S. current coinage) of the U.S. or Canada that we have seen in transportation tokens, although there are some sandwich vulcanites from Latin America. They were struck by the Sherritt Gordon Mint.

Sherbrooke, Quebec, is now a municipal operation. The 850 I is sold at the rate of \$5.00 for an envelope containing ten tokens. Hence there is no discount inasmuch as the adult fare is 50¢. Tokens are sold by many local merchants throughout the city. Student fare is 35¢ and senior citizen is 25¢. No tokens have been issued for these latter groups so far, however.

= REMEMBER THE 1980 A.V.A. CONVENTION AT WINNIPEG: AUGUST 8-10 =

= SUPPLEMENT H-5 TO FEISEL'S CATALOGUE OF PARKING TOKENS =
By James H. Hall

I currently have a number of listings of new metals for existing tokens that cannot be published. Often when a token exists in brass another variety will surface in either bronze or copper. Brass, bronze and copper can tone to the point that the three metals are practically undistinguishable. When such a variety appears, I will not publish it until the piece is sent to me for a metal check. All such tokens should be sent SASE before I will consider listing the piece. Duane Feisel and Hal Ford have informed me that many reported tokens were sent in as new pieces were actually tarnished tokens discovered and mistakenly identified as "new metals". I am adopting the policy that any such listings will be published only after I have received the token and had a chance to verify the metal variety.

= NEW FINDS =

There's a bit more action in this department as the snow melts and people start digging again. David Schenkman picked up Iowa 880 A, so rare that we only had a rubbing to prove its existence and didn't know where the rubbing came from. He also picked up the second known Wis 870 H (see June 1979 Fare Box for article about it).

Steve Tanenbaum has a token exactly like Ind 930 A, except that his is green celluloid instead of yellow! Sounds like a beauty.

Ben Odesser picked up a token that is WM 23 Sd with FUNWAY FREEWAY NOT NEGOTIABLE on both sides. I doubt if it's transportation. Any ideas?

George Gould picked up a token just like Alaska 900 B, but in aluminum! A pattern, almost certainly.

Marie Johnson picked up a token that is B 25 Sd with STIVER'S LIVERY on obv., and AUTO SERVICE 25 on reverse. Quite possibly a transportation token, but then, "auto service" might be for something besides transportation. Found in Bowling Green, Kentucky.

MAY, 1980

Our 395th Issue

BERNARD J. ROHRER

Bernard J. Rohrer, AVA #252, of Long Beach, California, died April 13. He joined us back in December, 1957, when he was 43 years of age. I first met him at our Santa Monica Convention in August, 1958, where he was of great assistance to us in drawing up our present Constitution & By-Laws. Bernard was friendly, helpful, outgoing, and delightful to be with. An avid stamp collector as well as token collector, he was prominent and popular in more circles than our own. Accordingly he is survived by a plethora of friends who join us in sharing our loss.

May 21. The June issue will be mailed on June 8, and all material for that issue should be in Boston by May 31. So we are on a tight schedule until I leave for the West Coast on June 30.

Inside this issue you will find a one-page list of tokens of which there are supposed to be die varieties, but of which no such die varieties have been found. It would be much appreciated by Gene Godsoe, who is working on our comprehensive Varieties Catalogue, if you would check over this list and describe (and send rubbings of) any die varieties you have of these tokens. Send them directly to Gene Godsoe at Western Electric Co. Engr - COMNAVOFR JAPAN N34 - FPO Seattle, Wash. 98762. Gene is in Japan but a 15¢ stamp, on an envelope with this address, will reach him by airmail.

Last month we reported a 39mm brass token inscribed CHEMIN DE FER L'ASSOMPTION 25¢ on obverse, with blank reverse. Correspondence recently received indicates that not only this token, but a number of similar tokens, all 39mm brass, with such inscriptions as "South Eastern R'y 1886 Full Fare" and "Ride All Lines Employees 1902" with various railroad names--all of them are probably modern-made fantasies. So anything with a blank reverse, 39mm brass with incuse letters, handle it with caution.

Also in the last issue, on page 52, we reported that Ben Odesser had picked up a 23mm WM token inscribed FUNWAY FREEWAY NOT NEGOTIABLE. Al Zaika writes that this token "is currently in use at an amusement machine arcade that is located at the Echelon Shopping Mall, Voorhees, N.J. The tokens are dispensed from a change making machine (4 for \$1) and are used to play the various machines." Jerome Shaeper writes that this token "is an amusement token currently being used in the penny arcade area of various shopping malls in the Cincinnati, OH, area. The tokens are dispensed from a machine that looks very similar to the dollar bill changers seen in vending machine

areas. Four tokens are dispensed upon insertion of a \$1 bill, and are used in pin-ball machines and other amusement games." So that problem was quickly solved for us. Mr. Schaeper goes on to describe an item he recently acquired. It is engraved on a 19th Century Mexican silver coin with a broken pin attachment on reverse: L. MERRICK / (RULER & COMPASS) / CONDUCTOR / D. & M. R.R. He would like to know if any member can furnish the name and location of the D. & M. Railroad.

Roy Nulph writes that he and Bob Harris have been doing research on Utah 800 A (Sunnyside) issued by Utah Fuel Company. "Seems it was used by the employees of the Sunnyside Coal Mine, to ride in the passenger car attached to the coal hauling train, to and from the work site, each day from the small town of Sunnyside. The train was operated by the Denver & Rio Grande RR, off of a spur in Price, Utah," he writes.

A note from Barry Uman informs us of some recent prices realized, these from the last TOREX auction, March 20-23, 1980: (prices in Canadian dollars I presume) Quebec 620 B, \$275; 620 H \$140; 620 L \$160. A set of Breton 546-577 (silver proofs) went for \$4,400.00. He adds that "At the recent St. Hyacinthe Coin Show at St. Hyacinthe, Quebec, I purchased a lot of a dozen tokens for \$29. It included a rare Que 745 E and a scarce NY 630 La that differs from the one pictured in Atwood. This proves that bargains can be found if one looks and known one's tokens."

Yosef Sa'ar writes from Elat, Israel (in response to my rebuke to him for not renewing his membership--he had completely forgotten about it) that "The La Chaux-de-Fonds, Switzerland, tramway token reported on page 8/1980, brings up another item I have indexed from the same city. The November, 1911, issue of *Revue Suisse de Numismatique* reports a brass "8" denomination tram token in the local museum. However, upon investigation a few years ago, the Musee La-Chaux-de-Fonds wrote that they could not locate any such token. Perhaps THE FARE BOX should make a record of this report."

We have just learned via the grapevine that an AVA member has been the very fortunate acquirer of four of the rare Md 60 F token (Granniss & Taylor omnibus with "Taylor" counterstamp). This makes the counterstamped token less rare than the uncounterstamped token.

George Cuhaj reports that so many of the NY 630 AS are being hoarded in anticipation of a New York subway fare increase, that the Diamond Jubilee tokens are now "very prevalent...most of those now in use were in storage. It was a good thing that the transit authority had a bunch of the new tokens to hold them over." He adds bad news about the white metal Diamond Jubilee tokens. The white metal tokens "are to be sent back to Osborne to be melted down." Only in New York do they have that kind of mentality. George adds that they will keep the "proof brass" diamond jubilee tokens, for now. There is also, he adds, a 14k gold token, similar to 630 AO and AS, now for sale. The 16mm token is for sale at \$75; the 23mm for \$125. Mintage figures were 125 of the 16mm and 90 of the 23mm. As these items are strictly jewelry, they will not be listed in Atwood, even under presentation pieces. However any member who is interested in buying them may write George for details. Frankly I'm getting tired of New York's token hanky-panky: solid gold tokens, off metal commemoratives struck and then melted; other tokens made but hoarded; not being candid with the public about what tokens will be used with respect to fare increases.

George Gould reports that, when he was living in Butte, Montana, he did some research on Unidentified #96, 97, and 147. These three merry-go-round tokens, he discovered, were used in Butte. We had suspected this because one of them (147) bears the name of a Butte token manufacturer. Seems that Mr. Lucado was a carriage maker, listed in a Butte city directory in 1904, and was associated with Knowlton and Newman in the Columbia Gardens, where a merry-go-round was operated by them from about 1900 to 1923. Two of these tokens are pictured in the Atwood Catalogue.

Hong Kong has opened its new subway system, and they use plastic reusable credit-card size tickets. The oxide back of the ticket carries an artist's drawing of the new subway train and "TRAINS SUPPLIED BY METRO-CAMMELL TICKETS BY DIA NIPPON PRINTING CO., LTD." They also issued a special souvenir ticket for opening day, September 30, 1979 in gray with red, white, and blue bands, inscribed "Hong Kong Mass Transit Railway / Commemorative Ticket / Valid on Open Day - 30 September 1979. Issued subject to MTRC Regulations and By-laws." This information from *Timepoints*, of March 1980.

= NOMINATION FOR THE 1980 FARE BOX LITERARY AWARD =
By Roy D. Nulph

The chairman-moderator for the 1980 AVA Fare Box Literary Award for the Best Published Article in The Fare Box, requests the members of the Fare Box Literary Society (consisting of past winners) to send their suggestions for two articles published from the August 1979 issue thru the July 1980 issue. The article receiving the most nominations from society members will get the coveted award at our annual convention in Winnipeg on August 9. The award consists of the 1980 tour token struck in silver enclosed in a custom holder.

Closing date for the nominations is July 15. Nominations should be mailed to Roy D. Nulph - 7529 West Adams Road - Magna, Utah 84044.

= ULATCO NEWS AND DOINGS =

Members held an informal get together at the recently held Spring Garden and Home Festival at the Salt Palace in Salt Lake City. This was the third year that members displayed tokens, transportation items and other bits and pieces of Utah history at the show, sponsored by the Salt Lake Tribune and Utah Garden Clubs. Joining us this year were a few displays of coins and medals from members of the Utah Numismatic Society of which Harry Campbell is senior vice-president for 1980.

We had nearly 50 cases this year, almost double from 1979. Displaying for the four days were Campbell, Harris, LaVorgna, Freed, Housley, Kelsey, George and the two Nulphs. The latter two also had some hand-crafted leather items in a different section of the show.

In order to get the two Carson City convention tokens listed properly, the ULATCO group, as an organization, has joined the AVA. Our membership was listed in the April Fare Box as #1872. Therefore the two error tokens will be listed as personals 1872 A (NEV.) and 1872 B (NEW.)

The new plastic token issued by Bob Harris will be 1051 B according to President Joel Reznick, who is in the process of publishing a new up-to-date personal token catalogue with Jim Hemphill.

Harry Campbell has been burning the midnight oil working on his UTAH'S TOKENS book, which is about ready for publication. Watch for the ads in The Fare Box soon. The price will be well worth it!

AVA's youngest member, Chad Nulph #1847-J, received the Cub Scouts top honor award, the ARROW OF LIGHT, at his April pack meeting. Our congrats to him.

The next informal meeting of ULATCO will be in Ogden, Utah, on July 3 at 11:30 p.m. on the Union Station RR platform, to greet Editor John Coffee on his way west. All interested persons are invited to join us. Our next report will appear in the August issue.

= Roy D. Nulph

= NOTES FROM THE DELAWARE VALLEY by BILL LONNEY =

It's certainly nice to see old faces after two months but any local association such as ours can only grow as new faces appear. And new faces we had at our May 4 meeting of DVVA. Marc Cohen, AVA 1850, and Greg Mielke, AVA 1851, became members just by the act of showing up at Joe Pernicano's office. That's just how easy it is in the Delaware Valley. All of us could tell that these two were going to fit in perfectly with our group as they took to the good-natured banter and teasing about the fact that nothing characterizes you as a newcomer quicker than an unsoiled Atwood with white pages. The oldtimers who made up the bulk of our 15 in attendance included DIMichael, Paynter, DeGregorio, Boscia, Peters, Biles, Streeter, Gabsch, Zaika, Pernicano, Ciecka, Goeller, and Lonney. In addition we had one guest, Henry Lamburo plus four patient wives: Mrs. Goeller, Paynter, Gabsch and Lonney. If not much trading was done on this beautiful spring day there was certainly much anticipation of our upcoming 4th annual Token & Medal Show at Philadelphia. Look forward to seeing everyone there.

Y o A 25 Sd		Good For / One / Ride / From / Hotel to Depot	10.00

Four new issues for Amtour of San Francisco. Now there are eleven issues in the series since 1977. CA 760 S was distributed at several travel shows in Canada starting January, 1980. CA 760 T and U were first issued 3/20/80. 760 U is included in Amtour's travel packages when other tokens would be inappropriate. 760 V went on sale in April of this year at Ghirardelli Square. The die work indicates that the four new Amtour listings were struck by Roger Williams Mint. The S.F. Board of Supervisors doubled the MUNI adult fare from 25¢ to 50¢ on April 1, 1980.

Tom Brown found the Bridgeport Housatonic token at a Central Florida coin show. An explanation of how these tokens were used follows the listing for Conn 55 A in Atwood's Catalogue. Specimens are now known for Sections 2,5,7,9,10,11, and 12. All are extremely rare.

We are listing the aluminum Blue Motor Coach Lines token as a pattern even though some twenty specimens are known to exist, inasmuch as we have no evidence that this token in aluminum was ever used as a regular issue. The Transit Authority of River City took over Blue Motor Coach on February 29, 1976, and next day started operations on four of its routes.

Floyd Hartley researched the Saginaw token and learned that Mat Gramlich is listed in Polk and City directories from 1873 to 1916. He was listed as a baker until 1889, then as a saloon keeper until his death in 1916. The saloon may have been located in a local hotel which catered to drummers.

Unidentified #96,97, and 147, are no longer unidentified. I shall list them from Butte, Montana, when I receive clear rubbings from owners of any of these issues so that I can list inscriptions with slash marks as has been my practice since I became New Issues Editor.

Douglas Borden questions our listing of NY 780 A, the Rochester horsecar token in white metal. He has examined a number of them and they did not stand the test of a file scraping on the edge. If you think you have a WM specimen please send it to our Editor or to me for verification. Otherwise we shall delete this listing when we publish the 4th edition of Atwood's Catalogue.

= MAY NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

This month I shall be sending you four nice beautiful ANTOUR cable car tokens of San Francisco, CA 760 S T U V. These tokens are in great demand even by non collectors, and a complete set of them to date is very hard to come by. I want to thank Hector Turgeon for reporting the CP Air token to Harold Ford, which led to the discovery of the other three. Our special agent for Amtour tokens, Jim Wilcox, had been on top of these all along, but was just waiting for the release date on them. The City was debating a fare increase from 25¢ to 50¢ and that held them up. Jim purchased a supply of each of the four for us and delivered them to me here in Oakland. Thanks again, Jim. You are always there when we need you.

I must again repeat, if your New Issues Service account does not have enough in it to cover the current month's new issues, you won't receive them. There are, I regret to remind you, several people in this category. If your account continues in the red I shall assume that you are no longer interested, and move someone up who is.

When you make out your check, please make it out to "John G. Nicolosi." Do not make it out to the New Issues Service as I have trouble cashing such checks inasmuch as there is no account in that name.

More new issues will be coming your way next month. Meanwhile I welcome Walter M. Christensen from associate to regular membership status in the N.I.S., and Clay Welty from the waiting list to associate membership. Nice to have both of you on board.

= AMTOUR CABLE CAR TOKENS WIN DESIGN AWARD =

GRAPHICS USA/NY Magazine has included Amtour's 1979 cable car tokens, produced for the St. Francis, Ghirardelli Square, and National Airlines, in its DESI Awards for 1980. The design was executed by Dale Johnson/Bert Neill Associates for Amtour. The token designs will be hung at the DESI show in New York at the Unicorn Gallery, Soho, June 2 thru 14, 1980. The token designs will also be illustrated in the 1980 catalog of the DESI show.

All of the Amtour cable car tokens have been distributed by our New Issues Service to its members, with extras available by way of Mr. Nicolosi's ads. But they go fast, and a complete set of them is both beautiful and fascinating. It is also not easy to come by.

= BOOK REVIEW =
By Daniel N. Rusnak

Riding trolley cars from New York to Chicago? J.S. Moulton did it in 1912, all but 187 of the 1,143 miles of electric trolley lines. Ruth Cavin describes the variety and extent of the old electric railways in *Trolleys* (Hawthorn Books, Inc., New York, 1976. 223 pages). Cavin spotlights interurban trolleys in the first half of her concisely written book, printing many photos and reporting interviews with old time employees. The second portion describes contemporary trolley modeling and the offerings of North American trolley museums. The book does not go into tokens or tickets.

Our 396th Issue

Until August 20, please send all mail for THE FARE BOX to:
John M. Coffee, Jr. - 4104 Sixth Avenue - Tacoma, Washington 98406

June 17. The Editor will leave Boston for the summer on June 30, travelling via Amtrak's "Night Owl" to Washington, DC; via the "Broadway Limited" to Chicago; via the "San Francisco Zephyr" to San Francisco; and via the "Coast Starlight" to Tacoma. I'm looking forward to visiting collectors along the way in Washington, Denver, Ogden, and of course the get-together at Duane Feisel's place in Los Altos on July 13. I arrive in Tacoma on July 16; prior to that mail sent to me care of Harold Ford will receive prompt attention.

It had been my intention to publish both the June and July issues prior to my departure. But by the deadline for the June issue practically nothing was at hand to publish. So I had no choice but to publish only one issue, this one, before heading west. The July issue will be published from Tacoma about the end of July, and then we'll do our best to catch up in the Fall from Boston. So, in any case, this issue contains everything that would have been contained in the two previously anticipated issues.

The main event for the summer will be the annual convention of the American Vecturist Association, held for the first time in history in Canada. This event will be held in the Viscount Gort Motel in Winnipeg, Manitoba on August 8, 9, and 10. This convention will be different, exciting, and rewarding. It will include a 38-mile ride on the Prairie Dog Central Railroad in century-old cars behind steam. A very attractive token is in the works for this tour, and a smaller-than-usual striking has been ordered, so these won't be a glut on anybody's market. If you plan to attend, please register in advance with President Joel Reznick at 208 South LaSalle Street, Suite 1510 - Chicago, IL 60604. Registration is only \$20.00, which includes the tour, the banquet, the token, and admission to all convention functions. Rooms at the Viscount Gort are quite reasonable and you should make advance reservations if you will be attending. Remember the exchange rate gives U.S. money a 15% advantage for the moment. Rooms are \$28 single; \$32 double, Canadian funds. There will be a large floor auction, and inside this issue you will find the complete auction list with instructions to mail bidders.

Above are 2x enlarged photographs of a newly discovered token listed this month from Oconto Falls, Wisconsin. When I first received this token I assumed that it was the one Gerald Johnson referred to in his excellent article on this hack line in the September 1978 Fare Box. But upon checking the listing I noted that it was for a square token. I called Harold Ford, who confirmed that the rubbing in the AVA files is of a square token. So this scalloped token was a previously unknown depotel. If memory serves, this is my 43rd depotel from Wisconsin.

Just received is the 1980 A.V.A. membership roster, with orange cover and The Fare Box horsecar on its cover. Bob and Anna Butler have been doing our rosters for a lot of years, and each time it gets better. This booklet is a beautiful piece of work, and I add my word of gratitude to Bob and Anna for their labor and their love. Incidentally the horsecar used in our masthead, and on the 1980 roster, it taken from an old stock certificate dated 1888, issued by the Covington & Oxford Street Railroad of Covington, GA. The last president of the company sent it to me back in 1949, and it's about the finest horsecar engraving I have come across. This line used GA 270 A. To see what their equipment really looked like, in its last years at least, see page 10 of the Atwood Catalogue.

A phone call from Harry Nicholls of Dallas the other day. He informed me that a dealer at a Dallas coin show was selling NM 430 A for \$1.35 apiece. She had over 500 of them! This is a very old token, and once upon a time was census. But when we discovered that it was from New Mexico and not Pennsylvania, people began looking in the right place and hoards of the tokens came forth. So the price in the Atwood is now ridiculous, and with 500 of these things around, a catalogue value (which of course is always much less than "real" value) of 50¢ would really be on the high side.

For our New Finds Department, I have learned that Paul Cunningham has picked up Mich 590 D, which is only the second one known (the other was unobtainable). He also, he says, found "a variety of Man 900 E in steel, marked '2.'" Gerald Johnson, who never rests, picked up a Wis 250 A and an Ohio 830 A, "plus two dandy old one fare tickets for Belle City Street Railway Co. and Bloomington City Railway." The two tokens, the two tickets, "plus a couple of nice medals, all for \$4.00. That made my year!" he said. Indeed. Incidentally, Gerald was honored on May 11 at the Numismatists of Wisconsin Convention in Waukesha, with the presentation of the "Numismatic Ambassador Award" by the *Numismatic News*. Presentation was made by former AVA member Chet Krause, founder and publisher of *Numismatic News* and, I might add, a wonderful person.

In the same department, at the recent exonomia show in Philadelphia, former AVA president Dan DiMichael purchased from a bourse dealer the very rare Pa 840 C. As Dan now specializes in Pennsylvania, he doesn't pick up too many. But, then, he doesn't

need that many from Pennsylvania.

Gary Patterson recently turned up an interesting item. This appears to be a recent issue and could well be in use now. It is dark blue plastic with incuse silver lettering. On obverse it has EDY MEIER-SHOW / (BOB SLED) / GOOD FOR / 1 RIDE; on reverse it has EDY MEIER-SHOW / (BOB SLED) / COMPLIMENTARY / TICKET. My list of carnivals and circuses now operating doesn't include a listing for an Edy Meier show, so we're hoping some member has heard of this and can find a home for this token.

It is with great sadness that I report the death, on June 2, of John Nicolosi's mother. She was a wonderful lady who always made us feel welcome when we visited Nick. If Nick is late in answering your letter, you will understand why.

Nick has also been swamped with orders for the Amtour cable car tokens listed in the May Fare Box, and is all out of them. For some reason these are extremely popular items. But they're all gone now, so please don't write Nick for any as he has none.

A letter from George Gould of Seattle. He reports that Seattle Metro Transit is now using Wash 780 S, as a child fare token. This token was struck back in the 1950's but never used at the time. Paul Fouts, chairman of our 1955 A.V.A. Convention in Seattle, did obtain about 100 of them to be given out to those attending the convention, enclosed in a small printed card. For years they sat in the vaults, but now at long last they have been brought out and put into use. George adds that the paper tickets in use for the 50¢ adult fare are proving very unsatisfactory, and jamming the fare boxes. Accordingly it is likely that Seattle will soon issue a new, and probably quite unusual (octagonal perhaps) adult fare token. He also sends a rubbing of a token which probably would be a manufacturer's sample, or stock token. It is described thus:

PEREY TURNSTILES / PT (LOGO) / NEW YORK, N.Y.
Bz 28 Sd Turnstile Control Systems / Perey Turnstiles / New York, N.Y. /
For All Applications

I suspect the above token is more than just an advertising token. Most likely it is used to activate demonstrator turnstiles in the Perey offices, or at transit conventions.

A letter from Bob Thomas of Gaithersburg, Md. After extensive damage from Hurricane David in September, 1979, the Baltimore Streetcar Museum will resume operations on July 13 with three operational cars, he reports. But they've raised fares. Adult fare will be \$1 cash or 3 tokens for \$2 (Md 60 AQ and AR). Child fare will be 50¢ or 3 tokens for \$1. But they won't issue a child token for the present. Instead, they will use several thousand Scranton, Pa., tokens which they've had on hand. So for the child fare, the Museum will use Pa 840 F and G. There was a time when these two tokens were fairly scarce. No longer. The tokens will be sold at the Visitor Center Gift Shop, but not by operating conductors. Bob adds that he doesn't know if the Museum would sell any of these to people who write in for them. "However, a donation above the cost of the child ride plus a return/stamped envelope just might work" he adds. If you do write, you'd better describe the token exactly. He concludes his long and interesting letter with another piece of news: "Baltimore's Metro Area Transit has introduced the small (16mm) token that was known to exist but had not been released." I don't know if this is Md 60 AY, which we have listed, or a different token, but we shall know soon enough.

Rummaging through the Meyer & Wenthe records I discovered that the token we have listed as Fla 110 B was shipped by M&W on July 8, 1943, to "Riddle McKay Transportation Company of Tennessee" at Union City, Tennessee. Thus it would appear that our listing for Clewiston, Fla., was an error brought about because of the similarity between this token and FL 110 A. Still, I do remember in 1948 Roland Atwood, returning from a trip to Florida, brought back a batch of both 110 A and B which he had obtained in Clewiston. I suppose a communication to someone in Union City, TN, would be enlightening, and might even turn up something else that we didn't know about.

= COMMENTS FROM THE VICE-PRESIDENT =
By Roy D. Nulph

Just received the new AVA 1980 membership roster from the fabricators, Bob and Anna Butler of Minneapolis, and as usual a beautiful job. They are just two of the behind-the-scenes people who keep this association as great as it is. My sincere thanks to them for a job well done. We especially like the addition of the phone numbers of the elected officers; they should prove to be very useful in the future. Calls to my Hunter, Utah, number will be acceptable from 5 a.m. to 11 p.m. (MDT) seven days per week.

One of the biggest thrills of my life occurred last year when I was named the winner of the 1979 Fare Box Literary Award, for my article "Trolley Transportation in Salt Lake City." Some member will be accorded the same honor this year in August at the AVA's annual convention at Winnipeg, Canada, August 8,9,10, 1980. As Chairman-Moderator of the 1980 Fare Box Literary Society Award, I'm reminding the honored members (past winners) of the Society to send their nominations of the two best published articles which will have appeared in the issues from (and including) August 1979 to July 1980. Send nominations to me in time for announcement at the big banquet on August 9. Address: P.O. Box 20392 -Hunter, Utah 84120.

As a sidelight (perhaps a highlight to some) at the Convention we are inviting those interested to visit my room and view the complete collection (mint condition, still in wrappers) of the SAMBO'S good fors, a total of 1,845 pieces, plus other goodies from the Utah area. President Joel tells me that he has lots of things in store for the Convention, and if you know the "Head Frog" it's hard to say what he may come up with. Example: last year in Philadelphia, for instance! Thank you for letting ye olde fire-fighter bend your ear. We hope to see about 10% of you in Winnepeg. Best collecting. Sincerely, Roy D. Nulph, 1979-81 Veep, AVA.

= "GOOD FOR ONE RIDE IN MY MODEL T FORD" =

Early this year Frank Kelley came upon a wooden nickel inscribed GOOD FOR ONE RIDE IN MY MODEL T FORD MIKE LUDKIEWICZ 143 RICHMOND RD. LUDLOW, MASS. 01056 on obverse with standard buffalo woodnick reverse. Frank wrote Mr. Ludkiewicz, who replied that he had 500 of these made up in 1977 to give out as personal calling cards. He does own a 1926 Model T. "Have had many people show up with the token for their "free ride," he wrote, although that was not really its purpose. He says he has passed out "300 to 400" of them to date. Whether you could get one by writing is anybody's guess.

This is an example of a whole genre of tokens, mainly wooden nickels, which appear to be transportation tokens but which obviously are not. Harold Ford has a couple which were obviously advertising gimmicks by automobile agencies. Both have standard buffalo woodnick reverse. On obverse, one has GOOD FOR 1 FREE RIDE IN THE NEW 1957 BUICK 566 VINE ST. JOHNSTOWN, PA. CAMBRIA MOTORS INC. The other has GOOD FOR FREE RIDE IN THE NEW 1957 FORD IN LONGVIEW, WASH. PH. HA3-4321 MASON MOTORS, INC. These may be of interest to some people, but they have nothing at all to do with transportation tokens.

= SOLID STEEL TOKENS =

An interesting aspect of steel tokens overlooked by most of us--but caught by Ralph Freiberg and placed in a note in his catalogue--is that the first steel tokens, which were made in the middle of 1943, all seem to have been solid. Apparently the manufacturers had difficulty, at first, punching out devices in the hard steel planchets. Thus a number of bus lines which had never used solid tokens, when they ordered steel tokens, got solid tokens. But early in 1944 they licked the problem, and steel tokens were able to be manufactured with various cut-outs, as had been the WM and brass tokens. Kind of an interesting observation, and typical of Ralph to note it.

= THE KING & HOLDEN AUTO HACK LINE OF NEW LEXINGTON, OHIO =
By J.M. Coffee

Above, enlarged 2x, are two die varieties of Ohio 625 B. For years this token was listed as Unidentified, but when we learned its correct origin, we were able to obtain about half a dozen more from Mr. T.J. Holden whose father and grandfather operated the line.

Prior to 1915 the line operated horse-drawn hacks, but in that year Mr. A.C. King and Mr. John W. Holden each purchased a 1915 Buick truck, and then had the local Snider-Flautt Lumber Company make omnibus enclosures to fit on the trucks. One bus was owned by King; one by Holden. They then went into partnership with their two vehicles.

At that time 14 passenger trains daily passed thru New Lexington: 8 were Pennsylvania RR; 6 were New York Central. The hack service was exclusively to service these passenger trains, as was the case with nearly all small town hack services prior to World War I. If you planned to catch a train, you left word at Thacker's Store. Mr. Thacker then wrote your name, and the train you intended to catch, on a blackboard outside his store. Later a second blackboard was situated in front of the local newspaper office as well. Prior to the arrival of each train the hack driver inspected the blackboards and then made his rounds to pick up each person listed. Addresses were not given. The hack driver knew everybody in town. Fare was 15¢. If you planned to return you paid 25¢ and were given a token for the second trip back home.

After the train had arrived the hack then picked up incoming passengers. First he made stops at the two local hotels, the Park and the Central, situated about a mile from the depot. After stopping at the hotels, each passenger was delivered to his home. All this for just 15¢, but baggage of course was another 25¢.

I believe that OH 625 A was the first token used, when the first Holden was in partnership with Hayes. Then OH 625 C when Holden was alone. Then OH 625 B and D when the partnership was with King and they began using an "auto hack" in their last days.

The line, like most hack lines, went out of business about 1920.

= NEW CATALOGUES OF WORLD TRANSPORTATION TOKENS =
By Kenneth E. Smith

The World Transportation Token Catalogue issued in 1967 has grown so large that it has to be issued now in several volumes. A contract has been signed with our printer who also prints the Atwood catalogues and the 1967 edition of the World catalogue. In the last week in June, 1980, the camera-ready copy for volume one of the new world catalogue will be shipped to the printer, and it is hoped that some time in July or August the books will be shipped, printed, bound and ready, to me. This volume 1 will be a cloth-bound book like Atwood and my 1967 catalogue. It will render obsolete about one third of the listings of my 1967 catalogue, which means that, for the time being, if you collect foreign transportation tokens you will need both the new catalogue and the 1967 book.

In the 1967 catalogue I showed a rarity scale that we planned to use in future editions, ranging from R10 (only one known) to R1 (very common). In this new catalogue almost 1,000 of the better items have listed behind the listing or underneath the listing its rarity and comments. In the last 14 years the scarcity and demand for the better tokens and passes became known to me, and we can not put the average going sale price behind the token or pass and the prices in this new catalogue reflect the going prices today. You don't have to use a multiplication factor anymore. You cannot use a multiplication factor on values in the 1967 catalogue to arrive at the new values, Kirk and I evaluated according to our notes each item individually so there is a range of price increases from very little to none on some common tokens, to some \$5 or \$6 items which have proven to be unique (and issued long enough ago to stay unique or nearly so, probably) which have increased catalogue-wise ten times to \$50 or \$60. Some \$5 catalogued tokens in the 1967 book have only increased to \$10, some more, etc., to some unique ones to \$50.

The prepublication price of this book is \$10.00 postpaid for U.S. orders, autographed if desired. We are only getting 40 unbound copies for sale on a first come, first served, basis at \$10 each for U.S. orders, not autographed. On June 9, I got some boxes of no. 4 size Jiffy bag mailers which we shall address as we get orders and as soon as the books arrived we shall fill the mailers and send you your catalogue. You will be, we hope, pleasantly surprised at the amount of information we added concerning usages, dates, scarcity, etc. For U.S. orders send your check or money order to me and payable to me. Orders from outside the U.S. send \$11.00 in U.S. bills only, as bank charges range from \$4 to \$7 each check or M.O. to cash foreign checks or money orders. Happy collecting.

KENNETH E. SMITH - 328 AVENUE F - REDONDO BEACH, CA 90277

= JUNE NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

This month we send you NY 410 E. We held it up hoping also to get 410 D, but it looks hopeless. My thanks to George Gentle for the discovery of these token and to Joel Reznick for his prompt action which resulted in our getting it for you. Also you will get NY 10 S, and we thank Ron Etchells who was responsible for our getting it. Our special gratitude to Ron, George, and Joel!

We also expect Kans 970 N, which the Authority has promised to send us, but which hasn't arrived yet. If it comes soon enough it'll go out this month; otherwise in July. For August, as always, we'll have the AVA Convention Tour token for you.

When you write, please make out checks payable directly to me and not N.I.S. And if you're a member and tokens haven't been getting to you, check your balance. It's probably too low.

I am all out of Amtour tokens. We were swamped with orders for them from non-N.I.S. members. Regret I cannot supply any more of them.

Just received is the 1980 AVA membership roster. I job well done by Bob and Anna Butler, who have been doing this for us for many years now.

AUGUST 8-9-10

BID BY LOT NUMBER ONLY, FOLLOWED BY CATALOGUE NUMBER.

PLEASE OBSERVE MINIMUM BIDS AS INDICATED, NO "BUY" OR "UNLIMITED" BIDS.

SUBMIT ALL BIDS ON 8 1/2 X 11 LETTER SHEETS, LEAVING A 1" MARGIN ON THE LEFT SIDE. PLEASE PRINT YOUR NAME AND ADDRESS CLEARLY AT THE TOP OF EACH PAGE.

SUBMIT ALL MAIL BIDS TO JIM HEMPHILL, P.O. BOX 1321, LAKE OSWEGO, OR 97034.

PLEASE MAIL YOUR BIDS EARLY. BIDS MUST BE RECEIVED BY JULY 26, 1980, BIDS RECEIVED AFTER THAT DATE WILL NOT BE HONORED. IN CASE OF TIE BIDS THE EARLIEST POSTMARK WILL PREVAIL.

LOTS OPEN TO FLOOR BIDS WILL START AT 10% OVER SECOND HIGHEST MAIL BID.

SUCCESSFUL MAILBIDDERS WILL BE NOTIFIED AND ALL FUNDS MUST BE RECEIVED BEFORE SHIPMENT IS MADE. POSTAGE AND INSURANCE WILL BE ADDED. LOTS WILL BE SENT UPON RECEIPT OF MONEY ORDER OR CASHIERS CHECK, OR TWO WEEKS AFTER DEPOSIT OF PERSONAL CHECKS. MAKE ALL REMITTANCES PAYABLE TO "JIM HEMPHILL AVA AUCTION ACCOUNT".

PARKING TOKEN NEW ISSUE SERVICE

By KARL GABSCH

To all members of AVA and especially to Parking Token Collectors, as you all are aware, Mr. Feisel was the original organizer of the Parking Token Collectors unit and also in charge of the Parking Token New Issue Service. We all owe Mr. Feisel a deep sense of gratitude for his time and effort to this part of our organization.

Since Mr. Feisel has given up this activity I have been asked to take over the Parking Token New Issue Service. After giving this some considerable thought, I humbly accept the responsibility there of and hope to do it the justice it deserves. I know, with the help of the membership, that as in the past it has given to Mr. Feisel it will also help me, we all can do a wonderful service for the collector.

Mr. J. Hall has informed me that the books on the previous PTNIS have been balanced and closed. So we must begin anew. Our new name or letters will be P A T N I S and will be limited to 50 regular members and 50 associate members. The reasoning for limiting the membership is due to the availability of tokens, you can readily understand a merchant or distributor that has a limited supply of tokens is not about to send us a hundred or more and too, may not send any at all. Time will tell if we can increase the membership due to availability.

To all interested in joining, please send \$20.00 by check or Money Order to open an account, made payable to PATNIS only, NOT IN MY NAME, please. The post mark of your letter will determine your seniority in the organization.

I have high hopes of having several new tokens available to the membership after the August AVA convention in Winnipeg Canada. Also an informative letter giving more details as to our responsibilities.

So members, lets all do our part and get the ball rolling again and as always,
HAPPY COLLECTING

= SUPPLEMENT H-7 TO FEISEL'S CATALOGUE OF PARKING TOKENS =
By James H. Hall

In order to obtain accurate information on a token, please send the token to me, SASE. If this is not possible, send a rubbing AND the exact wording, as it appears on the token. I also need the size and the metal content of a rubbing. A rubbing leaves me no room to guess the metal content and the size may be difficult to measure from the rubbing. If tokens are sent SASE, I will usually have them back to the submitter with a three to four week period. Normally, it takes me that long to research the token, answer other collector's inquiries, and list the piece. The more help you give me, the better and quicker I can be of service to you. With the numerous submissions I receive, on a monthly basis, I list those tokens which are correctly submitted and leave the problems until I have the time to get back to them. Publishing a monthly supplement makes it mandatory for me to set priorities, and to stick by them. The more help I get, the faster service you get. Thanks for your cooperation; you make my job much easier.

IOWA

Des Moines 3300 (Submitted by Mayland)

UNIDENTIFIED (Reported by George Gould)

196 B 22 Sd ONE TRANSFER / AT STATION REC'D / THIS DATE / ONLY / 3
(same as obverse)

In the post Civil War era (circa 1867-9) William Harrison Hardy built a toll road through the Aztec Pass between the Santa Maria and Juniper Mountains terminating in Prescott, AZ. Approximately 165 miles in length! Toll rates and the significance of the numeral on the reverse are not known. The die work is primitive on the one known specimen. The University of Arizona checked the corrosion and said it was "ammonia compounds," possible from a stable.

The Georgia State Token-Exonumia Assn. issued their tour token when they had a spring meeting during the Georgia State Numismatic Assn. convention in Atlanta this past May. The issue was good for a ride to Georgia Tech and The Varsity, the world's largest drive-in. The token order was placed through our past president Bob Ritterband, a manufacturer's representative. He alerted me as to the order. We are listing it since specimens are made available to collectors. See ad in this issue. New Issues Service will not handle this issue.

Roger Williams Mint struck the new Albany token which is an adult fare. NY 10 A B C D, which have been used as adult tokens, will now be retired from circulation. NY 10 N was removed from circulation two years ago.

Since one specimen is of Binghamton, NY, origin, we are relisting Alberta 800 A. The response to my inquiry of several months ago about the source of known specimens indicated that none were of Canadian origin. The one token owned by a Canadian collector was obtained by trade from a U.S. collector. The die work and size, 20.35mm, is identical to the listed NY 80 M. Alberta 800 B and C are slightly smaller and the die work and thickness are entirely different. Thus we seem to have issues with the same inscription, same era, with the same names, but from different locations.

Donald Stewart is inclined to relist the Red Deer, Alberta, listings to Rocky Mountain House, Alberta, since he has evidence that that was the home base of the Canadian White Bus Line, though it did run to Red Deer. The Freiberg files show that Roland Atwood obtained specimens of Alta 800 B and C in Red Deer about 1930, so we'll hold up a possible relisting of these two tokens for the time being.

Community Transit was taken over by the City of Ithaca in 1978. Mr. Bernard Carpenter, Transit Supervisor of Ithaca Transit, supplies the following information. NY 410 D (with comma) was issued in December, 1978, and struck on a thin planchet. NY 410 E, the second order without comma, was issued in April, 1979, on a thicker planchet because the thinner brass stock was no longer available. Both were struck by Osborne Coinage Company, but quantities struck are not known. The new 35¢ fare, as of January 14, 1980, is the first increase in 20 years by a local bus company in Ithaca. Tokens are sold by bus drivers, several downtown retail stores, and on the Cornell University campus.

Incidentally George Gentle phoned Osborne Coinage and learned that they struck an additional order of Colo 260 S (initially issued 2/1/79) at the same time as the second Ithaca issue. Would one of our Denver members check to see if there are thickness varieties of that issue?

Joel Reznick obtained the listed Pa 996 C via a Cunningham auction over two years ago. Extensive research on Joel's part finally paid off. He obtained from the State of Pennsylvania a report of Toll Road Commission of January 1, 1911, which showed the Susquehanna and York Borough Turnpike Road Company as being ten miles long. York and Chanceford, which issued Pa 996 A and B, was 4-5/8 miles long.

Gerald Johnson published an article entitled "Leamorande Livery - Oconto Falls" on page 103 of the September 1978 Fare Box. That same month we listed Wis 605 A, a square aluminum issue. This month we list a scalloped-edge token with the same inscriptions on obverse and reverse. Gerald's article mentions dates circa 1913-1918.

Unidentified #196 is another in a series already listed. Probably tokens were issued for every day of the month. Specimens for 3,4,7,12,19, and 29, of this series are now known and listed.

= THE JACKPOT =

The Amusement Token Collectors Association, recently organized, will begin a bi-monthly publication entitled *The Jackpot*, with the first issue to be published in July.

The initial 8-page periodical will contain news, articles and ads on the collecting and history of tokens related to slot machines, pinball machines, amusement arcades, and other amusement and vending machines. Featured each issue will be several pages listing newly issued amusement tokens and also new discoveries of older amusement tokens. These sheets will supplement the recently published catalogue *Amusement Tokens of the United States and Canada* by AVA members Stephen Alpert and Kenneth E. Smith (who were the founders and organizers of ATCA).

Dues in the Amusement Token Collectors Assn. (which includes a subscription to *The Jackpot*) is \$2.00 for the remainder of 1980. Charter membership will remain open through 1980. Send \$2.00 dues, cash or check payable to Eleanor Smith (ATCA's secretary and treasurer) at 328 Avenue F - Redondo Beach, California 90277.

ANY OF THESE TT's for only \$2.50 each +SAE: CA 435 B; KS 820 H; KY 480 S; PA 15 F; RI 520 J; SD 680 B. Also at \$3.50 each +SAE: these unpunched errors (solids), CA 985 C D; NY 440 A, 630 AH; OR 700 G; WA 480 Q. Add 50¢ if insurance desired.

JULY, 1980

Our 397th Issue

ROBERT M. FLINN

Robert Flinn, AVA #1400, of Albuquerque, died last May 30. A stamp & coin dealer, Mr. Flinn joined us back in August, 1973. I did not know him well, but our correspondence, though infrequent, was friendly and his letters indicated that he was a bright spirit and a delightful person whose absence will diminish us. He was 79 at the time of his death.

July 29. This is our small midsummer issue, limited to 8 pages. One of its chief functions is to summon the membership to the Annual Convention of the A.V.A., to be held this year on August 8,9,10, at the Viscount Gort Motel in Winnipeg, Manitoba. Our first convention in Canada promises to be unusual and exciting, including a 38-mile ride on a steam train. The registration fee of \$20, which includes everything, may be paid at the door.

The Editor's trip across the country by Amtrak was pretty good this year, and the weather was surprisingly cool, even in Washington DC. The overnight "Night Owl" from Boston to Washington was excellent and arrived right on time. In the Nation's Capital, where I lived for 13 years, I rode the new subway extensions to the end of the line and visited the Smithsonian's magnificent gold collection. The Washington section of the "Broadway Limited" to Chicago was also excellent, cool, with good food, and arrived about an hour late. In Chicago I spent the day with AVA President Joel Reznick in his office in the Loop, and departed on the "San Francisco Zephyr," usually Amtrak's worst train. This time it was excellent most of the way. Everything worked, the train was cool and running on time. Visited with Roy Nulph and Bob Harris on the platform in Ogden, having earlier the same day visited with Toby Frisbee on the platform at Denver. The ride over the Donner Pass was glorious, as usual. I stood by an open vestibule door breathing in the clear cool Sierra air as we went thru snowfields, clung to the sides of sheer cliffs, and crested the great pass over the mountains. Some of the most beautiful scenery in the world. You renew your love affair with trains on such occasions as this. Unfortunately everything began to break down as we got to Sacramento: the water stopped running and the heat came on as we crossed the hot Sacramento valley! But only a couple hours of that misery and we arrived in Oakland where I was met by Hal, Louise, and Mark Ford.

On Sunday, July 6, we had the annual get-together at Duane Feisel's home in Los

Altos for a combined meeting of the Bay Area Token Society and Western States Token Society. Present were Feisel, Earl, Jacobson, Jameson, Carmichael, Hal & Mark Ford, Andy Johnston, Peter Weiglin, Album, Bill Williges Jr., Bud Nelson, Nichols, and several others whose names, I regret, now escape me. It was a great meeting with good food, good conversation, and wonderful company.

A few days back up in the Sierras at Donner Lake with the Fords, and I left for Tacoma aboard Amtrak's "Coast Starlight." The trip up the coast, right by grumbling Mt. St. Helens, was perfect and we arrived in Tacoma right on time, and I found the customary pile of mail awaiting me.

In my mail was a note from Kenny Smith about the new edition of his World Catalogue, now at the printers. Kenny had hoped, originally, that the books would be ready by September 1. It now appears that October 1 is more like it. So you will understand why your book doesn't arrive until the Fall. This promises to be an excellent and very necessary revision to part of his World Catalogue of Transportation Tokens. If you haven't ordered your copy, you may still do so. The cloth-bound volume is only \$10 postpaid to AVA members. Send check to Kenneth E. Smith - 328 Avenue F - Redondo Beach, CA 90277. I am really looking forward to this book.

To the left is a picture of an early merry-go-found token discovered recently by David Schenkman and listed this month. We have very few round cardboard merry-go-round tokens and this one appears to be vintage before World War I. The token has black lettering on a light green background.

A note from Doug Borden of Fairport, NY. He says he will be on vacation for 5 weeks this summer, so collectors who don't hear from him will get answers to their letters as soon as he returns, if they answered his ad in the June Fare Box. Doug has finished work on a long and excellent history of transit in Rochester and we hope to run it serially beginning this Fall.

A number of tokens have been reported to us, whose origins are unknown. Before we list them as mavericks we'd like to see if anyone can help us find their correct places of origin. One reported by Larry Kemper of Cincinnati is a 23mm green plastic inscribed ST. COLUMBA SCHOOL on obverse, and GOOD FOR 1 BUS RIDE on reverse. Another is a 25mm brass inscribed .R.B. on obverse, and RETURN CHECK on reverse. We think a 3rd letter belongs on the obverse, too, like T.R.B. or I.R.B. Any ideas? This one reported by Dee Drell. George Hosek reports an aluminum scalloped 27mm token inscribed SUBURBAN LINES RAYTOWN TO K.C. on obverse, and GOOD FOR 15¢ IN TRADE on reverse. Another he has: aluminum 25mm with YELLOW CAB TAMA on obverse, and GOOD FOR 25¢ IN TRADE on reverse. Tama, Iowa?

Have to stop here if I'm to have room for Nick's report below. I'll be in Tacoma till August 20 to send mail here till then. Next issue about September 25.

= JULY NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

This month N.I.S. celebrates 25 years of continuous service to the AVA. My personal token commemorating this occasion is now available for your latest or SAE. It depicts OH 165 Y on its reverse, this being the first token N.I.S. sent out, back in 1955. I want to thank all members who have contributed time & effort in our behalf, no matter how small. Hoping that more members will continue to help. This past year we sent out 43 U.S. tokens, compared to 31 last year. Plus 1 Canada and 8 foreign, a total of 52 new issues for the year July 79 to June 80.

This month you will get IL 999 Q thanks to Bill Garrison, and KS 970 N thanks to the usual great efforts of Joel Reznick.

The 1980 AVA Convention tour token is a Canadian token, of course, so it will be sent only to those who collect Canada unless you write and tell me you want it.

Welcome to Don Hillstrom to regular membership, and Doug Borden to Associate, this month in N.I.S.

= SOME COMMENTS FROM THE VICE-PRESIDENT =
By Roy D. Nulph

On the evening of June 15, 1980, the entire collection of my SAMBO'S wooden nickels was removed and stolen by forced entry from my father's car while parked in the Santa Barbara Sambo's #1 parking lot. This involves the 1,845-piece mint set (each sealed in plastic, individually wrapped) and the 1,200 odd duplicates. Over 3,000 pieces in all. A very substantial reward of \$1,000 is being offered for information leading to the return of the Sambo's to their rightful owner.

Now, to answer a few questions that are surely to arise. The collection was originally given to my father by "Sam" of Sambo's, a couple of years ago. Dad agreed to transport them to different cities and set them up for display, working with Sambo's as a part-time publicity director. It was while he was in the international headquarters that they were removed from his car. He was readying for his annual trip to Salt Lake City, to bring the set to the writer, when unknown persons pried his trunk lid open and removed them. Nothing else was touched in the car. Hate to disappoint a lot of AVA'ers, but it looks as if the collection will not be on display in Winnipeg, come August 8-9-10. Even if I make it to the convention. (See NOTICE elsewhere in this issue.)

We hadn't planned on making this a regular column in The Fare Box, but Editor Coffee asked me for an article to run in the July issue.

On the night of July 3, Bob Harris and I made our second annual journey (in the middle of the night) to Ogden in order to meet the Amtrak "San Francisco Zephyr" westbound carrying our Editor to California. We arrived at 10:15 pm, contemplating a one-hour wait. John's train arrived 45 minutes early, quite a surprise. He looked splendid and healthy in his fire-red shirt. Hasn't aged a day since we saw him last.

As we strolled the station platform in a cool 68° evening, we talked about TT's, mainly the Utah census tokens and discussed the Utah 750 B, 800 A, and 900 A. On the last, it seems that Coffee's is made of brass and Nulph's is white metal. It isn't likely unless one could have been a child or half-fare token. The line was in operation for less than six months so we doubt if it was a reorder. More on this when we find out for sure.

The 1981 Annual AVA Convention and tour was mulled over. It will definitely be held in Salt Lake City and hosted by the U*L*A*T*C*O group. There are three combination tours we can possibly take, each one involving an aerial tramway ride (never before accomplished during an AVA convention). Final plans will be up to the Executive Board.

After conversing for an hour John was getting cold (must admit we were shivering also). We bid our adieus and the Editor boarded his car. There was lots of activity at the Ogden station: three Amtrak trains were there at the same time. The westbound S.F. Zephyr with a 4-unit diesel and consist of 5 baggage and 18 coaches; the northbound "Pioneer" with one baggage car and 4 coaches; the southbound "Desert Wind" with 2 baggage cars and 3 super double-decker coaches. Quite a sight for this old railfan.

Bob and I drove back to S.L.C. in a rainstorm, arriving at 2 a.m., but we had enjoyed every minute of it.

As Moderator-Chairman of the 1980 Fare Box Literary Award, I am issuing this last call for nominations from previous recipients. Stories that appeared in The Fare Box from August 1979 thru July 1980 are eligible. Please vote for two, with your preference for first and second choice. Deadline will be August 4. Send to my address in membership roster. Winner will be announced at the Convention Banquet in Winnipeg on August 9.

For you AVA'ers that do a bit of C.B. radioing and are trying to "shot a little skip," give this "token-nut" a shout on Channel 21. We have it on from 5 a.m. to midnight, MDT, seven days a week.

Until next time, best collecting from the 1979-81 Veep, Roy.

Patterns 998 (Reported by Alan Weighell)
M A 17 Sd (same as 900 C but brass-clad aluminum)

The Air California Miscellaneous token is a continuation of this series, and we assume that they exist for the same airports as in previous years. Oakland and Sacramento 1980 issues are thus far known.

The Illinois pass is another in the same series listed on page 48 of the 1977 Supplement, and this one will be sent to N.I.S. members. The catalogue value is based on the value of the token when in current use.

We still don't have background information on the Wichita listing. The Metropolitan Transit Authority finally sent the New Issues Service a supply of the token after a couple of phone calls by Joel Reznick. This new token, 970 N, is an adult fare. The previously listed 970 L is for a student fare.

George Gould sent us proof of location of the relisted Butte, Montana, merry-go-round tokens based on city directories. We are listing them in the probable sequence of issue, which was circa the 1890's to the early 1900's. They were used at an amusement park known as Columbia Gardens. T.O. Newman was quite well remembered by old timers, as having operated a merry-go-round. Knowlton and Lucado are listed in a city directory for 1904. Knowlton operated a merry-go-round, probably the same one Newman operated. Lucado was also a carriage maker in Butte.

The Auburn, Nebraska, issue is similar to the many fibre depotel tokens listed and pictured in the Fare Box of April 1977.

The two listed Pennsylvania Turnpike issues were identified as to location in the Report of the Pennsylvania Toll Road Commission, dated January 1, 1911. The Wrightstown and Newtown was six miles long; the Hanover and Littlestown was 6 1/4 miles in length.

Since I lacked the previously listed Philippines 700 J in my own collection I wrote over a year ago to obtain one. In June, 1980, I received a letter from the youngest son of the owner of California Bus Lines. He had recently arrived in the San Francisco area to attend a local college. He sold me 30 specimens of the modern PI 700 series, half being 700 G, mostly the thick variety. The remaining specimens of the now obsolete issues in this 700 series were a gold mine. Three unlisted issues (700 K unique at this time, and 700 L and M) plus the listed varieties of 700 J. I have only duplicates of 700 Jc and L and M. The son stated that there have not been any issues since 1970 and he sold me the remaining supply.

Alan Weighell submitted the pattern listing from Ontario for verification, since it is similar to a regular issue. It was struck by Sherrit Gordon Mint.

Ed Linden reports that Pa 805 A has been issued with two die varieties. The New Issues Service distributed the large letter reverse variety late in 1975 from the first 50,000 tokens received from Meyer & Wenthe. A second order of 50,000 tokens was placed in circulation later with a small letter variety.

= P A T N I S =

I must apologize to the membership for wrong information given me regarding PTNIS. The books are not closed and accounts at this time are also not closed. I spoke to Duane Feisel and was informed that he was anticipating closing the accounts and settling with the members involved. As to when, I'm sorry to say I cannot say. Should any member wish information regarding his account please write Mr. Feisel.

My appreciation goes to all members who have joined our new PATNIS and am happy to see that so many members have confidence in us regarding our new venture. The PT New Issues Service still has a few openings and anyone who desires to join may do so by sending \$20 by check or money order made payable to PATNIS (not to me).

= A.V.A. MEMBERSHIP ROSTER =

The membership roster for 1980 is completed, mailed out, and should be in the hands of all members by this time. The "Roster Fabricators" have received several letters containing compliments and thanks for the project. We regret that there were a couple of letters pointing out an error or two in this year's roster. We express our sincere apologies for these errors and pledge to omit such errors in future rosters. The errors are herewith pointed out so that you, the members, can make the needed changes in your books:

(1) On page 8, membership No. 0630, the name should be Fairfield, not Fair-child.

(2) On page 25, membership No. 1165, we received notice too late for the printing that Alan Weinberg's address should now be included in the roster. Please insert the following on that line to complete the information: P.O. Box 1056, FDR P.O. - New York, NY 10150 * W O

Thank you for making these two changes and again thank you for your kind letters. We'll try again to improve the roster next year, so if other errors are found, please let us know.

AUGUST, 1980

Our 398th Issue

September 24. The long summer pause is over, and because we didn't get to publish a July issue prior to leaving Boston in June, we are running late. But this "August" issue is right up to date as of September 24. I hope to publish a September issue fresh on the heels of this one in an attempt to make the dateline coincide more with reality. So please send articles and ads as quickly as you can.

It was a delightful and rewarding summer, even though I only picked up a couple of census tokens. In San Francisco I had an opportunity, with Hal and Mark Ford, to ride the new LRV streetcars which are almost exactly like those in Boston. A chief difference is that, in San Francisco, they have high platform loading in the new subway that runs beneath Market Street. Consequently, for subway operation, the LRV trolleys have a flat passageway directly from the platform to the streetcar floor. Then when the car leaves the subway and goes to street running, the operator makes an announcement warning passengers to stand clear of the doors, and the flat passageway descends and becomes steps. Quite interesting.

The Editor's return trip to Boston via Amtrak was excellent. Four different trains! A short hop from Tacoma to Seattle. Then the "Empire Builder" from Seattle to St. Paul, riding in the brand new sleeping cars. The train was rather short, consisting only of four coaches, two sleepers, and a dining car, all high level, plus a regular baggage car. The new roomettes, mislabeled "economy bedrooms" (there is nothing economical in taking Amtrak sleeping cars) are excellent, with glass walls between your roomette and the aisle, and curtains you can draw for privacy. Unfortunately wash basins and toilet facilities, which are in the old roomettes, are not in the new ones. But there are five small bathrooms on the lower level, and it was no inconvenience to use them. All in all wonderful equipment, and the air-conditioning worked beautifully. I did miss a lounge car and the dome cars but the former, at least, should be in place eventually.

I was met at the St. Paul Amtrak station by former AVA president Quincy Laflin, and spent a really wonderful day visiting with him, including a visit to the Minnesota State Fair. That evening Tex and Martha Barnett joined us for dinner at the Laflins, and as always it was the kind of dinner a bachelor usually can only dream about.

That night I took the "North Star" overnight train from St. Paul to Chicago, with the old equipment. It arrived right on time at 7:30 a.m., and I spent most of the day

August 1980-

with Joel Reznick in his office in the Loop, where things are always a bit frenetic, and having lunch with him at an excellent restaurant in the Merchandise Mart. Joel gave me a token he recently acquired which, at first glance, might appear to be a transportation token. It is a 25mm bronze token inscribed CEDAR POINT AMUSEMENT PARK on obverse, with a picture of a steam engine, a ferris wheel, and a tower of some sort, and NO / CASH / VALUE on reverse. Because of the pictures one might have assumed it was for a ride. But Joel investigated, and learned that the token is used only in the "fairway coin pitch" because it is now illegal to throw real coins. The tokens sell at 7 for \$1.00. The Cedar Point Amusement Park is in Sandusky, Ohio, and that is the only place where the tokens are used.

From Chicago I rode Amtrak's "Lake Shore Limited" directly to Boston, and it arrived less than an hour late. All in all an excellent train trip back.

In Tacoma this summer I was honored by a visit from Roland C. Atwood, AVA #1, who flew up from Southern California to spend a couple of days chatting about old times. I first met Roland in 1948, in Washington D.C., and in the intervening years the two of us have seen a lot of tokens and a lot of mutual friends.

In the METCA *Trade Token Topics* for February-March 1980, I have just learned, there is a description of an unlisted Nevada transportation token which would be a companion piece to NV 50 A, listed on page 111 of the 1977 Supplement. The token is inscribed ROBINSON CANON AUTO SERVICE on obverse, and is made of brass. Its reverse is identical to NV 50 A. We have no size for the token, or shape, and have not seen a rubbing. So we'll hold up a listing in the Catalogue until we have this information about it, but I did want to inform readers of the token's apparent existence.

AVA member Bill Crawford of Nahant, MA, is sponsoring a "Fall Foliage Railroad Excursion" on Saturday, October 4 over Conrail and Amtrak. The train will go from Boston to Pittsfield and Chatham and return to Boston. Leaves South Station, Boston at 8:30 a.m. and the fare is \$39.95. You don't have much time, but tickets may be ordered from Massachusetts Bay Railroad Enthusiasts at Box 136, Ward Hill, MA 01830.

Bill Williges sends us an interesting elongated which was available at the American Numismatic Assn. Summer Seminar in Colorado this year. It is inscribed AMERICAN NUMISMATIC ASSOCIATION with a picture of the ANA headquarters in Colorado Springs. The interesting thing about it is that it is rolled out on Colo 140 D E F G and H, as well as on a U.S. cent. They are available from ANA for 25¢ +SAE in Colorado Springs. That's 25¢ each.

Irwin Reuben reports picking up two of Ohio 625 B from a coin dealer, for our New Finds Dept. He also picked up a stranger inscribed CINCINNATI'S CENT RAPID TRANSIT around the bust of a man, WM 20 Sd, with a Civil War token reverse: THE UNION MUST AND SHALL BE PRESERVED. I have no idea what is meant by "Cent Rapid Transit," but am certain it is not a fare token. Any ideas? In the same department, the Editor recently acquired, by swap, the Wash 840 V listed in the February 1980 Supplement. I'd like to learn more about when and how this token was used.

A new token, much more attractive, has been issued to supplement the supply of NY 630 AW, we understand. AW continues in use on the Triborough, Whitestone, Throgs Neck Bridges, and in the Queens Midtown and Brooklyn Battery Tunnels, on all of which facilities the toll has gone up from 75¢ to \$1, according to information supplied by AVA member Mark Aldighere. 630 AU and AV are no longer in use; the facilities which formerly used AU now charge 60¢ cash. The New Issues Service will supply the new \$1 token to its members.

We have the new Parking Token Supplement but ran out of room for it. It will be in the September issue which will be published as soon as I have enough material for a respectable issue. We shall resume publication of Personal Token Supplements as soon as the new Personal Token Catalogue prepared by Jim Hemphill and Joel Reznick is ready. See announcement elsewhere in this issue about this much-needed book.

The 30th annual convention of the American Vecturist Association was called to order by President Joel Reznick at the Viscount Gort Motel in Winnipeg, Manitoba, on August 9, 1980, at 9:15 a.m.

Members and guests in attendance were: Warren and Mary Paynter, Bary Uman, Ed and Nancy Linden, Bob and Joan Kloida, Karl and Carol Gabsch, Bud and Liz Carmichael, Al and Hazel Hendrickson, Bill, Carla and Janet Lonney, Nick and Beverly Plencner, Harry and Berna Sailor, Paul Sunningham, Gerald and Irene Johnson, Bob and Irene Regalia, Jim Wilcox, John and Mavis Curtis, Robert Rieder, Clay and Elizabeth Welty, Toby Frisbee, Donald and Steve Mazeau, Quincy Laflin, Floyd and Martha Barnett, Jim Hemphill, Jack and Norma Smith, Frank and Bernadine Kelley, Elmer and Janet Sabol, Don, Louise, Julia and Andrea Smith, Bob and Lorraine Kelly, and Paul Pancratz.

The Secretary read the re-composed minutes of the 1979 convention as published in the September, 1979, issue of The Fare Box. The minutes were accepted. The Secretary also read his 1980 report to the convention, which showed a net gain of 19 members during the year.

The Treasurer's report was ready by Mr. Frisbee and was accepted pending audit by the finance committee members, who were Don Smith (chairman), Jim Hemphill, and Harry Sailor.

Mr. Reznick read the Editor's report and the report for the Catalogue Committee, both submitted by John Coffee.

There being no old business, President Reznick opened the floor to new business. The following topics were discussed:

1. Non-profit organizations and postage rates. No action was taken, but it was the consensus that First Class Mail should be continued.
2. Discussion of Convention attendance. Mr. Lonney was appointed as Convention Publicity Manager with a charge to improve attendance by improved publicity, incentives, and other means.
3. Discussion of life membership fees. No action was taken as it was determined that fees are the responsibility of the Executive Board. It was the consensus of the convention that a sliding scale should be established based on age. Suggested rate groups were age 18-39, 40-49, 50-65, and over 65. President Reznick will bring the matter to the attention of the Executive Board.
4. Discussion of convention cities. President Reznick announced the selection of Salt Lake City for 1981, the probability of New Orleans for 1982, San Diego for 1983, and Chattanooga for 1984. There was considerable pressure from the Canadian members present to include either Montreal, Toronto, or Victoria, for one or more of those years.
5. Other convention matters were the process for setting convention rates, and whether to continue to work at a break-even rate, or to change to a profit-making rate. No action or votes were taken. It seemed to be the consensus of the convention that rates should be held at a point that would attract the most members, thus improving auctions, exhibits, and trading potential from a large attendance.
6. Other matters discussed were: the personal token catalogue of tokens and its format, the schedule of events of the current convention, and the articles written by George Cuhaj. No action was taken but it was the consensus of the convention that the Cuhaj articles should be reprinted in The Fare Box.

The morning session of the convention was concluded with the appointment of the Resolutions Committee, consisting of Barry Uman as chairman, with Bill Lonney and

Gerald Johnson as members.

The afternoon session opened with an announcement by the president that The Fare Box Literary Award recipient for 1980 was Harry Campbell for his article on The Sheffield & Haeley Omnibus Token.

The report of the Resolutions Committee was then presented, as follows:

1. To commend Joel Reznick for his efforts to make the 1980 Convention a success.
2. To commend the officers for their dedicated service during 1980.
3. To commend John Coffee for his outstanding contributions as Editor.
4. To commend Harry Campbell for his literary award.
5. To commend Bob and Anna Butler for another outstanding Roster.
6. To commend Jim Hemphill for his efforts towards a successful convention auction.
7. To commend John Nicolosi for his 25 years of service to the New Issues effort.

The report of the Resolutions Committee was accepted.

The Finance Committee report was then read by Chairman Smith, and the recommendation to accept the financial reports was accepted.

The convention was adjourned at 1:45 p.m.

Respectfully submitted,

DONALD N. MAZEAU, Secretary

= HULA GIRL TOKENS NOW SELL FOR \$1 IN HAWAII =

Bill Del Palacio recently visited Hawaii and purchased a HI 240 E for \$1, attached to a blue card, each side of which is reproduced below.

HIGHLIGHTS - WINNIPEG AVA

By Gerald Johnson

The clear bluebird weather of Central Wisconsin was far behind when our 727-200 jetliner slid through the heavy overcast to touch down at Winnipeg international airport Tuesday, August 5. The light rain and cloudiness was to remain with us through the full six days of our Canadian AVA adventure. The trip through Canadian customs was friendly and brief, and a call to the Viscount Gort quickly brought the courtesy van to whisk us to the hotel by 12 noon.

After unpacking we adjourned to the lobby to prepare for a walking trip of the Portage Saint James shopping area; and there chatted with Bob Kloida of Marinette, Wisconsin who had just driven in. With our non-collecting guests, Bob and Jonita Regalia, my wife and I struck out on foot into the Polo Park retail area, the first of a dozen excursions into this busy ex-suburb, now part of the city of Winnipeg.

Wednesday's agenda included a tour of the city in the double deck bus (no tokens used) and a serene cruise on the tour boat "Paddleboat Queen" (no tokens used). That evening at the mailbox outside the hotel we met early arrivals Clay Welty and Toby Frisbee who had driven in that morning.

On Thursday, the day prior to the opening of Winnipeg AVA we rented an automobile to canvass the local antique shops. Our driver, Bob Regalia, was a veteran of Milwaukee, Chicago and Minneapolis city driving, and zipped and weaved through heavy bus and auto traffic without mishap. Several antique shops handled tokens, and I added several nice pieces to my collection. In one of the Portage avenue antique shops we ran into Jack Smith, Bob Kloida and Frank Kelly, rumaging through a big basket of tokens and medals.

We then drove to the Royal Canadian mint, which is located in a large field outside town, and toured the beautiful and functional factory, where square coins for Bangladesh were being produced on the presses during our visit. Souvenir mint tokens showing a view of the mint were on sale, as well as Canadian coins in sets and holders.

When we returned to the Viscount Gort, the "man with the hat" Joel Reznick, had arrived in his 27 foot travel trailer, and we also met Tex and Martha Barnett and Quincy Laflin of Minneapolis who had just arrived.

The Winnipeg bus system was great, operating on a 40¢ cash fare, with student passes and 10¢ pass and fare for senior citizens, the system is heavily used, in some cases standing room only! Portage avenue buses ran at 5 minute intervals.

Friday was reserved for a trip through the excellent Winnipeg Museum of Man and Nature, and the late afternoon and evening assigned to meeting and greeting the now assembled vecturists.

Gathered in the 6th floor Rotary Room when we arrived were several sellers, and many eager buyers. Due to its rather remote location, most people attending had flown to Winnipeg, and sellers stocks were sparse. The exception was Clay Welty of Colorado, who sold a "ton", and then "reloaded up" in the Saturday afternoon auction. While we shopped the bourse, signed programs and socialized, the President and single board member attending (Bill Lonney) held a board meeting in the Reznick trailer. After evening lunch, activity at the Rotary Room was light.

Saturday's AVA business meeting was well attended and completed by noon break. Lunch break meant exercise for Frank Kelley and I, we strolled to Polo Park Mall for good conversation, token stories, and a sandwich. The afternoon auction was mixed, some 25¢ tokens commanding 30 to 40 times catalog, while others went begging at catalog. Wise mail bidders could have done very well at double to 3 times catalog in this auction!

The Saturday evening banquet had been set back to 7:00 p.m. giving all concerned a bit more time to unwind before the beautifully catered event.

Prior to and during the meal, a Winnipeg disc jockey entertained with an excellent selection of taped american music. The acoustics of the room however were not conducive to fine music, but overall his efforts were well received. The food was beautifully prepared and presented; salmon, shaved ham, barbequed ribs and Swedish meat balls, plus loads of fine side dishes and salads. The small cash bar was well received, and our young bartender was witty and charming.

The railroad talk by Jack Sine was informative, and his slides gave us a nice preview to the ride in the Prairie Dog Central scheduled for Sunday.

Sunday dawned heavily overcast, but enthusiasm was apparent at 10:45 when our assembled group filed to the nearby Canadian National Saint James station. Soon old #3 rolled into sight pulling the wooden cars we were to ride in. The 1882 locomotive and seven cars were a thing of beauty to behold, a real labor of love for the Winnipeg rail fans organization. Most AVA members assembled and rode in Combination car #103 which was of 1908 manufacture.

The shutterbugs were out in number, nearly every AVA member alternately posing and snap shooting. When the old train eased out into the prairie you could see nothing but rich black farmland, mile after mile.

At Grosse Isle, we left our car while the steamer engine and one car were turned for the return trip, and again the cameras were busy. (We all missed our "instructor" Syd Joseph)

Every youngster on the trip, be they 3 or 73 years, enjoyed and savored the ride, and the steam whistle stirred more than one memory in the hearts of the old timers.

On the lighter side, the Reznick family won the undisputed "food consumption on the train" trophy, while Ed Lindens' children gave the best "chug chug" and whistle imitations.

As the train pulled into the CN station to return us from the past, nearly everyone felt a little sad that the trip was ending, and with it the 1980 AVA convention. It was raining lightly, and we never did get to thank Joel Reznick for his superb convention.

Winnipeg will hold many memories for us, the Portage Avenue horsecar at the Old Spaghetti Factory restaurant, the Channel 6 Environmental Canada Weather (in celsius - not fahrenheit), and the way the big Air Canada jets seemed to just clear the roof of the Canadian Indemnity building as they approached over Polo Park.

The tour book says Winnipeg means "Muddy Water" in Cree Indian language, but to us, Winnipeg meant a great convention!

= NOTES FROM THE DELAWARE VALLEY =
By Bill Lonney

Al Zaika reported to me that the comments of both dealers and visitors to DVVA sponsored 4th Annual Token & Medal Show indicated that the event was a success. This was certainly not surprising, with a knowledgeable and energetic program chairman such as Al in charge of the two-day event. There were 283 registered attendees and probably a few more who failed to sign in, an increase over all previous shows. Fifty-one AVA members attended including the following dealers: Aqua, Aquilino, Cunningham, Grinolds, Hall, Hamilton III, Hartzog, Hitt, Lange, Joe Levine, Lipscomb, Pipher, Tanenbaum, Schenkman, Watley, Weiss, White, Woodbury, and Zaika.

On Saturday the activity at the bourse tables extended well into the evening when the auction was competently conducted by Joe Levine of Presidential Coin & Antique Co. Prices realized for the few transportation tokens were as follows: AK 15 B, \$68; CA 725 A, \$45; GA 750 C, \$95; MI 530 E, \$37; PA 15 D \$25; TX 55 B, \$45; WI 840 A, \$75.

For token collectors, especially those in the East, this show provides a welcome punctuation mark in our token year between AVA Conventions. Our sincere thanks to Al Zaika for his effort and our appreciation to all those members and wives who manned the registration table.

Two other DVVA members deserving a belated and special thanks are Dave Biles and Doug Peters, for organizing our outing to the Shade Gap Electric Railway in Orbisonia, Pa. These two gentlemen put a lot of time into planning and coordinating the schedules so that we had a memorable day riding the various trolleys, holding our meeting on the enormous Chicago & Elgin 311 car, riding the East Broadtop RR narrow gauge passenger train, and touring the railroad shops. Both Dave and Doug were gracious and personable hosts to the DVVA members and wives. Joe and Cindy Pernicano, Karl and Carol Gabsch, George and Katherine Goeller, Warren and Mary Paynter, Henry De Gregorio, Mark Cohen, George Donahue, and Bill and Janet Lonney. Other AVA members present were Donald Dietzel and wife Judy, Ron Benice and wife, and George Diehl from nearby Fort Loudon.

P A T N I S
By Karl W. Gabsch

It has come to my attention that certain members feel that the \$20 entrance fee for the Parking Token New Issues Service is too high. Perhaps so, but when one must pay a higher price for parking tokens than years past, it doesn't take long to deplete a given balance. I certainly wish you who are dissatisfied would write to me. I'll do my best to enlighten you on our set-up.

Trying to keep everyone happy, we shall lower the entrance fee to \$10, and hope this is in accordance with their wishes. Quite a number of members sent in their \$20, so I feel that perhaps I wasn't remiss in asking for that figure. Time will tell. But to give one example, our first shipment is over \$5. Two of these tokens have a dollar value, which we won't have every month, but that shows how an account can be depleted quite rapidly.

Also each member is given a set of guide-lines which we feel is of mutual benefit. For when one does a service such as this we feel certain standards should be upheld. So now let's hope this will bring many more to our new venture, for we would be very happy to have them join.

This month we send PATNIS members 5 parking tokens for some, and 6 for the lucky ones. We couldn't get enough of IL 3640 Fa and Fb for all so we resolved to our lottery.

Our trip back from the Winnipeg Convention was fruitful to a degree in acquiring those elusive rascals, so all was not in vain. We met quite a number of old friends at the convention and made many new ones. All in all it was a trip that will hold many happy memories for us. Too bad more didn't show, for they truly missed a good time.

PRESENTATION PIECES (Reported by Ron Etchells)

AS WM 16 Bar (Same as NY 10 S but white metal; 65 specimens struck)

The Evansville, IN, listing is for a full fare of 35¢, which is the rate for both adults and students. The fare for seniors and the handicapped (with I.D.) is 15¢ between 8:45 a.m. and 2:15 p.m. We were not given information about when the token went into use.

The Mo 665 B is quite similar to 665 A. These tokens were used on a private toll road between Oakwood and New London, Mo., a distance of about 20 miles. It became a public road in 1920, which indicates use of the tokens before that date.

We had found the information about NY 631 X in the Meyer & Wenthe records and asked Joel Reznick to check it out for us. He was able to learn that the tokens were struck in 1976 for the Port Authority of New York. The tokens were sent to Airway Equipment Rentals Company, who decided not to use them after receiving them. The tokens had been intended for use at Kennedy International Airport in Queens on a bus that connects various airport terminals. Instead they decided to use tickets, and the tokens have been sitting there ever since. Joel, after much negotiating, was able to secure a supply of 175 of these tokens for us, and that is all that will ever get out, as they were reluctant even to part with these. So the New Issues Service will handle this one.

The Gatlinburg, TN, tokens are used on an auto trolley which patrols outlying parking lots used by tourists visiting Gatlinburg and its surrounding attractions, a convenience inasmuch as downtown parking is limited. The fare is 10¢ or a token which is available at many motels. The reason for having both brass and aluminum tokens is not known by us.

We lack any information about TX 385 A. On 495 A John Byars states that Legion is a town two miles south east of Kerrville. TX 810 L is a new listing since the Freiberg file definitely states that 810 G is red plastic (underlined twice). I have never seen 810 G but Coffee has seen and verified the specimen listed this month.

Little is known about the Unidentified listings. 198 probably from North or South Carolina. 199 and 200 may be of Texas origin.

The 1980 AVA Convention tour token is a Canadian issue this year. Members who attended the convention received a specimen. The New Issues Service has a supply available to members who collect all available issues plus those who collect Canada.

Floyd Hartley informs us that a covered bridge has recently been constructed in Frankenmuth, Michigan. One must pay \$1 to drive across the bridge (pedestrians are free) and he receives a token redeemable at either of two restaurants on the other side of the bridge. Tokens have been issued in aluminum, bronze, and "goldline." The token is described thus:

BRIDGE CROSSING KEEPSAKE TOKEN / HOLZ-BRÜCKE / COVERED / BRIDGE /
FRANKENMUTH / MICHIGAN / DEDICATED / 1980 / THE FRIENDLY,
HISTORIC BAVARIAN COMMUNITY (COVERED BRIDGE) tm

39 Sd Good For / \$1.00 / Only in Trade / at Zehnder's / or / Bavarian
Inn / Restaurants / Willkommen to Old World Gemuetlichkeit
(reeded edge)

Inasmuch as these are only souvenirs ("keepsake token" on obverse) and not good for the payment of toll, we cannot list them. However, Floyd says they are available. The set of 3 tokens sells for \$3 + postage. I assume anyone interested should write either of the restaurants. The ZIP is 38734.

Gene Godsoe, our Varieties Specialist, reports that Kans 970, listed last month, comes in 2 die varieties. Check where the top of the A in MTA aligns above on Obv. and Rev. The New Issues Service sent out this token but wasn't aware of the variety before mailing. It will be pictured in the forthcoming Varieties Catalogue.

On Tex 825 A, add a period to obverse after TEXAS. The listed token was examined by a member of the Catalogue Committee and earlier oversight was noted.

Conn 210 C seems to exist both with & without an apostrophe on the obverse in CONNECTICUT'S. The horizontal lines of the E in LARGEST are shorter in the specimen I have seen of the brass token without apostrophe. I have also seen a token that tends towards copper without the apostrophe and short E horizontals. Does an issue exist towards copper with an apostrophe?

The presentation piece is the same as the recently issued NY 10 S but in white metal. The company ordered 65 tokens in white metal. Most will be used in lapel pins which will be distributed to board members and staff. There were two orders of NY 10 S. The first had large cut-outs and was distributed by the New Issues Service. The second order had small cut-outs (we don't list cut-out die varieties) and was offered for sale by Ron Etchells in the July ad section.

= AUGUST NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

Convention time has come and gone and now we look forward to the next one in Salt Lake City. I'm hoping to make that one. The Convention token for Winnipeg has been mailed to all who are on my list and to others who ordered it. A few are still available if you want one. Again we thank Joel Reznick for making these available to us.

As we had lots of new issues piled up for distribution I decided to send a second "sending" for August. So by the time you get your "August" Fare Box these tokens should be in your possession (if your account has enough to pay for them).

First, Canada BC 800 E, the Sea-Bus token. These were obtained thru a Canadian friend and Hal Ford. This one was listed in the December 1979 Fare Box. Second, Ind 280 H, thanks to George Gentle for making arrangements for me to purchase this one.

Third, NY 630 AT. These have finally been released from the authority's safe and are now in use. We thank George Cuhaj for his part in getting them to me, as well as so many others in the past. He's already working on more for us! NY 630 AT was listed on page 122 of the 1977 Supplement, or rather space was held for it; but note that it is not 20mm as we then thought. Fourth NY 631 X. We thank Joel Reznick for getting these for us. Fifth and sixth, Tenn 320 A and B. I want to thank Hal Swann for his wanting to help and for his help on these two, and then Joel came through again for us.

Thank you one and all, gentlemen. We of AVA and NIS appreciate your efforts.

This month we welcome Mel Fox as one of our regulars, and Colonel Bill Murray to associate status. Welcome to both of you!

= OAKLAND, SAN LEANDRO & HAYWARDS ELECTRIC RAILWAY =

Among the most desirable transportation tokens are the extremely rare painted celluloids of California. Two of these, Cal 575 B and C, were issued by the Oakland, San Leandro & Haywards Electric Railway. These painted celluloids all seem to have advertisements on one side, and their great rarity has long had me wondering if they really had much use. Apparently they did. Comes now a note from Erle Hanson enclosing a copy of an ad which ran in the Oakland Tribune on February 4, 5, and 6, 1894. The ad reads: *CELLULOID CHECKS. 25 FOR \$1. Good On Any Fare Division of the Oakland, San Leandro and Haywards Electric R'y FOR SALE AT...* there follows a long list of drug stores, haberdashery stores, a grocery store, Rhode & Co.'s Hotel in San Lorenzo, and of course the company office at 908 Broadway in Oakland. If one could only go back for a moment in time and buy a dollar's worth of those tokens! Latest sale figure for one of them was about \$200.00.

= COMMENTS FROM THE VICE-PRESIDENT =

I wish to thank my friend Barry Uman for taking my place at the Convention this year in Winnipeg and announcing that Harry Campbell of Salt Lake City was the winner of the coveted Fare Box Literary Award, for his excellent article on the "Sheffield and Heeley Omnibus Token - England 685 C," which ran in the September 1979 issue.

It was a great honor for me to serve as moderator chairman of the Literary Society this past year and we did have the pleasure of visiting Mr. Campbell at his place of business (on the evening of the banquet) and telling him that he had won the award. Harry was really thrilled and quite surprised. He was speechless for a few minutes and those of you that met Harry in Carson City or Louisville, you know that is quite a feat. We've known Harry for a number of years. He is one of the founders of ULATCO also. Again my sincere congratulations to Harry.

I regret that we could not make it to Winnipeg. Had some labor relations problems with the employees, almost the same as last year. We've extended their contracts to the end of the year, so now we won't have any problems in August at Convention time.

Members of ULATCO are starting to put the 1981 Convention together, which they will host in Salt Lake City next August. We can tell you that part of the tour will include an aerial tram ride, a first in AVA history, and it may involve two tour tokens. More later.

A.V.A.'s youngest member, Chad Nulph, and one of his scouting friends, were awarded the first two Cub Scout World Conservation badges, which were given in the Great Salt Lake Council, B.S.A. Chad recently earned his religion award also. He's going to specialize in half-fare and school transportation tokens.

Harry Campbell asked me to give his book a plug. It's hot off the press, entitled *Campbell's Tokens of Utah*. It is a huge undertaking on his part. A comprehensive study of nearly every known token that has been issued in the state, covering a period of over 100 years. Profusely illustrated with photos and rubbings of over 3,000 items, good fors, trade, merchants, transportation, etc. To AVA members the price will be \$29.95 plus \$1.40 for postage & handling. Total cost \$31.35 (see ad in this issue).

There has been no word on my missing SAMBO woods, but we know they are there, somewhere. The reward still stands.

Until next time, best collection from the 1979-81 Veep...

- Roy D. Nulph

= NEW PERSONAL TOKEN CATALOGUE SOON TO BE READY =

The listing of AVA personal tokens has become a major activity. When Joe Kotler and I created this hobby some fifteen years ago we never imagined it would become as popular as it is today, with some personals bringing upwards of \$20 each! Our current catalogue, the one that sells for \$1, is sadly obsolete, with a large number of supplements having been issued since. So we needed a new catalogue which would be permanent.

"Permanent" is impossible of course. But we've come as close to that as possible with our new catalogue. It will be loose-leaf, six 6"x9", with one sheet for each member who has issued a personal. Thus additions may easily be added, in place, and new sheets for new members who issue personals.

Our new Personal Catalogue was compiled on forms developed by Jim Hemphill, and the whole copy was typed by him. Printing is being supervised by Joel Reznick. The book will be dedicated to persons who have been honored by the AVA Tribute Fund, and to those who have contributed to the Tribute Fund, all of whose names will appear in the catalogue in a preface. Thanks to a generous contribution from Bob Ritterband's Tribute Fund, the Personal Catalogue is for sale to members at far less than the cost of printing it.

The price is only \$4.00, loose-leaf and punched for 3-ring binder. It has about 250 sheets (500 pages). It will be mailed when ready (before Christmas). Add \$1 for 25 extra blank ruled pages for additional issues. Send your \$4 (or \$5) check to Joel Reznick - 208 S. LaSalle St., Room 1510 - Chicago, IL 60604.

- J.M.C.

1980 AVA TOUR TOKEN from Winnipeg Convention available for \$3.50 while they last. Only 400 struck this year. Include SAE please.
BEAUTIFUL AVA LAPEL PINS, available with clutch back or pinback (specify which) for sale for \$2.50 postpaid.
Joel J. Reznick - 208 S. LaSalle St., Room 1510 - Chicago, IL 60604

Volume 34, Number 9

SEPTEMBER, 1980

Our 399th Issue

October 15. Kenneth Smith informs me that he has just received from the printer the copies of his new catalogue of foreign transportation tokens, which covers ferry, ship, and canal transportation tokens and passes. He is quite pleased with the results, and those who have ordered the book from him should be receiving their copies presently. The next volume, on which work has already begun, will cover horsecar, omnibus, streetcar and bus tokens. These books are of vital importance to those interested in overseas transportation tokens. Inside this issue is a full page announcement by Mr. Smith about the new book.

Within this issue are a number of photographs of tokens from my collection. We are able to include photos of tokens if the resolution is good and clear. But it's impossible to get a good image of just about any other kind of photograph. The stencil maker can only image high resolution pictures. So photos of streetcars, ferries, or people, for instance, just can't make it on this machine. In the same vein, if you send me an article for publication, it really helps if you can make your copy "camera-ready." That is, type it neatly, single-spaced, on a standard 8 1/2 x 11" piece of white paper, and leave at least a 3/4" margin on all 4 sides. That way I can just feed your article into the stencil maker and I don't have to type it over. Any article that takes half a page or more should be sent in for reproduction on the stencil maker. It cuts down on My time in preparation of issues immeasurably.

We have plenty of new application blanks, with information about the A.V.A. on the back, to send to prospective members. If you would like me to send one directly to someone, just give me his name & address. I'll send the blank directly to him and write your name on the blank as sponsor. When a non-member writes me directly for a blank, I always sign my own name as sponsor unless he mentions that a member suggested that he wrote, in which case I write in the name of that member. Occasionally I get a request for a blank from a non-member who neglects to inform us that a member told him to write. So he gets a blank with my name on it. But if you recognize an applicant whom you put in touch with us, let me know and we'll give you credit. This came to light recently when Joseph Radomski (#1884) wrote to inform me that it was he who asked new member Pete DiBernardi to apply for membership. So change the sponsor for AVA #1900 from Coffee to Radomski. I am delighted to set the record straight. A final note: if you want us to send a sample of The Fare Box to someone, please

send 28¢ postage. We'll supply a free copy if you'll supply the 28¢. For an application blank we appreciate 15¢ postage but it's not necessary.

In going through Ralph Freiberg's collection, which I purchased in the summer of 1979, I am finding all sorts of die varieties. It is not often that one person is able to compare, side by side, two examples of a census token. Now with Ralph's collection and my own I am able to do this for quite a few tokens. For instance I have found an interesting die variety on GA 750 B. One type has 5-pointed stars on reverse, the other type has 6-pointed stars! I obtained my token (5-pointed stars) when I bought a small quantity of tokens from Jackson, Tenn., from the last president of the old streetcar line there. Mixed in with the TN 375 C's was one worn GA 750 B, a much rarer token.

I also discovered minor varieties on WI 510 C, the Milwaukee horsecar token. The token comes with two slightly different types of car, a variation which we find on a number of horsecar tokens. I also found a third variety of KS 550 A. So now there are 3 die varieties of the 550 A...at least.

Then going over the Lancaster, OH, celluloids I found something really startling. Ralph had in his collection a token like OH 440 E, except that Ralph's token is definitely 22mm (and not 23mm), and his token is perfectly opaque, whereas all the Lancaster celluloids except 440 B are translucent. I suspect this 22mm token is one of the earliest used. If any other collector has absolutely opaque Lancaster tokens I would be interested in hearing from him (not counting the 440 B, all of which are opaque).

And finally, examining the NE 980 A in Ralph's collection, I noted that his is a different die variety from the one in my collection. I am putting 2x enlarged photographs of these two types below, and hope they come out clearly.

Just before AVA member Bill Carr died, he had ordered a personal token. Joel Reznick has obtained the entire supply of this token--they arrived just the day before Bill died--and Joel will send one to any member in return for a stamped addressed envelope. Write Joel at Suite 1510, 208 South LaSalle Street - Chicago, IL 60604.

Finally I am inserting 2x enlarged photos of the two rarest tokens from the Philippines, 100 A and 400 A. 100 A is from Bulacan, not "Balacan" as printed in Atwood.

WI 500 Bb

It is my intention over the coming year to do a series of articles on tokens that picture the streetcar. In going over my collection it occurred to me that certain types of streetcar recur on tokens of different cities, indicating a common manufacturer of the tokens. I am beginning the series this month with a discussion of those metal tokens which picture what I call the "Streator" type of car. I call this car the "Streator" type since the first one we come to in the Catalogue is that from Streator, IL 820 A. Above, and on the preceding page, are 2X enlarged pictures of obverse and reverse of all known major and minor varieties of tokens that picture this type of car, with one exception. The exception is what I call IL 820 Ab, a picture of which is found on page 176 of Atwood. Unfortunately it's not a good picture, but the important difference between Ab and Aa (the latter pictured on the previous page) is the style of streetcar, which varies slightly between the two tokens. I discovered this variation years ago when examining Max Schwartz' collection. He had the Ab and

immediately I noted a difference between it and the Streator token in my collection. The Schwartz specimen, since purchased by Duane Feisel and later sold by him, has a much larger ground area, coming to a point, than is found on the 820 Aa tokens. So far as I know, the Schwartz token is unique; all other 820 A's are of the Aa type.

The Streator token is also unique in this series in that it is the only one with a center hole and, like all the others, was probably struck in the 1890's.

Then we have the aluminum tokens of Muscatine, IA--the only aluminum tokens showing this style of car. For some reason the fare in Muscatine must have gone either up or down some time after the 640 B's were placed in use. Accordingly the 640 B's on hand were counterstamped "5¢" to indicate the new fare. The counterstamped tokens are quite a bit scarcer than those not counterstamped. Muscatine Electric Railway operated from 1893 to 1913.

Nevada, Missouri, has provided us with an octagonal school token showing this type of car, this being the only school token in the series. The round adult token of Nevada comes in two significant die varieties: 640 Aa having the two stars at the left of the obverse closer to the "N" of Nevada. The 640 Aa is somewhat scarcer than the 640 Ab. But the rare one is the octagonal school token, which is census.

The octagonal Spokane token is the only one in the series which is not from the Middle West, and apparently it was ordered but never used. Back in the 1940's and early 1950's collectors visiting the office of Spokane City Lines would be given, free of charge, a single specimen of this token in perfect condition, with the explanation that it had never been used. I doubt if the tradition continues today, and don't know if they finally gave away their last token or if more of them are sitting in the sack somewhere. It's a beautiful token, but not especially rare.

Then we have the two minor die varieties of the Merrill, WI 500 B token. The differences are evident from the photographs. There is also a very slight variation in the streetcars pictured on the two tokens, the rear platform sticking out just a bit more on the 500 Bb than on 500 Ba. Back in the early 1960's a collector was able to obtain a small quantity of 500 B, so they aren't that scarce anymore. I believe the 500 Bb is the scarcer of the two types.

The streetcar pictured on these tokens is an early type with open platform and no trolley pole: obviously it was meant to be a horsecar rather than a trolley car, but since horses are not shown it could be used by a firm which had electrified, as had most of the users of the token before they retired from business or were taken over by another firm. Certainly the same token manufacturer struck them all, and the same engraver probably made all of the dies. Since all the tokens were used in a comparatively small area of the Midwest--except for the Spokane token--the token manufacturer probably was in Chicago or St. Louis.

At the beginning of this article I have also included photos of obverse and reverse of NY 630 P because of the similarity of the streetcar shown on that token to the "Streator" type of car on the other tokens. The Third Avenue RR token has six windows and a flat roof; the Streator type car has nine windows and a short clerestory on its roof. But otherwise the cars are remarkably similar, although the NY 630 P certainly was struck no later than the 1860's, and probably before that, while the Streator type tokens were struck no earlier than the 1890's. So we have a thirty year time differential here. The question arises, Did the same firm that struck the Third Avenue Railroad tokens also make the "Streator" type tokens, or did an engraver of the firm that made the latter tokens merely copy his streetcar from the Third Avenue token?

We have here, in any event, six major types of tokens picturing the same style of horsecar, plus a counterstamp and two minor varieties. It is not difficult to acquire all of them, although the IL 820 Ab will be a problem. These are extremely attractive tokens, with beautiful detail on the streetcar.

Next time I shall discuss the "Gettysburg" type tokens, of which there are only three, and they all have the same number on the streetcar shown: 206, along with the word "electric" in case the casual observer should miss the trolley pole.

= CENSUS OF RARER CANADIAN TRANSPORTATION TOKENS =

By J. Douglas Ferguson

Several times over the years we have had the advantage of a census of rarer United States transportation tokens. With the concurrence of our Catalogue Committee it has now been agreed that a similar census be taken of the rarer Canadian tokens.

We would appreciate if all members would advise me of any of the following tokens that are in their collections. Also if you have knowledge of any of these tokens being in museums, in non-members' collections, or in dealers' stock, please provide this additional information in as complete detail as possible. Let us be accurate.

In Canada where the collecting of tokens has long been very popular, an appeal for information will also be made to members of the Canadian Token Collectors Society, in order to reach those who at this time are not our members. I hope as a by product that they will join our society.

Here are the tokens I would like to have reported to me:

British Columbia 300 A B C D, 600 A B, 625 A, 800 D, 850 D.

Alberta 800 A B C.

New Brunswick 300 Aa Ab

Nova Scotia 75 A B C, 200 A B, 850 Aa Ab B.

Ontario 100 A B C, 160 A, 260 A, 280 A, 310 A B, 325 B, 400 B G, 450 A, 475 A B C, 525 A, 575 A, 600 A, 625 A B C, 640 A, 650 A B C, 660 A, 675 A B C D E, 700 A B, 725 A B C D, 750 A (please let me know if 35.5mm or 34mm; the ornaments are also different), 750 B C, 775 A B C D, 825 B C D E F, 850 A B, 875 A B C, 890 A, 925 A, 940 A, 950 A B C D, 960 A, 999 A B.

Quebec 345 B F, 620 A B C D E F G H I J K L M N O P T U V X, 620 Z AA, 745 A B C D E F G, 900 A, 997 A B, 999 A.

The results of the survey will be published in The Fare Box. Please cooperate without delay.

J. Douglas Ferguson - Box 38 - Rock Island, Quebec J0B 2K0

= SEPTEMBER NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

This report follows on the heels of the August report. There were two sendings mailed to you in August and all should be in your possession by now unless your account is not up to par.

I am going to have to hold up sendings of new issues to any member if his or her account is lower than \$2.00, or in debit. I hate to keep harping on this, but tokens cost money. After one month if your account is still too low you will be automatically dropped from New Issues Service and another will move into your place.

This month you will receive 3 nice tokens, two of which are again from New York, which makes four New York tokens sent you in the past two months. First you will get NY 230 K, thanks to George Gentle for his cooperation, as well as on the Michigan token. Second, NY 630 BA, a very nice-looking token, much better looking, and made of better metal, than the previous TBTA tokens. Here again we thank our faithful friend George Cuhaj for his continuing effort in our behalf. The third token you will receive is Mich 530 P, obtained through the efforts of George Gentle. Again, thanks to both of you, Gentlemen.

This month I welcome W.H. Nelson to regular status of the New Issues Service.

My 25th Anniversary personal token available to anyone who wants one, for a stamped addressed envelope.

= BE SURE TO NOTIFY THE FARE BOX IF YOU MOVE =

= THE FIDELITY BANK ZONE TOKEN OF HOUSTON, TEXAS =
By John W. Byars

Editor's note: recently John Byars sent me seven unlisted tokens to examine for him. Among them was a 23mm bronze token with an aluminum anodized blue center, inscribed FIDELITY BANK HOUSTON on obverse, and ZONE TOKEN on reverse. His story of how he obtained this token is related below.

The Fidelity Bank piece came out of a bag that was about half and half with the piece that has "Zone Token" on both sides. I was able to get 3 pieces and the rest were melted. Now for the story. Several years ago I went to the bus company and found that they had a vault full of bags of tokens. The only tokens that they had gotten rid of from the days of Houston Electric were the ones that they exchanged with other companies. They had approx. 100 bags of the Houston Electric and Houston Transit tokens. I was looking for the Yale Street tokens and all the odd pieces that had accumulated over the years. I was finally told that if they got rid of them, they would all have to go, and further that everything with HOUSTON on it would have to be destroyed. I tried to get them to sell them to a large metal dealer, with a certificate of scrap which is a guarantee that they would be destroyed. They wouldn't go for this, saying that they wanted to see them destroyed. I had a hard time getting anyone to agree to melt them due to the zinc in the WM pieces. They knew they would get into trouble because of the smoke from the zinc.

Anyway, I found a small foundry outside of town that agreed to help. We sure smoked up the neighborhood. We ended up with about 1,700 pounds of brass slag which brought 12¢ a pound.

In pulling the bags out of storage, I found the bag with the Fidelity Bank tokens. We were checking each bag for the Houston tokens, and I wanted to put these aside, but they had Houston on them. I put the Yale Street tokens aside, but the Fidelity Bank tokens went with the other Houston bags. The man wasn't interested in anything except doing what he had been told. The bus company's main worry was how much they would lose if the tokens found their way back to the fare box.

My last chance to try and talk them out of melting them was to be at the foundry where I set up a time for them to bring the tokens out. I had thought of lots of reasons--different size than tokens in use, I would buy them all at the going price, etc. I got there early the day of the melting and found that they had come earlier and were already melting! I went to the bus company man and asked him if he had seen the bag of tokens that I had talked to him about, and he told me they were already in the furnace! Just before I started to cry, he reached in his pocket and handed me 3 pieces.

I hauled and sold the metal for them, expecting now at least to be able to deal on what was left. Guess what? The ownership changed and nobody wanted to talk about tokens.

That, along with losing the Fidelity Bank tokens, caused me to give up on them. It's been some time now and I guess I will go try one more time soon.

= SELDOM SEEN TOKEN - MINN 730 A =

To the left is a 2x enlarged photograph of one of the classic rarities, which is also one of the most beautiful of our tokens, used between 1887 and 1898. The design is neat, clean, and simple.

CATALOGUE OF WORLD FERRY, SHIP, AND CANAL TRANSPORTATION TOKENS
AND PASSES by Kenneth E. Smith

By the early 1970s the world transportation catalogue issued in 1967 had grown so large that it would have to be reissued in several volumes. In the October 1974 FAREBOX is an article by me on this problem and some suggested volumes by the coin book distributors. As only a small percentage of the world catalogues are bought by AVA members and the bulk bought by world coin book distributors, what they say they can sell and in what quantities becomes all important. An updated survey 3 years ago came up that outside of Atwood's the best seller would be a World book on Horsecar & Horse Omnibus tokens, which Kirk & I plan to do later. The second best seller would be a book on World ferry, canal, and ship tokens and this is the one being issued this fall as volume 1 of the updated world catalogue series. This book is titled CATALOGUE OF WORLD FERRY, SHIP, AND CANAL TRANSPORTATION TOKENS AND PASSES, first edition, 1981 compiled and edited by Kenneth E. Smith and Kirk S. Smith. For years I have had one of the two great amusement token collections which just sat there as my spare time was devoted to cataloguing world transportation items. In the last few years because of the sudden sharp rise in interest in amusement tokens, I have had to devote considerable time to getting out the amusement token catalog and starting the amusement token collectors association. At the same time work had to be done on this new book and my son Kirk took over and did so much of the time consuming work required to update the ferry, canal, & ship listings, determine from records scarcity & price trends, and verify correctness of listings that his efforts rate him coeditorship of this catalogue. In the 1967 World catalogue I showed a rarity scale that I planned to use in future editions ranging from R10 (only one known) to R1 (very common). In this new book almost 1000 of the better items have listed behind the listing or underneath the listing its rarity and comments. In the last 14 years as the scarcity and demand of the better tokens and passes became known to me, we can now put the average going sale price behind the token or pass. You cannot use a multiplication factor on values in the 1967 catalogue to arrive at these values as we evaluated each item seperated to come up with the new prices. This volume only obsoletes about one third of the listings in the 1967 book, which means for the time being to collect foreign TTS you will need both this book and the 1967 book. In this new book there are lots of listings and information not in the 1967 book. In order to promote sales sufficiently so the world coin book distributors could handle this book thereby making the printing of this catalogue feasible it was necessary to dupe portions of the Atwood catalog on U.S. and Canada ferry tokens and those portions are referenced to Atwood numbers and Atwood prices. We did not update Atwood prices and you will have to use appropriate multiplication factors. The next catalogue that Kirk & I have already started work on is titled tentatively HORSECAR, HORSEOMNIBUS, STREETCAR, AND BUS TOKENS OF THE WORLD EXCEPT NORTH AMERICA followed then by either the volume on World Horsecar & HORSEOMNIBUS (detailed) or the volume on Railroad tokens and commemoratives of the world.

This catalogue is printed by the same printer that printed all the Atwood bound catalogs and my 1967 book and is a hard bound cover as before in a very good grade paper. The price of this book is \$10.00 postpaid until December 10th, 1980 at which time it goes to \$10.00 plus \$1.00 postage & packaging as orders after dec. 10th will be mailed next year at the new higher book rates by the postal dept. Autographed if desired by both authors. Send your check or M.O. to me and payable to me. Kenneth E. Smith 328 Avenue F, Redondo Beach, Ca. 90277

= SUPPLEMENT H-8 TO FEISEL'S CATALOGUE OF PARKING TOKENS =
By James H. Hall

Please send all new token issues to me, SASE, whenever possible. If this cannot be done, please send legible rubbings; be sure to include the size of the token and the metal content.

ILLINOIS

Melrose Park 3555

C Bz 23 Sd Delete this listing. It is a vending machine token used by Zenith in their Rauland Division Plant. It has never been used as a parking token.

Oak Park 3640 (Reported by Gabsch)

F Wm 22 Sd Same as 3640A, except this one is in white-metal and it has the same varieties as does the 3640A.

Good For / 1 Bus / Ride (white lettering)

The mayor of Fairview Heights, IL, verified as a legitimate issue the listed wooden nickel. The "Fair on the Square" was a benefit fair sponsored by the Fairview Heights Jaycees, which featured games of chance, rides, food stand, etc. There were no other tokens used for rides then or later. This event is no longer held, but has been supplemented by another, similar, event.

The new Kalamazoo listing is distributed by downtown merchants to customers. In most instances there is a minimum purchase required. Ten thousand tokens were struck by Coin Craft.

The Elmira, NY, listing was issued as a special fare token distributed to handicapped, retarded, and CETA employees of low income. "JOB CART" (= Jump On Board Chemung Area Rapid Transit) on obverse & reverse was intended to be a telephone number that could be dialed for the transit office. The number was 562-2278. But before it was approved the number was issued to another party. So the name was never officially used by Chemung County Transit even though it did appear on the tokens.

Triborough Bridge & Tunnel Authority (TBTA) has introduced new \$1 tokens for use on the Verrazano-Narrows Bridge, as well as on the Brooklyn Battery Tunnel, the Queens Midtown Tunnel, the Bronx Whitestone, and the Triborough Bridges. The new token was made to correspond to the recently increased tolls at TBTA's facilities from 75¢ to \$1 except on the Verrazano Narrows Bridge, where toll continues at \$1. Tokens are sold at toll booths in rolls of twenty. The drivers can cross free at the time of purchase.

Mr. Coffee mentioned Unidentified #201 in the July 1980 Fare Box. Since we have received no leads as to a location for it, we are now listing it as an unidentified token.

When you write the Editor, or the New Issues Editor, requesting information, a stamped addressed envelope (SAE) would be appreciated, and will insure a prompt reply.

9TH AUCTION OF TOKENS FROM THE THOMAS SPRAGUE COLLECTION

- RULES: 1. All bids must be postmarked no later than NOVEMBER 8, 1980.
 2. Bids will be accepted by Lot # ONLY.
 3. High bids above \$2 will be reduced to 10% above the second
 4. Successful bidders are responsible for postage and insurance and must remit payment prior to shipment.
 5. 10 Day return privilege if not fully satisfied.

Volume 34, Number 10

OCTOBER, 1980

Our 400th Issue

November 19. Together with this issue, if the printer has them ready for me as he has solemnly promised, you will find a dues envelope. This is for payment of your 1981 A.V.A. dues which in spite of inflation and everything else is still only \$7.50, if you pay before March 1, 1981. So please send payment to Toby Frisbee, our Treasurer, as soon as you can. It is of great help to us if we get dues paid early because, quite frankly, we are running pretty close to the line and we need the capital to pay expenses for 1981. Canadian and overseas members please make payment in U.S. funds.

This issue marks a milestone in the history of The Fare Box. Four hundred issues! I've been editor of 382 of them. I accepted this errand when I was a teenager, and the youngest member of the A.V.A. I've acquired a lot of tokens since then, but I still get a thrill every time I acquire another one, rare or common. It is a great hobby and it's a lot of fun, and publishing The Fare Box has been as much fun for me as picking up tokens.

Just received is Kenneth Smith's new *Catalogue of World Ferry, Ship, and Canal Transportation Tokens and Passes*. The 202-page cloth-bound book has excellent photos of hundreds of them including nearly all the U.S. issues (which are included in the listings) and a vast amount of historical data about the tokens and the firms that issued them. Prices are realistic. The book is outstanding, and every A.V.A. member, whether he collects foreign tokens or not, should have the book. Order it for \$10 postpaid, until December 10, from Ken Smith at 328 Avenue F - Redondo Beach, CA 90277. After December 10 it's \$11.00.

Also received is *Virginia Tokens* by AVA member David Schenkman. This is probably the most beautifully printed token book in existence. Included are all the transportation tokens and photographs of nearly every listing, with realistic prices. The 238-page cloth-bound book is in large 8 1/2" x 11" format, and is well worth the \$27.00 postpaid price tag. Order it from its publisher, the Virginia Numismatic Association - P.O. Box 353 - Hampton, VA 23669. This book establishes David as one of the outstanding exnumia cataloguers in America. It's not cheap, but then high quality never is. It would make a great Christmas present for someone close to you.

Above are photographs of a couple of tokens which are not often seen. At left is TX 400 C, which is unique. At right is WI 935 C. When I acquired the latter I sent a rubbing to Harold Ford to compare with the rubbing of Quincy Laflin's specimen in the AVA files. I wasn't too surprised when Harold informed me that my token is a different die variety from Quincy's. So add (Vars.) to WI 935 C. So often when we find a second or third depotel, it turns out to be different, either in a minor or a major way. The reason for this is that the livery stables which operated these lines usually ordered only 100 or so tokens, and then had to reorder on several occasions.

Rich Hartzog is running an exonomia auction December 1 which includes some good transportation tokens. If interested write him for a catalogue.

The Maryland Amusement Token Collectors Assn. is currently issuing a series of tokens honoring amusement parks, areas, and activities. If any AVA member would like to receive the first issue, simply send a request along with SAE. Write Robert A. Johnson - P.O. Box J - Baltimore, MD 21228.

Rich Marzian picked up a couple of interesting tokens. They are both aluminum 33mm solid, inscribed C.C. BROWN, THE TAILOR 50¢ AND THIS CHECK IS GOOD FOR ONE STREET CAR FARE 322 PEARL AVE. NEW ALBANY, IND. on obverse, and C.C. BROWN THE TAILOR 50¢ 322 PEARL AVE. NEW ALBANY, IND. on reverse. The second token is the same but has "75¢" on the "street car fare" side, and "25¢" on the other side. Apparently the streetcar fare in question was \$1, and we can't figure out what kind of ride, probably in the 1920's, this would represent. There are several other tokens from other cities of a similar type. They are kind of unusual, and interesting.

Floyd Hartley reports a 38mm gold-anodized aluminum token inscribed HENRY FORD MUSEUM GREENFIELD VILLAGE DEARBORN MICHIGAN (TOWER & OLD AUTO) on obverse, and GREENFIELD VILLAGE RAILROAD THE TORCH LAKE 1873 MASON STEAM ENGINE (ENGINE) on reverse. You get one as a souvenir when you purchase an adult fare for the train ride.

= GUIDELINES FOR PARKING TOKEN NEW ISSUES SERVICE =

By Karl Gabsch

I have received several complaints from the membership expressing feelings that we have set the deposit of \$20 too exorbitant to join PATNIS. With this in mind the deposit will be reduced to \$10 with the hope that this will render a better feeling towards PATNIS/ We are operating PATNIS for the membership and members are what it takes to do a bang-up job.

I believe that, at this point, several guidelines of PATNIS operation should be discussed:

1. Each account will be charged \$2 to form a petty cash fund to pay for the postage, phone calls, and envelopes in obtaining and shipping tokens.
2. With each shipment of tokens your account balance will be supplied to you with the shipment.
3. When your account balance reaches \$3 it will be your responsibility to make a deposit. Please do not send self-addressed envelopes for this complicates the bookkeeping system.
4. Once your account balance has reached the \$3 limit the next 2 shipments will be held in escrow until your deposit has been received. If your deposit has not been received by the 3rd shipment your account will be closed.
5. The following handling charge will apply to each token shipped. If the catalogue value of the token is less than \$1 the handling charge will be 25c. If the cat. value of the token is \$1 or more the handling charge will be 35c.
6. At times I will have to purchase tokens for greater than catalogue value from the user. I will not buy them at greater than 4 times cat. value unless you advise me otherwise.
7. Once each year you will receive a copy of your account ledger sheet. This item will be sent you in the July shipment.
8. Your account will be charged with the postage of each shipment either 28c or 41c depending on number of tokens sent.
9. All shipments will be postmarked by the 15th of the month.
10. All tokens shipped will be listed in The Fare Box either the month before or just after you have received the tokens.
11. In the event you receive a token you do not wish to keep it may be returned for credit, but it must be received before the next shipment goes out. However, the handling charge will not be refunded.

Now I would like to review some definitions with you when the tokens are listed in The Fare Box. James Hall will list the tokens availability to PATNIS members as follows: (1) Not available. This means I could not get a supply of the tokens.

(2) Limited availability. This means I have a supply of the tokens but not enough for all of the members. When this occurs I will conduct a lottery to determine which members will receive the token. When a lottery is conducted those members who receive a token will not be included in the following lotteries until all the members have received a token under the lottery system.

(3) Available. Which means I have a sufficient supply of the token so that all members will receive one.

As you have read our guidelines I do hope everyone can understand our position. You have entrusted me with your funds and I feel that some guidelines should be set so we all have an understanding of our obligations, one to the other.

KARL GABSCH - 9900 GARDINER AVENUE - SILVER SPRING, MD 20902

The 1981 A.V.A. Annual Convention will be held August 7,8,9, in Salt Lake City, Utah. Plan now to attend, and bring the whole family along.

= SUPPLEMENT H-9 TO FEISEL'S CATALOGUE OF PARKING TOKENS =
By James H. Hall

Whenever possible, please enclose the tokens when reporting a new variety. A new issue rubbing must include the size and metal, unless the token is enclosed. New metal issues must be submitted before the piece will be listed. In order to conserve space, the following abbreviations will be used: CT (Curved line at the top of the token) and CB (Curved line at the bottom of the token).

ILLINOIS

Chicago 3150CF (Reported by Mayland) Add new reverse D

Naperville 3615 (Reported by Pernicano)

B B 22 Sd Naperville under City Logo: tree and skyline within a square
PARKING TOKEN (CT)/N, with right foot ending in an arrow .15
(At a later date, this token will be made available through PATNIS)

C B 23 Sd The same as 3615B except the size; nothing can be found out about the size difference, from the city. This token isn't currently available from PATNIS. .15

NEBRASKA

Omaha 3700 (Reported by DiGiacomo)

PRESENTATION PIECES

AT Sv 23 Sd *Same as Manitoba 900 H, but struck in .999 silver. One piece struck for The Fare Box Literary Award.*

Howard had a merry-go-round facility in Marion, IL, in the early 1900's. The listed token was in a safety deposit vault for over 40 years. Syd Joseph made a photo of the token and we assume it was to size, 33mm.

Trenton, MO, having six known different depotel operations that issued tokens--possibly a record--now has a third listing that was issued by the Mullins, who have local advertising on the reverse side of all their issues. Since the competition did not, I think the Mullins issues are the most interesting of the Trenton depotel series.

The American Numismatic Association issued their third metallic pass, this time for a river cruise on the Ohio River held during their recent annual convention in Cincinnati last August. 500 tokens were struck. The boat itself held 215 people, which means that a maximum of 285 of these passes were not used for the cruise. Again the ANA is offering the passes for sale at \$5 and the proceeds of the sale will go to the Headquarters Building Fund. Those donating \$10 or more will receive a tax receipt plus a free pass. Send requests to ANA Boarding Pass - P.O. Box 2366 - Colorado Springs, CO 80901.

The Unidentified listing was mentioned on page 67 of the June 1980 Fare Box. We are now listing it under this classification since we have not received any leads as to origin.

The presentation piece listed is a silver striking of the AVA 1980 convention four token. The Fare Box Literary Award went to Harry Campbell. He will receive it in a special plastic presentation case.

Jim Hemphill sent a rubbing of a token owned by a non-member. It is aluminum 33mm solid, inscribed on obverse: T.B. SEATONS / TIPSO, / WASH. On reverse it says: GOOD FOR / FERRY / ROUND TRIP. Jim states that he has been researching the town but can find no record of such a place even after checking with the Washington State Historical Society. So we wonder if this is a legitimate issue or a fantasy.

Alan T.C. Weighell reported last July that Nova Scotia 100 O has been issued with the date 1979 instead of 1975. The Halifax-Dartmouth Bridge Commission cooperated

with us in supplying specimens of the 1975 issue but we have not received a reply to our inquiry about the 1979 issue. We are assuming the 1979 issue is a regular issue and not a pattern so would appreciate help on this one. Write John Nicolosi if you have a contact in Nova Scotia who can obtain a supply.

There are no new issues listings so there will be no New Issues Service report this month.

= INEXPENSIVE SPECIALTIES FOR THE NOVICE COLLECTOR =

By Helen J. Sandlewick

There are many ways to collect transportation tokens besides the impossible task of trying to collect them all. One may collect early tokens before the advent of motor buses, or ferry tokens, or bridge tokens, or a single large city (try Louisville or New York City!). Generally these types of collections are for the older, long-time collectors who were able to acquire scarce items when everything was less expensive and scarce, or for the well-to-do collectors who have the time and/or money to find tougher tokens.

The average collector will accumulate anything from common tokens to a few census ones. But sooner or later he will specialize in some category that appeals to him, such as his home state, or all state capitals, or any one of the many harder specialties as he becomes an "older, long-time" collector.

For the novice collector, it seems collecting becomes tougher and more costly by the day. Gone are the days of finding a cigar-box-full for \$5 at a flea market! Still, there are many inexpensive categories that can be fun to collect. Here is a list of several specialties; there are many more.

1. Different types of buses on different size tokens.
2. Die varieties: in general, the more tokens issued of a given token, the more common and inexpensive it is, and the more die varieties it has.
3. Different center devices and symbols, whether hanging, stencil-cut, or solid. The more interesting ones seem to be on one-slot or solid tokens (as CA 895 F).
4. The alphabet, in hanging and/or stencil-cut letters, on 16mm and/or 23mm size tokens.
5. Numbers, as in fares, zones, routes, etc., or as times and days.
6. Dates, from 1908 to present, or any date to present. Generally, the older the token the scarce it is.

As a novice collector myself, I have thoroughly enjoyed working on categories 3-6, spending long, quiet hours going through Atwood's Catalogue and my own collection a great many times. I make numerous lists of what I have, what I need, what is available for my purse, etc. There is no better way to learn your catalogue and memorize your tokens!

Soon there will be a new edition of Atwood's and a new catalogue of die varieties to help us all. So go to it, new collectors!

= THE MYSTERIOUS WILLAPA HARBOR BUS LINE TOKEN =

Byron Johnson sends us a brochure advertising the sale of token dies which were made in times gone by, by Joseph Mayer & Bros. of Seattle. Most interesting of them is a die inscribed WILLAPA HARBOR BUS LINE. According to company records the reverse (for which no die has been found) read GOOD FOR ONE 10¢ FARE. Willapa Harbor Bus Line was operated by B.A. Bullard, who lived in Raymond, Wash., 3 miles from Willapa. The tokens were struck on October 1, 1915, for Mr. Bullard. Probably only 100 were struck. We don't know the metal. Probably brass or aluminum. Now here is a mystery, for a sleuth to discover. Sixty-five years ago these tokens were struck for a little bus line in a very small town. No token has ever been found.

Incidentally the token was 24mm, and there is a (star & rays) design in the center of the solid token.

1,250 DIFF. TT's, a nice starter collection with many scarce pieces. Also one lot of 500 diff. Will consider trades of merchant tokens or cash.

NOVEMBER, 1980

Our 401st Issue

December 10. This month we are sending you two issues in one mailing. It was becoming apparent that we would never get caught up sufficiently to correlate the date in the masthead with the mailing month, unless we did this. Accordingly you should find both the November and December issues in this envelope.

This small November issue contains nothing but a five-page Supplement to the new Hemphill Catalogue of A.V.A. Personal Tokens. I had been postponing supplements of personal tokens until Jim Hemphill and Joel Reznick were ready to mail out the copies of the new personal catalogue. That is why we have so many listings this time, and it seemed an ideal opportunity to make a small special issue, devoted to personal token listings. The listings in this issue are not in the new catalogue.

It was fast becoming apparent that a new personal catalogue was necessary, and that it should be in loose-leaf format, in such a way that each member's listings had an entire sheet. In this way, the book can be permanent. You can continue to add in new listings, or a new member who begins to issue personal tokens, without disrupting the rest of the book. This is what we now have. It is a no-nonsense book with no frills, but each member has his own sheet, with all his personals listed thereon, and as new listings are reported you can add them on. The book is available at only \$4.00, which was considerably less than the cost of printing, from AVA President Joel Reznick - 208 S. LaSalle St., Room 1510 - Chicago, IL 60604. If you want an extra 25 sheets for future listings, add another dollar.

The reason the book is so inexpensive is that the AVA Tribute Fund contributed over \$700 to the project. The tribute fund, to honor both deceased and living AVA members, is supervised by AVA Past President Bob Ritterband. A nice touch in the new book is a complete listing of all persons who have been honored in the Tribute Fund, and of all who have sent in contributions to it.

Personal Tokens are a fun hobby, an adjunct to transportation tokens. There are an awful lot of them now and some are getting rare. But not so rare, I trust, that we'll ever had to keep them in a bank vault! This is one collection you can keep in your home. Buy the new book, then, and have fun.

= SUPPLEMENT #1 TO HEMPHILL'S CATALOGUE OF PERSONAL TOKENS =

By J.M. Coffee

This is the first supplement to the new catalogue of A.V.A. Personal tokens which has just been published. We list only personal tokens which bear the name of a past or present member, issued by him, and which are made of metal or plastic. If you have issued a personal token, in order to have it listed please send one to the Editor of The Fare Box.

In the case of the Feisel tokens, the small letters after the reverse inscriptions indicate the color of printing. Each token was made with a number of different colors of printing, but in some cases no more than 6 tokens exist in a given combination of plastic color and printing color. Accordingly we are listing each color of plastic, but not the different colors of the printing, though we note which ones exist for the benefit of specialists. At least 60 of each major variety do exist.

DECEMBER, 1980

Our 402nd Issue

December 10. One reason that I wanted to get the 1980 issues finished is that I shall be away from Boston for a month beginning December 19. I shall be travelling out to Tacoma, via Amtrak of course, for Christmas. In Tacoma from December 23 until January 2. Visiting with Harold Ford in Moraga, California, from January 3 until January 9, and back in Boston on January 13. So anyone who wishes may write me at 4104 6th Avenue - Tacoma, WA 98406, if the letter would arrive at the appropriate time, or in care of Hal Ford. Mail addressed to Boston will be held for my return. I'm rather looking forward to creating the Stampede Pass, the Siskiyou, and the Donner Pass in the middle of the winter.

If you still haven't mailed in your 1981 A.V.A. dues of \$7.50, please do so. The dues envelopes were sent out with the October issue, but you don't need the envelope if you've lost it. Simply send \$7.50 to the Treasurer, R.K. Frisbee - 211 King Street - Denver, Colorado 80219.

On page 126 of the October issue Hal Ford mentioned a token recently discovered from "Tipso, Washington." No one could find a listing of such a town. Comes now a letter from Dale Noll of Sunnyvale, Cal. "In regards to the token from 'Tipso/Wash' in the Oct. 80 issue, I find the town listed in the 'R.G. Dun Postal & Shippers Guide - 1904.' It is listed as being in Lincoln County and being a telegraph office town. The nearest RR station is Wilbur, which is listed as being on the Farmington branch of the Northern Pacific RR between Belmont & Farmington, which are 6.5 miles apart. I hope that this info will verify the S.B. Seatons token."

A card from Wayne Coleman: "Wrote to the folks in Gatlinburg (Tenn.) and found the only reason for the brass and aluminum tokens is economic. When they put in the order for a second batch the aluminum was cheaper." Incidentally, Wayne also sent a rubbing of an unlisted new issue from Michigan. When I wrote to check it out, they sent me not only the one Wayne had reported, but another different one! Our New Issues Service will try to obtain quantities of both of them. And, finally, Wayne also commented (in a different letter) on a problem we all have with the prices in the Atwood Catalogue. We all know that the prices are unrealistic and that a token

listed at, say, \$3.50 is really worth up to ten times that much. Yet we also list current or recently issued tokens at their actual face value, which is what they are really worth. Thus an AVA tour token might be listed at \$3.50, and be readily available for \$3.50. An older token might also be listed at \$3.50, but really be worth as much as \$35.00. Of course there is an inconsistency here. In the 4th edition of Atwood, which I hope to produce next year, we shall have realistic prices. Until then, the best rule to follow is this: modern tokens are priced at their actual value; older tokens are given unrealistic values which are of use only for comparison.

On page 165 of the November 1974 Fare Box is an excellent article by Yosef Sa'ar of Elat, Israel, about the Greek horsecar tokens of Karlovasi, on the island of Samos. At the time this line was built, about 1905, Samos was part of the Turkish Empire, though the inhabitants of Samos were Greek. The token was issued in denominations of 10, 20, and 40, paras. At the time Joe wrote this article only the 10 paras token was known. It was pictured on page 21 of the February 1975 issue. Last year I was fortunate in being able to acquire the hitherto unknown 20 paras denomination of the Greek horsecar token, which is pictured below, enlarged 2x. The die work on the obverse is slightly different on the 20 paras token. In any event, these Samos horsecar tokens are certainly among the most interesting and attractive of overseas transportation tokens.

An interesting letter from AVA member Jack B. Wingerter, who is an official of the Terre Haute (Indiana) Mass Transit Authority: "I have enclosed OH 830 F. Since arriving at Terre Haute Mass Transit I have been regularly getting these tokens thru the fare box. I did not find this too interesting considering that I get a variety of tokens thru the fare box. However in the last couple of weeks I have discovered almost 600 of these tokens in the vault in the city controller's office. Needless to say I felt a need to find out why these tokens were in Terre Haute in such quantity. I have found that this token was used in Terre Haute by the mail carriers at the T.H. postoffice. I am not sure who brought these tokens to Terre Haute, but one of my drivers (with over 20 years service) tells me that St. John's was subsidized by the City of Terre Haute to operate the system for the City. This driver believes that St. John's brought these tokens into the city for the restricted postoffice use. Also, at this point we use no tokens in Terre Haute. However the local postoffice is probably not going to continue to lease cars and may go back to using our system. We are now toying with the idea of using our 23mm tokens (which we have in abundance) for limited use by the postoffice." All of which confirms the note under the listing for Springfield, Ohio, in Atwood.

Last summer Hal Ford and I were discussing various cataloguing problems which we would like to clear up before we publish a 4th edition of Atwood. In future I'll mention them in greater detail. There are, for instance, a number of listings of tokens which may not even exist. For instance, does anyone actually own Md 60 ABa, the one with a 7mm star-sc? Also we have allowed a lot of tokens which are not really timetables to creep into our list of timetable tokens. Timetable L is an example. I started this list, and I confess I put things into it which shouldn't be there. In future only tokens which actually state times on them will be listed. This does seem logical. The "L" token is only a commemorative piece. The result has been a lot of collectors have asked us to list other commemoratives or advertising pieces which definitely do not quality.

= TOKENS OF THE CANSO CAUSEWAY =
By J.M. Coffee

Above are 2x enlarged photos of the six tokens which have been used by the Canso Causeway. The top three have blank reverses; the bottom three are the same on both sides. The top three tokens (NS 75 A B C) were listed in the August 1977 Fare Box. They were struck in 1973: 15,000 of the \$1.50 token; 1,500 of the \$2.20 token; and 1,000 of the \$4 token. Not sold to the public, they were used as a control. When a toll was paid, the toll-taker dropped a token into the box. They are extremely rare and I know of only one set in the hands of collectors.

The bottom three tokens are now in use and are sold to the public. The price for tokens, purchased in quantity, is much much lower than the face value. Thus the price of the 75 D is 25 tokens for \$5 (20¢); for 75 E the price is 25 tokens for \$16 (64¢); for 75 F the price is 20 tokens for \$24 (\$1.20). The 3 tokens are good for \$1.50, \$2.20, and \$4.00, respectively. I guess the idea is to charge what the traffic will bear to tourists and casual users of the causeway, but to give the local citizens a huge discount.

We attempted to purchase quantities at the discount prices, but they refused to sell them to us at discount prices. They are, however, apparently willing to sell individual tokens at the full rate of toll. We accordingly decided that our New Issues Service would not handle them because of the very high prices. But individual collectors may be willing to purchase a single set at the high prices, and we have given the address to write elsewhere in this issue, although we do not guarantee that you will get the tokens even then, though we believe you will. They are a nice set.

= SOME TOKENS ARE HARD TO FIND =
By Bud Carmichael

A couple of years ago my concentration on California transportation tokens was frustrated by being unable to locate a CA 760 K, particularly since it originated in a neighboring city. This is a token used by Captain Ron, owner and skipper of a sport fishing boat plying out of San Francisco, a token that was good for part payment of a fishing trip.

The San Francisco telephone directory indicated that Captain Ron was still operating but several attempts to reach him by phone were fruitless, as was the first trip to the City. The second trip to the San Francisco waterfront, however, found him in his small office. After explaining my mission to him he informed me that he had given the rest of the tokens on hand to a girl friend as he had discontinued using them. The girl friend lived in San Mateo, a half-hour drive down the peninsula from San Francisco, but he helpfully gave me her phone number.

A phone call the next day confirmed that the girl friend had the tokens and would sell me a few. I made an appointment to meet her at her home that afternoon. After lunch I happily drove to San Mateo.

She was a young woman about 22 with a 5-year-old daughter, a precocious and outgoing youngster. I purchased ten of the tokens, all she was willing to sell, and headed home.

A few days later I began thinking of the remainder of those tokens and what their fate might be. The more I thought about it, the more it disturbed me so I called the young lady again. I asked if her intended use of the tokens required that particular one. Her answer was "No," so I offered to make a trade--I had a couple of rolls of uncirculated IN 660 C. She agreed and we made another date for the following week.

When I arrived to keep our appointment she unfolded a sad story. Somehow her daughter had managed to dump a bottle of waterproof glue into the small carton of aluminum tokens. It wasn't discovered until a few moments before I arrived. Tokens and glue had become one solid chunk. Only a few could be pried from the surface without damage. She threw the remains in the garbage.

Before leaving I gave her the two rolls of tokens I had brought and asked what she planned to do with them. Her answer, "I'm a belly dancer and want to make a belt that will jingle."

NOTES FROM THE DELAWARE VALLEY

Mea culpa! I missed writing up the September DVVA token meeting, I procrastinated until it was too late. Well I don't intend to miss this one. Our November 16th meeting was held as usual in Ft. Washington, Pa., and in the crowd there were two new faces who we hope will become regulars. They were Philadelphians W.E. Hansen and Leon Geller. The regulars included Bergey, Ciecka, DiMichael, Streeter, Thomas, Zaika, Cohen, Donahue, Mielke, Aquilino, Pernicano and Lonney. Trading was active and the atmosphere friendly, just the thing for a Sunday afternoon.

Al Zaika, the sole chairman of the DVVA Annual Spring Token and Medal Show, has asked to be relieved of this position. Al will continue his association with the DVVA but he has accepted additional responsibilities as the president of the newly founded New Jersey Exonumia Society. We will truly miss Al's expertise and dedication as we begin work on the 1981 show.

All the Delaware Valley members join in extending best holiday wishes to the entire membership of the AVA and invite you to join us if you're ever in the area.

= NEW PERSONAL TOKEN CATALOGUE NOW READY =
By Joel J. Reznick

Here I am at the office at 9:30 p.m. At long last the Hemphill loose-leaf catalogue of personal tokens is just about ready to be shipped. The mailing boxes came this weekend, and tonight I typed labels for each name and put them on the boxes. All that remains is to get the reprint of the "S" page in the Index (which was printed flip-flop obverse & reverse) and they'll be on their way. I would like to have seen a better printing job, but they were printed with paper masters copied from typed material, so at least it's adequate.

All of the credit in the world goes to Jim Hemphill who laboriously designed the format, then typed each page (and when I didn't think we were explicit enough re-typed each page). Jim, thanks for a job well done!

After working with the printer determining what would be on the back of each page (some blank form, some continuation of a listing, some even a different person's listing) and ordering the paper we waited--and waited--and WAITED. We were a "fill-in" job (to save \$\$\$) and in this political year our printer got VERY busy. Anyway, finally the sheets were shot and printed and delivered 2-up to our great, unselfish friend Grant B. Schmalgemeier, Jr., who promptly spent 3-4 hours a night for five nights beginning the job of gathering 125 individual sheets so as to form the book. My family and I helped him that weekend, but in the end it was Grant, putting in untold hours of work, who finally got the pages gathered, cut, drilled and packaged so that I could bring some to the office (and some home to be stored) to begin the process of mailing.

So far as I know we shall be shipping only 70 books. We printed 500. Thanks to a generous grant of \$720.00 from the AVA Tribute Fund and its stalwart chairman, Bob Ritterband, as well as to the labors of all those mentioned, the book will only cost \$4.00 postpaid. Although the pages measure 8 1/2 x 5 1/2", they are punched for use in a 9x6 1/2" binder (which matches the size of the Atwood and also is much easier to locate). Of course if one wishes, the pages may be repunched for use in 8 1/2 x 5 1/2" binders, which are available.

We have detected some errors and will issue an Errata sheet as soon as possible. Please note that some listings, most importantly 341, 375, 1219, 1547, and 1008 (which was always wrong; should be 1005), 1051, and particularly 1251, have been rearranged.

Hope you all find it useful and not too confusing. If you have questions or comments, you know where to find me.

- The Head Frog

= PRICES REALIZED IN ED DENCE AUGUST AUCTION =

GA 60 H.....\$9.00	PA 750 AE...\$31.60	PA 750 AV
MD 60 W.....32.00	PA 750 AJ.... 5.50	(solid)....\$18.00

		VA 20 C..... 3.25

= THE HULA GIRL TOKEN =

On page 92 of the August issue we published pictures of a card on which Hawaii 240 E tokens were being sold in Honolulu. The Japanese inscription on one side of the card has now been translated for us by Mrs. Gene Godsoe. It reads *Fantasy Hawaii Bus Private Coin*. In 1951 This Coin was made to replace previous private coins for reasons unknown was never used. Nickel composition. Each is \$1. 3 for \$2.50. If you are a person who has interest in old coins this is the best souvenir of your Hawaiian tour. A catalog printed in 1967 listing Hawaiian coins for 1837-1967 this coin is priced at \$45 people believe this to be the correct valuation.

■ FOREIGN TOKENS ■

By J.M. Coffee

When I purchased Ralph Frelberg's collection, I was really only interested in his U.S. tokens. I was, however, delighted to discover that he also had a really fine collection of foreign tokens. I previously had a few hundred foreigners myself, and a handful of good ones, but nothing to get excited about. Now, however, with Ralph's foreign tokens I have a pretty good collection of foreign transportation tokens and I have discovered whole new vistas opening up. Some of our members who care nothing for foreign tokens are really depriving themselves of a fascinating field. An added bonus is that foreign transportation tokens, when they are available from dealers, are usually priced far lower than they are worth. In Europe, for instance, their transportation tokens fetch very high prices.

More and more catalogues of foreign transportation tokens are being published in Europe. A really outstanding catalogue of German transportation tokens is now in print, the work of AVA member Günter Fritz of Köln, Germany. It pictures nearly all of them, and they are fascinating! Also in print is an excellent small printed catalogue of Danish transportation tokens--*Busmærker & Sporvognspøletter*--by former AVA member Jørgen Sømod, of København. I believe this field is just opening up, and hundreds and hundreds of new discoveries will be coming to light in this decade.

Fortuitous at this time is the new publication of Kenneth Smith's excellent catalogue of ferry, ship, and canal transportation tokens, available from him for the very low price of only \$11.00 postpaid. It contains a wealth of background information with the listings. One may further satisfy his craving for more information about foreign tokens by going thru back issues of *The Fare Box*, where the magnificent scholarship of the late Frits Blingen is evident time after time, to say nothing of the fine articles of our member Don Capper of England.

I had always thought the endless plastic issues of England were rather boring. But on reading Capper's award-winning articles about them, I developed a new respect for them--learning, among other things, that some of them are as old as the U.S. celluloids. And the prices for English celluloids are ridiculously cheap--for now, anyway.

On the opposite page I have put some pictures of a few interesting foreign tokens. Unfortunately they didn't reproduce too well, but you can at least get the idea. They are all enlarged 2x, as usual. At the top (#1) is Scotland 510 FD, listed in Smith's new book at \$36. This is the kind of token that really turns me on, I confess. A fascinating and beautiful old token.

From an excellent article by former AVA member Frank Shelmerdine, on page 26 of the March 1969 *Fare Box*, we learn about the firm that issued the next two tokens pictured (#2 and #3). These two tokens were issued between 1852 and 1865 in Manchester, England for an omnibus line. They bring back Charles Dickens and Conan Doyle. The 2d token marked "Omnibus Outside" permitted the passenger to ride on top of the vehicle. The omnibus in England usually had seats outside, on the top, which were cheaper. Usually boys and young men rode up there, and saved a penny, by braving the elements. The 3d "Omnibus Inside" token permitted you to ride inside, protected from rain or snow. Usually the ladies preferred this more expensive class of omnibus riding.

I don't believe the #4 token pictured is listed by Smith. It was in an envelope marked "Barcelona, Spain" among some tokens I bought. It is interesting for the old bus pictured. There is also a 10c denomination.

The #5 token is a brass bridge token from Lisbon, Portugal, or somewhere in Portugal at any rate. It is dated 1913 with ½ centavo denomination, for use on the "Luis I Bridge." I like it because there is a little trolley car pictured crossing the bridge!

Foreign tokens come in all shapes and sizes and ages. Very few people over here want them, so bargains are available. Why not start collecting them and open yourself to some new and fascinating vistas...and in the process do some vicarious travelling to distant places in time and space?

---	---	-------	-------------------------------	------

The mintmark on these tokens is that of the Sherritt Gordon Mint.

Bill Love, president of Taku-Glacier Taxi, states that the token we have listed as AK 1000 F was issued to assist in celebrating the Juneau, Alaska, Centennial. The tokens are sold for \$5.00 each in Juneau, and \$6.00 each for out-of-town orders. Since this issue obviously is a commemorative and was not intended as a regular issue we are listing it under the Miscellaneous heading. Who would pay \$5 or \$6 for a token that is only good for a \$2.50 ride? Members who nevertheless want to order the token--which is very attractive--may order it from former AVA member W.E. Nickell at 432½ South Franklin Street - Juneau, AK 99801. The \$6 price applies unless you live in Juneau. Mr. Nickell states that 250 specimens will later this year be struck in silver, and we assume they will be available for a fairly stiff price at that time.

Tom Robinson discovered the Eureka Springs listing on a recent visit there. A local banker owns the token. Tom researched this issue and reports that the Hill Livery & Transfer Company did operate in Eureka Springs. James W. Hill was listed in Dun & Bradstreet from 1890 thru 1905.

The manager of the Sac County Fair states that the wooden nickels were a big hit. This was the first year for them and everybody liked the tokens. They may issue wooden tokens again next year. She also states that very few of them were left over as of July 14, 1980. Several collectors wrote for specimens as far back as several months ago and still have no replies.

Baton Rouge, LA, reordered 80 B and this time it was struck in brass. Two varieties are known. One is the same die as the bronze La 80 B and the second is different as noted. La 80 B and C are used for adult fare, while 80 A is now used as a school fare. The New Issues Service will handle this new listing, but lacks a full supply of each variety.

Winona, MN, reordered the wooden issue 980 K and the second order was not exactly like the original issue. But this second order does not justify a new major listing. These wooden tokens are used by senior citizens and college students.

NY 780 O was ordered through a different jobber, who placed the order with another manufacturer this time. Hence the different general appearance of this token when compared with the previously listed welfare issued. Doug Borden cautions that the gold printing on previous issues turns to silver after these tokens circulate for a while. The New Issues Service will not handle this listing since this entire welfare series is extremely difficult to get, and the welfare department will not cooperate.

The Houston, TX, listing was the subject of an article by John Byars on Page 111 of the September 1980 Fare Box. The footnote in Atwood's Catalogue on Page 538 would seem to imply this should be a regular listing and not a zone check. We are listing the token without price since the quantity struck and destroyed is not known. Perhaps the issue was never placed in use and only the zone check listed as NJ 997 G was used!

Reston, VA, is a "new town" near Washington, D.C. It was especially designed and built in recent years and is considered a showcase of what a modern American town could look like, utilizing open spaces, shopping centers, homes, and apartments in harmonious design. The listed plastic issue is good for one 35¢ fare between 9 a.m. and 4 p.m. Between 6 a.m. and 9 a.m., and 4 p.m. and 7 p.m., two tokens are required to ride the Reston Internal Bus System, which is part of Reston Area Transit Services (RATS). The system operates six days a week. The routes for the buses are A and B, so that they are not at the same place at the same time. One would be heading north, while the other is going south. This system has been operating for nearly three years. The New Issues Service will supply this token to its members.

Bill Garrison discovered the two new Somerset listings while attempting to obtain specimens of some of the previously listed issues. He reports 825 B and C are now obsolete and 10,000 each of 825 D F G and H were ordered, though the earlier issues are now scarce since many of them are kept as souvenirs and not redeemed. The New Issues Service will supply 825 H, but not G, to its members.

Dan Benice sent a photocopy of the Unidentified #203, which we reproduce here. The shape of the token is a bit odd, though "octagonal" is the closest we can come to describing it. We have no idea where the token is from, but the wording on reverse indicates it would be from some town on the water.

The Canso Causeway, celebrating its 25th anniversary, issued the three new tokens in September. The tokens replaced tickets effective at 7 a.m., September 15, 1980. The 16mm token is used by motorcycles, passenger cars, and small commercial vehicles. The two other tokens are used by larger commercial vehicles and trucks. New Issues Service will not handle these because we cannot obtain enough of them. Collectors desiring them may purchase single sets for \$7.70 plus \$1 handling fee

payable in Canadian funds to "Nova Scotia Department of Transportation." Write to Brian G. Jay, Director of Staff Services, Dept. of Transportation - P.O. Box 186 - Halifax, Nova Scotia B3J 2N2. The tokens listed as 75 A B C have not been used for some time and no specimens remain.

= DECEMBER NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

It has now been a couple of months since we mailed any new issues out--in fact, none since September. Of course the reason for this is that we had none to send. But we haven't been idle. We still follow every lead, we have members looking for tokens for us, and there definitely will be some for you next month. Because of the Christmas rush we do not, in any case, mail tokens in December.

Recently I received Kenneth Smith's new catalogue of world ferry, ship, canal, transportation tokens. A job well done and it is a must for any serious collector of foreign tokens. I heartily recommend it.

Will the following New Issues Service members please write or call me at once (for the obvious)? Kitch, Harlow, Eshleman, Kurtz, Glenn Williams, and Steiblin. And will Susanna Lewis of Brooklyn also please write me? Perhaps you have moved? Your September new issues were returned to me marked "not known." That's twice I've send them and got them returned.

May I take this moment to wish each member of the A.V.A. and your family a most prosperous and Happy New Year. Health to one and all always.

Welcome this month to Paul Thompson to associate status.

= PRICES REALIZED FOR THE PHILADELPHIA COMMEMORATIVE TOKENS =

In an ad in the October issue I offered the four beautiful Philadelphia commemorative tokens (Pa 750 AC AD AE and AT) for auction. Auctions closed today (December 12) and the top bid for each token was as follows: AC - \$45.55; AD - \$47.00; AE - \$45.00; AT - \$16.00. They went to four different people. As a point of interest, the second high bid, in each case, was only a few cents less. I received bids ranging all the way from \$25 for the whole set on up. As total for the set came to \$153.55, this will give people some idea of the value of this series.

The person to notify when you change your address is the Editor of The Fare Box. A contribution to pay for a new address plate, which costs us about 55¢ now, is welcome, but of course it is voluntary.

PARKING TOKENS FOR SALE: CA 3395 A, 3845 H 65¢ ea; PA 3015 D, MSPT 3061 A, 3068 Ab 50¢ ea; PA 3987 Ce 35¢; KS 3490 D, NY 3435 Bb, PA 3635 A, 3987 Ca 30¢ ea; MSPT 3060 Ab 15¢; CA 3450 Z AD AE AF \$2.50 ea. = SUPPLEMENT H-10 TO FEISEL'S CATALOGUE OF PARKING TOKENS =
By James H. Hall

Whenever possible, send new issues to me. If this isn't possible, send a clear rubbing and be sure to include the size and the metal. Standard abbreviations to be used in this column are: CT - Curved around top of token rim; CB - Curved around bottom of token rim; and CR - curved around the entire rim instead of a small segment of the top.

(Comment on D. C. 35000, by J. Hall: This token was listed as Unidentified 3044. It is a Washington, D. C. token and the Unidentified listing should be deleted. Freedman's Hospital was established by President Abraham Lincoln's Emancipation Act of the 1860's. Freedman's Hospital was the first all black hospital in the United States. During the twentieth century, Howard University opened its doors, as a black college, in the same area. Howard's Medical School staff trained, and staffed Freedman's Hospital medical personnel. During the 1970's, the city of Washington faced financial difficulties. As both the University and Hospital received funds from the city, it was decided to merge the hospital into the university complex. When this was done, the name Freedman's Hospital was dropped and the hospital became Howard University Hospital.)

UNIDENTIFIED

- 3044 Delete and change to Washington 35000.

At this time, I am currently awaiting answers from around twenty outstanding new issues, throughout the U. S. Collectors have sent in tokens which I have attempted to go to the issuers and obtain specific issue data on. As the data comes in, I hope to be able to acquire a supply for PATNIS to be able to distribute to the members. The time involved from a member's reporting a new issue and getting an answer from the issuer has been taking around 90 days. Most of the new issues are becoming available for PATNIS; only a small number are turning out to be dead ends.

James H. Hall 4301 Columbia Pike #710 Arlington, Va., 22204
